Pressteel Co., 9705 E. Garvey Ave., El Monte, Calif.
Ray Prods., Inc., 703 S. Palm Ave., Alhambra, Calif.
Sara Scientific Co., P.O. Box 321, San Francisco, Calif.
Sturdilite Sci. Furniture Sys., 100 Acorn St., Plainwell, Mich
Techni-Tool, Inc., 1216 Arch St., Philadelphia, Pa.
Tenney Engrg., Inc., 1090 Springfield Rd., Union, N.J.
Torit Corp., 1133 Rankin St., St. Paul, Minn.
Westinghouse Elec. Corp., 4300 36th St., S.E., Grand Rapids, Mich.

X-Ray Intensity Meters—See Meters, X-Ray Intensity

X-Y Axis Tables—See Simulators, Motion

Xenon Lamp Power Supplies—See Power Supplies, ARC Lamp

Yokes, Deflection, Oscilloscope

Stackpole Carbon Co., St. Marys, Pa.
Syntronic Instrs., Inc., 100 Industrial Rd., Addison, Ill. ..... p 2347
Celco, 70 Constantine Dr., Mahwah, N.J.
Shigoto Inds., Inc., 350 Fifth Ave., New York, N.Y.
Y.T. & T. Corp., P.O. Box 306, Roslyn Hgts., N.Y.

Yokes, Deflection, Radar PPI

Stackpole Carbon Co., St. Marys, Pa.
Syntronic Instrs., Inc., 100 Industrial Rd., Addison, Ill. ..... p 2347
Celco, 70 Constantine Dr., Mahwah, N.J.
Dittmore-Freimuth Corp., 2517 E. Norwich St., Milwaukee, Wisc.
Y.T. & T. Corp., P.O. Box 306, Roslyn Hgts., N.Y.

Yokes, Deflection, Cathode-Ray Tube

Amperex Elctrn. Corp., 35 Hoffman Ave., Hauppauge, N.Y. p 2330
Stackpole Carbon Co., St. Marys, Pa.
Syntronic Instrs., Inc., 100 Industrial Rd., Addison, Ill. ..... p 2347
TRW INC., 1100 Glendon Ave., Los Angeles, Cal.
Advance Ross Elctrns. Corp., 135 S. La Salle St., Chicago, Ill.
American Elctrn. Controls Co., 2459 Susquehanna Rd., Roslyn, Pa.
Celco, 70 Constantine Dr., Mahwah, N.J.
Ceramic Magnetics, Inc., 87 Fairfield Rd., Fairfield, N.J.
Denson Elctrns. Corp., P.O. Box 122, Rockville, Conn.
Ferranti Elec., Inc., E Bethpage Rd., Plainview, N.Y.
General Instrument of Canada, Ltd., 151 Weber St. S., Waterloo, Ont., Can.
General Instr. Corp., 165 Front St., Chicopee, Mass.
Molex Prods. Co., 5224 Katrine Ave., Downers Grove, Ill.
Rola Div., 21010 Miles Pkwy., Cleveland, Ohio
Shigoto Inds., Inc., 350 Fifth Ave., New York, N.Y.
Stancor, 3501 W. Addison St., Chicago, Ill.
Sylvania Elec. Prods., Inc., Elctrn. Comps. Div., 100 First Ave., Waltham, Mass.
Triad Distributor Div., 305 N. Briant St., Huntington, Ind.
Utrad Corp., 305 N. Briant St., Huntington, Ind.

Yokes, Deflection, TV Camera

Stackpole Carbon Co., St. Marys, Pa.
Syntronic Instrs., Inc., 100 Industrial Rd., Addison, Ill. ..... p 2347
Cleveland Elctrns., Inc., 2000 Highland Rd., Twinsburg, Ohio
Multi Media Engrg., Inc., 2385 Lewis Ave., Rockville, Md.
Shigoto Inds., Inc., 350 Fifth Ave., New York, N.Y.

Yokes, Rotating Coil

Syntronic Instrs., Inc., 100 Industrial Rd., Addison, Ill. ..... p 2347
Celco, 70 Constantine Dr., Mahwah, N.J.
Dittmore-Freimuth Corp., 2517 E. Norwich St., Milwaukee, Wisc.
Tele Coil Co., Inc., 2733 Saunders St., Camden, N.J.

Zener Diodes—See Diodes, Zener

Zipper Tubing—See Tubing, Zipper

Zone Boxes, Thermocouple—See Thermocouples, Elements & Acessories

If you want to know

what manufacturers make what products, the **eem** green pages will solve your problem.

Product data is found

in the **eem** white pages. They contain just about all the information you need to make a purchase decision.

If you're interested

in finding the address of a specific manufacturer, the **eem** yellow pages is the place to look.

Tell Them You Found It In eem

A

ACDC Electronics Inc. 922-927
ACS Industries, Inc. 1597
Analog Digital Data Systems, A.D. Data Systems 538, 2005
ADC Products 2360-2365
ALA Industries 1715
AMP Inc.
Capitron Div. 928, 929, 2169, 2366, 2367
Industrial Div. 536, 537
A.P. Circuit Corp. 1551
A P Incorporated 1598
API Instruments Co. 606, 607
ARRA, Inc. (Antenna & Radome Research Assoc.) 853
ATR Electronics, Inc. 921
Abbott Transistor Labs., Inc. 930-949, 2848-2851
Accutronics Inc., Div. of Gibbs 1402-1414
Acopian Corp. 950-951
Adams & Westlake Co. 1716-1717
Advanced High Voltage Co. 952
Ad-Yu (See Universal Ad-Yu)
Aero Devices 2908
Aeroflex Labs., Inc. 1630-1631
Aerospace Research, Inc. 854
Aertech Industries 855
AirBorn, Inc. 2368
Airflyte Electronics Co. 1629
Airpax Electronics, Inc. 2000
Airtron, Div. of Litton Industries..856
Alco Electronics Products, Inc. 1491-1493, 1718, 2001-2003
Alford Mfg. Co. 857
Allard Instrument Corp. 1494
Allen Avionics, Inc. 1552, 1553, 2558-2563
Allen Electric & Equipment Co.
Tempo Instrument Div. 1399
Tempo/UTI Div. 1398
Allen Electronics 2329
Alliance Mfg. Co. 1632
Allison Laboratories, Inc. 1318
All States Plastic Mfg. Co., Inc...2909
All-Tronics, Inc. 1554-1558
Allen-Bradley Co. 2690, 2691, 2794, 2795
Alpha Wire Corp., Div. of Loral Corp. 2910-2911
American Aerospace Controls 1361-1363
American Aluminum Co. 2146
Americon Corp. 859
American Electrical Heater Co. 2834, 2835
American Electronic Labs., Inc.....858
American Lava Corp. (Sub. of 3M) 2666
American Precision Industries
Delevan 1642, 2340
Electro-Mechanical Products 1633
American Technical Ceramics 2164, 2165
American Trans-Coil Corp. 2331
American Zettler, Inc. 1721-1724, 2004
Amersil, Inc. 2681
Amperex Electronic Corp.
Capacitors 2166-2168
Ceramic Resonators 1559
Resistors 2687
Speakers 529
Tubes 2128-2130
Yokes 2330
Variable Resistors 2800
Amphenol Corp., Sales Div.
Connectors & Sockets 2369-2415
Potentiometers 2776-2781
RF Switches 2006, 2007
Anadex Instruments, Inc. 539
Analog Devices, Inc. 540, 541, 953, 1319-1321, 1561
Andersen Laboratories, Inc. 2564
Anritsu Electric Co. (Ataka & Co., Ltd.) 1719
Applied Microwave Laboratory 860
Applied Research, Inc. 861
Arco Electronics, Inc. 2170-2176
Aritech Corp. 1562
Arnold Engineering Co. 2590-2591
Arnold Magnetics Corp. 954-959
Art Wire & Stamping Co. 2680
Artisan Electronics Corp. 1720
Artronic Instrument Co. 2565
Arvee Engineering Co. 1322
Arvin Frequency Devices 1415
Arvin Magnetics 507, 508
Ashland Electric Products 1634
Associated Research, Inc. 608, 609
Associated Testing Labs., Inc. 602
Astro-Metrix Corp. 960-962
Astrosystems, Inc. 542-544, 610-612
Atec, Inc. 1358, 1359
Atomichron, Inc. 684
Augat, Inc. 1599
Austron, Inc. 605, 963
Automatic Coil, Div. of Designatronics 2332-2335
Automatic Controls, Div. of Cook Electric 1746, 2028
Automation Development Co., Div of American Digital Corp. ..1636, 1637
Autotronics, Inc. 1635
Avtel Corp. 613, 964-969

B

B & K Instruments, Inc. 618
Babcock Electronics Corp.....1726-1729
Balco Electronics
Balco Capacitors 2178, 2179
Balco/Marstan 2688, 2689
Barnes Corp. 2416
Beckman Instruments, Inc.
Cedar Grove Operations 614, 615
Helipot Div. 2782-2785
Beede Electrical Instrument Co. 616, 617
Behlman Engineering Corp. 970
Bel Fuse, Inc. 2566-2571
Belden Corp. 2912
Bell, Inc., F.W. 619, 2120
Bendix Corp.,
Environmental Science Div. 545
Microwave Devices..862, 2417, 2592
Best Electronics 2095
Beta Instrument Corp. 546
Biddle Co., James G. 626
Bird Electronic Corp. 620, 621
Bissett-Berman, Div. of Alloys Unlimited 1360
Blackhawk Network Corp. 1423
Bliley Electric Co. 1416-1422, 2572
Bloc-Lite 1495
Blue M Engineering Co. 603
Bodine Electric Co. 1638
Boonton Electronics Corp. 622-625
Borg-Warner Thermoelectrics 2096-2097
Bourns, Inc. 1730, 1731, 2786-2793
Bowmar Instrument Corp. ..1364, 1365
Brush Instruments..509, 840, 841, 2593
Buchanan Electrical Products Corp. 2418, 2419
Buckeye Stamping Co. 1496
Bulova Watch Co., Inc.
American Time Products 971, 1429, 1430, 1708
Frequency Control Products 1424-1428
Servo Products 1981-1983
Burroughs Corporation 547
Burton-Rogers Div., Hoyt Electrical 712, 713
Bussmann Mfg., Div. McGraw-Edison 2008-2009

C

CEA, Div. of Berkleonics, Inc. 972-1002
C & K Components, Inc. 2010-2013
CML, Inc. 1032a-1032f
CTS Corp. 1431, 1600, 2014, 2700, 2796-2797
CTU Transformer Engineers 2852
Cablemaster, Div of Accurate Electronics Corp. 627
Cabtron Corp. 2147
Caddell-Burns Mfg. Co. 2336, 2337
Caddock Electronics 2692-2695
California Electronic Mfg. Co. 1366
California Instruments Corp. 628, 1004-1005
Cal-R Inc., Sub. of Cap Tech Inc. 1601, 2098, 2099, 2180-2183, 2696, 2697
Calvert Electronics Intl. 2131
Capitol Machine & Switch Co. 2015
Carborundum Co. 2100-2104, 2698, 2699
Carling Electric Inc. 2016
Carter Mfg. Corp. 2798, 2799
C-Cor Electronics Inc. 1324-1329
CMC (Computer Measurements Co.) 630-632
Centralab Electronics 2017, 2184, 2801
Cherry Electrical Products....2019-2022
Chester Cable Operations Cities Service Co. 2913
Chicago Dynamic Industries 2018
Chicago Lock Co. 2023
Chicago Miniature Lamp Works....1497
Chicago Switch, Inc. 2024
Christie Electric Corp. 1006, 1007
Chronetics, Inc. 629
Chrono-Log Corp. 548
Cimco Wire & Cable Co. 2920
Cinch Graphik, Div. of TRW 1355
Cinch Mfg., Div. of TRW 2420-2430
Circon Component Corp. 2836
Circuit Power, Inc. 1008, 1009
Clare & Co., C.P. 1732-1742

54
PRODUCT SECTIONS
in 3
VOLUMES

VOLUME 1

Pages 505 to 1316

Test Instruments and Equipment & Systems

- Test, Measuring & Recording
- Environmental Test
- Power Supplies
- Production Machinery
- Computing, Data Handling & Accessories
- Communications
- Microwave
- Telemetering
- Audio

VOLUME 2

Pages 1317 to 2143

Active Components / Circuit Assemblies / Controls & Drives

- Semiconductor Devices & Integrated Circuits
- Tubes
- Amplifiers
- Filters
- Crystals
- Photoelectric & Optical
- Relays & Switching Devices
- Motors & Servo
- Thermal Devices
- Transducers
- Panel Components & Readouts

VOLUME 3

Pages 2145 to 2972

Passive Components / Materials / Hardware

- Capacitors
- Resistors, Fixed & Variable
- Delay Lines
- Connectors
- Transformers
- Coils
- Fans & Blowers
- Insulators
- Materials & Chemicals
- Wire, Cable, & Accessories
- Cabinets, Fabricated Parts & Hardware
- Hand Tools
- Manufacturing Services

HIGH SENSITIVITY, HIGH RELIABILITY !!

YOKOWO ANTENNA

Yokowo Mfg. Co., Ltd., Japan's leading manufacturer of Antenna field,offers you the finest products at reasonable price. All Yokowo antennas are backed by the progressive research staff and produced under rigid quality control.

TELESCOPIC ROD ANTENNA FOR TV SET

Model BA-5CP

Any collapsed length available, provided the extended length of antenna is limited by the collapsed length, diameter of outer tubing, and number of sections.

Model SA-127A

Material:
Antenna elements and tips are made of brass (65～35 alloy) if otherwise not stated.

Finish:
All the visible parts are chrome plated, if otherwise not stated.

CAR RADIO ANTENNA

Automatic Type

Model YA-1000A

Ring-Key Type

Model RA-52

Model VW-402

YOKOWO CAR ANTENNA

Car Antennas are available in various kinds and those are designed for use on all sorts of cars, from small to large sizes. YOKOWO Car Antenna will always prove its highest efficiency even on the street surrounded by tall buildings and in the remote mountain areas where the electric wave is so weak.

When Your Problem Comes to a Head...Solve it with Arvin®

MAGNETICS

8 TRACK Three inductances currently available: .350mH, .850mH, 1.4mH. This provides a range coverage from .5 to above 2.0 MHz Bias frequency. (Up to 10 MHz will be available this year.)

4 TRACK
Inductance 1.0mH

CASSETTE
Inductance .900mH

4 CHANNEL STEREO
Inductance .900mH

RESEARCH, IMAGINATION, AND EXPERIENCE HAVE BEEN COMBINED IN THE DEVELOPMENT OF ARVIN'S NEWEST "LONG LIFE, LOW MAINTENANCE" DUPLICATING HEAD LINE.

This year Arvin Magnetics offers *four* professional high speed stereo tape duplicating heads, all incorporating Arvin's high standard for quality, yet remaining reasonably priced. We have again incorporated the suggestions, opinions and expectations of professionals in the tape duplicating field, for mechanical and electrical parameters in the product. Let our market research into duplicating head needs, and the translation of these needs into high quality products work for you.

MECHANICAL FEATURES

Head tape surface is completely exposed for ease of cleaning.

Heads are relief slotted to avoid tape edge abrasion on head surface.

Lapped-in, pre-established Azimuth control.

Increased tape to head contact surface for extended life and less bias re-adjustment.

Precision dowel pin head positioning.

Mounting base and cable assemblies are compatible with Ampex 3000 series recording deck—however, your requirement can be met at little or no additional cost.

Tape guides of high wear resistance material—designed to prevent incorrect tape loading.

All accessories removable and replaceable from the top.

Top cap spring hinged for convenient head replacement and cleaning.

Assembly configuration consists of 2 stacks with 4 poles in each. Head positions are interchangeable and may be "flip-flopped" to desired base to track format.

TRACK LOCATIONS ARE IN COMPLIANCE WITH R.I.A.A. STANDARDS

Custom manufacture

Magnetic heads to your specifications

MAGNETICS

Offering total services to the computer industry in the areas of...

FLYING HEADS

Hong Kong facility offers sophisticated manufacturing skills and significant savings. Arvin Magnetics—Hong Kong was established during 1968 as part of Arvin International, Inc.'s facility in Hong Kong to provide the computer industry with a low cost source of flying heads and assemblies. Employees and facilities in Hong Kong are being continually improved to provide the finest in manufacturing capability. The customer deals only with Arvin Magnetics-Columbus which had developed a sophisticated system of parts movement, importing, air shipping, and communications to assure performance to the customer's schedule. A proven approach of prototype construction in the United States followed by training in Hong Kong by engineers assures tight adherence to performance and fast production start-up.

TAPE HEADS

Double your head life by having your head manufactured as an Arvin "Hard Head." Arvin Magnetics has developed a new head construction that greatly extends head life by a special head construction that has a very low coefficient of friction. Heads constructed in this manner are called Arvin "Hard Heads." If you are a user of precision heads, Arvin Magnetics would like to quote your head manufactured as an Arvin "Hard Head."

Arvin Magnetics concentrates on multi-channel heads for the computer and instrumentation industry. Capability exists to manufacture to your design and/or specifications and to design to your system requirements. Experience with all types of core materials and head construction techniques enables Arvin Magnetics to utilize the best approach to your magnetic head needs.

FERRITE PRODUCTS

Core Material With the Big Future

Arvin Magnetics is dedicated to anticipating trends in the magnetic head area and being ready to serve our customers' future needs. A major part of this policy is the belief, based upon outside market surveys and our knowledge of the field, that ferrites will play a major role as the core material of the future in magnetic heads.

We have a multi-faceted program in the ferrite area that includes:

a. Sources of ferrite—Both internal and external sources are utilized to assure our customers of the widest range of ferrite material.

b. Machining—Trained personnel and slicers and dicers, parallel lapping machines, toroid cutters, etc., enable us to process ferrite for any application.

c. Glass-Bonding—Arvin Magnetics is licensed by North American Philips Company, Incorporated, to do glass-bonding.

Interested in seeing how Arvin Magnetics would solve your head problem? Contact Manager, Arvin Magnetics, to arrange for a presentation on the total capability of Arvin Magnetics and a discussion on how this capability can be applied to your problems.

From the people who pioneered magnetic recording

Brush magnetic heads.

designed and fabricated to your specifications

Brush designs and fabricates magnetic heads to *your* particular requirements . . . from low cost single-track audio models to highly sophisticated multi-track heads and multiple-head assemblies.

• Digital heads in IBM compatible formats, or format of your choice — with packing densities to 6000 fci.

• Wideband instrumentation heads — from IRIG formats to 42 tracks/inch — out to 2MHz.

Full range of electrical characteristics — to your specifications. ▪ A quarter-century of experience (Brush developed the first successful magnetic recorder back in 1942) has produced proprietary core and structural designs with pronounced advantages in higher efficiency, reduced crosstalk and crossfeed, extended life, higher resolution.

▪ Whatever your problem involving heads, give us your specifications. Gould Inc., Brush Instruments Division, 3631 Perkins Ave., Cleveland, Ohio 44114.

GOULD BRUSH

INTERNATIONAL ELECTRO-MAGNETICS, inc.

iem®

ERIC DRIVE AND CORNELL AVENUE, PALATINE, ILL., 60067, AC #312-358-4622

IEM with its ultra modern totally integrated facilities is one of the oldest and most dependable supplier of mass produced and special magnetics heads as well as magnetic recording systems. IEM's design files include many thousand different heads to meet a wide variety of applications.

All phases of manufacturing are computer controlled for fast, efficient service.

Electrical testing under laboratory conditions, NBS traceable.

FACILITIES CAPABILITIES QUALITY

Jig borer oriented machine shop represents the ultimate in precise machining.

Completely equipped machine shop for mass production of machined parts.

Proficient line personnel perform the delicate assembly operations.

Ultra precise mechanical checkout. NBS traceable accuracy.

SPECIAL SYSTEMS

Complete facilities for both engineering and fabrication makes IEM an ideal partner in your special short run requirements. Below are a few items developed with both customer and company sponsored programs.

"Run-in" and Test Line for General Purpose Instrumentation decks

Check-out Line for IEM® "Run-in" Machine

Miniature Personal Recorder Measures 7/8" x 3½" x 5"

Two Station Semi-Automatic High Speed Cartridge or Cassette Tape Loader

Bias Amplifier Mega Cycle Range Rated 50 Watts

FLUX RESPONSIVE SYSTEMS

The flux sensitive system represents an efficient method of sensing static magnetic information, making data output independent of tape speed.
The system is flexible, simple, and economical, the accuracy being mainly a function of the drive element. All circuitry is solid state utilizing plug in board, thus reducing maintenance and trouble shooting to within the scope of the average user.

— USES —

- FEEDBACK SYSTEM FOR POSITION CONTROL
- LOAD ACTUATION TO INITIATE AN OPERATION
- METERED OUTPUT FOR QUANTITATIVE MEASUREMENT
- LOGIC SYSTEM FOR NUMERICAL CONTROL
- TRIGGER CIRCUIT FOR COUNTING
- LINEAR RESOLVER
- ANGULAR RESOLVER
- ANALOG ULTRA LOW FREQUENCY PLAYBACK

Angular Resolver

Flux-Sensitive Linear Resolver for Machine Control and Measuring Applications

Analog Ultra Low Frequency Playback System Response to DC

Flux Sensitive Programmable Machine Control System

RECORDING ASSEMBLIES

Professional recording assemblies represent the state of the art for precision magnetic components. They encompass most of the standard and special recording formats and electronics. They can be incorporated for upgrading most existing professional equipment. They are also available as OEM equipment for systems manufacturers. All parts are precision ground for accuracy and permanent alignment. • Guide surfaces are of tungsten carbide for maximum life and accuracy. • IEM unique MEGA-BIAS design permits head change in seconds with positive azimuth and zenith lock-in.

Complete 16 Track 2 In. System Incorporating Tape Lift Off, Flutter Rollers and Magnetic Shielding, for Up-Dating Studio Recorders.

Micrometer Calibration Head

Turret Head Mount

Cam Actuated Head System for Ultra Precise Recording of Master Tape

Quick Change Mount with Integrated Bias Current Control Panel

REFURBISHING RECONDITIONING SERVICES

Complete service for refurbishing, including cleaning, relapping, replacement of guides and inspection. Standard audio types — all formats. Duplicator types — slave and master assemblies. Video tape recorder audio heads. Complete conversion service for various tape formats.

HI-SPEED DUPLICATION

iem manufactures head structures utilizing axis oriented manganese-zinc single crystal ferrite as well as the sintered ferrite types. The advantages of the single crystal are

- **Linearity of gap equivalent to metallic core structure. No grain pull out.**
- **Lower core loss at high frequency.**
- **Excellent wear characteristics for long life.**

STUDIO SERIES HEADS
for ½", 1" and 2" tape

STR-4B

STR-8B

STR-16B

DESIGNED ESPECIALLY...

for professional audio or mastering recorders using one half, one, or two inch tape. Uncompromised quality dictates only the finest in design, materials and technology. Custom built to your electrical specifications and mechanical mounting requirements, the Studio Series is available in standard SMPTE track formats; 3 or 4 channels on one half inch tape, 8 or 12 channels on one inch tape, or 16 channels on two inch tape. Record and Playback heads feature ultra thin HY MU 800 laminated precision-lapped cores for minimum eddy current loss, deposited silicon monoxide gaps for maximum frequency definition and hyperbolic face contour for uniform intimate tape contact. Compatible companion erase heads are available with selective (independent) channels or full width. Ferrite core structures reduce ultra high frequency bias losses while providing erasure to virgin tape level.

Nortronics

TAPE HEADS
Cassette Type

Nortronics features a complete line of heads for the cassette system, including a new bi-directional design that permits automatic changing, since the cassette need not be flipped over to play the second half of the tape.*

The Nortronics bi-directional design puts all three functions on one head, permitting two capstans to be used, thus providing for automatic reversing. Nortronics also produces conventional compatible cassette heads.

Typical operating speed for commercial applications is 1.875 ips.

Designed to provide usable frequency response from 50-12,000 Hz at 1.875 ips. with an excellent signal-to-noise ratio.

* R/P section normally receives sufficient bias thru magnetic leakage from the erase section, 50 pf across R/P coil during record.

PHYSICAL CHARACTERISTICS

The mounting bracket/tape guide (illustrated) is supplied pre-aligned. The tape guide for .150 is positioned for proper track height when gap is azimuth aligned. (Specify "A" following basic model number).

TYPICAL APPLICATIONS

ENTERTAINMENT

For monaural applications; one or two recorded tracks, .059 inches wide separated by a guard band of .030 inches on the standard .150 inch tape. For compatible stereophonic recording; four recorded tracks, each .023 inches wide, are grouped in identical adjacent pairs with .012 guard bands — permits playing monaural and stereo tapes on the same equipment without loss of program material. Despite close spacing, crosstalk rejection of stereo models is in excess of 36 db.

LANGUAGE LABORATORY-DUPLICATORS

Model W2R provides two 56-mil tracks for language lab applications with master on one channel and student record/playback on other. Also used for cue and audio information in pre-programmed slide projectors, for duplicating mono cartridges, and for recording audio and synchronization tracks with portable motion picture cameras.

miniature types

SIZES

"L" SERIES (5/16"W x 5/16"H x 3/8"D) "M" SERIES (1/4"W x 1/4"H x 1/4"D)

"M" SERIES — Features small size — 1/4 inch cubed. R/P track widths are .045 or .070 with compatible erase track widths of .055 or .090 inch. Face contour is either flush (as illustrated) or relieved. Standard relief for 16 mm stripe is .050 inch notch across top of face from case to core. To specify a relieved face add the number "3" to part number shown below. Available as no mount or base, side or rear mount (No. 2-56 stud).

"L" SERIES — Incorporates laminated cores, deposited quartz gaps and either a flush face for use with tape or a relieved face (as illustrated) for use in drum, disc or film stripe applications. The flush face contour is hyperbolic, while the pole-tip projection is .010 to 020 inch on relieved heads. To specify a relieved face add the number "5" to part number shown below. Available as no mount or base or rear mount (No. 2-56 stud). Special track widths or specifications on custom order basis. Six-inch leads std.

TYPICAL APPLICATIONS — Magnetic drums and discs, magnetic stripes on motion picture film and miniature tape recorders. When used with magnetic drums, discs and film stripes, it is recommended that a projecting track version be selected.

PR-B1F

PR SERIES

- Sets a new standard for high performance magnetic heads.
- Unexcelled response from 20HZ to 20KHZ.

Professional series full track — PR-B1F, designed especially for long wave length response with extra wide pick-up poles, smooth response characteristics are obtained to below 20HZ. Fine precision lapped laminated core stacks and deposited gaps extend short wavelength response. Extra deep deposited quartz gap.

Companion PR-B1EF ERASE also available.

L Size (Side Mount—S23)

S Size (Rear Mount—R-12S)

S Size (Base Mount—B3)

B Style (No Mount—N)

ALL NORTRONICS erase heads have efficient double-gap construction plus metal faces and cases for superior tape contact surface and heat transfer. MEF and B1EF types have same metal core construction and will erase over 60 DB. at operating frequencies up to 100 KHZ. Case sizes shown at left are "L"—large for side mount, "S"—small for base and rear mount, and "B"—standard r/p size.
PR-B1EF "PRO" series erase heads have super-efficient hybrid ferrite/laminated core structures which give erase depth in excess of 70 DB. and operate at frequencies up to 200 KHZ. Available in B-style only, with standard mounting options.

Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear** or **no mount.**

Voltage, 60 KC RMS	120 V	40 V	9.3 V	40 V

Specifications subject to change without notice. †For 56 DB erasure of Saturated Tape.

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following are typical examples:

MEF1-S23U, Full-track mono erase head, No. 1 erase electrical code, "L case," **side mount,** track **up** (studs are to **left**).

Erase Mounting Designator follows model number in this fashion:

"MEF1-N9", no mount (S Size)
"-N", no mount (L Size)
"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.
"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.
"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).
"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).

For "B" style erase heads, mounts are the same as for R/P heads.

TAPE HEADS

8-track heads for ¼" tape

MODEL ZJ2L Z-Combo

The type **ZJ2L** offers combination erase and record/playback functions in one head for 8-track stereo applications. Its patented unique "Z-Combo" construction places the erase and R/P gaps only .030 apart in the same pole structure, resulting in extremely accurate height alignment and tracking. Recording and erasing for the 8-track stereo system thereby become fully practicable. Standard B-size case fits most mountings.

Advantages of Z-Combo Close-Coupled Gaps

- Intimate tape contact with single or no pressure pad
- Insures overlap alignment of erase when R/P section is azimuth aligned
- Prevents adjacent channel erasure in close spaced track configurations when R/P section is azimuth aligned

8-Track 4-Channel P-BQL-N (No Mount)

8-Tr. Stereo Z-Combo ZJ2L (No Mount)

8-Tr. Stereo B2L-N (No Mount)

MODEL P-BQL

SUITABLE FOR HIGH SPEED DUPLICATORS, LOW SPEED LOGGING APPLICATIONS, AND GENERAL PURPOSE RECORDING AND PLAYBACK.

The NORTRONICS Premium Quality P-BQL four-channel magnetic tape head utilizes the most advanced design and manufacturing techniques. Fine-laminated cores and precision-deposited gaps give extended frequency response capability. Ideal as high speed slave heads for duplication of 8-track stereo at speeds up to 8X or 16X, with bias frequencies up to 750 KHz.

MODEL B2L-N

Standard playback — only or record/playback head for automobile or home type Stereo — 8 tape cartridge players. Premium version of above head is available with extra-fine laminated cores for improved high frequency response to 15 KHz at 3.75 ips tape speed. Also available Alfenol Premium record-only head for heavy-duty high speed duplicating applications. Give five times normal life.

TAPE HEADS

3 and 4-track heads for ¼" tape

4-Tr. Mono
B1QC-S
(Side Mount)

4-Tr. Stereo
WP-B2Q
(No Mount)

4-Tr. Stereo Combo
A2Q-BL
(Base Mount)

4-Tr. Mono Combo
A1QC-N
(No Mount)

The B2Q, C2Q, G2Q heads shown represent a broad new series of 4-track stereo and monophonic record/playback heads. Each type of head is available in either a PREMIUM or STANDARD version. The PREMIUM series is a fully professional line of tape heads giving unsurpassed performance for broadcast and studio applications. Long life and extended high frequency response at slower tape speeds, are among the benefits of the features listed: • Fine laminated, precision-lapped, low loss core structures • Deposited quartz gaps, as fine as 50 micro-inches • Hyperbolic face contour • Highly polished all-metal faces • Compatible mechanically and electrically with older model Nortronics heads • Superbly shielded against external magnetic fields. The STANDARD versions are recommended for less critical applications where cost is a primary factor. They offer improved high frequency performance over that of conventional solid-core heads, plus the added features of hyperbolic all-metal face and precision deposited quartz gaps.

4-Tr. Stereo
B2Q-N
(No Mount)

3-Track
3-Channel
P-B3Q-R
(Rear Mount)

The P-A2Q, A2Q, P-A1QC and A1QC 4-track series of NORTRONICS Combination Magnetic Tape Heads contain record/playback and erase sections in one miniature case. Internal construction is based on the low-loss, laminated core design. PREMIUM Series P-A2Q and P-A1QC heads offer fully professional fine-laminated core construction where the ultimate in high frequency performance is required. STANDARD A2Q and A1QC series heads are recommended for less critical applications where cost is a primary factor. STANDARD type heads have laminated cores, providing a superior high frequency response over that of conventional solid-core heads. Deposited quartz gaps as fine as 50 micro-inches. Precision-polished metal faces for freedom from oxide buildup. Hyperbolic face contours, available on PREMIUM models, for optimum tape-to-gap contact without need for pressure pads.

P-B3Q SERIES

Premium series three channel R/P heads designed especially to meet N.A.B. (USA) track configuration for stereo cartridge machines, two channels for stereo program plus control channel. Precision gap co-linearity eliminates phase cancellation distortion of stereo signal, all metal face insures maximum shielding. B case to fit all mounting accessories.

TAPE HEADS

4-track heads for ¼" tape

4-Track
4-Channel
BQQN-B
(Base Mount)

P-BQQ-N
(No Mount)

Nortronics Model P-BQQ is an instrument quality, 4-channel in-line record/reproduce magnetic tape head for ¼-inch tape. Its fine laminated-core construction is designed for professional applications with the ultimate in high frequency performance. Deposited quartz gaps as fine as 50 micro-inches result in exceptionally clean "smear-free" gap edges. The all-metal face greatly reduces oxide loading problems and the hyperbolic contour promotes intimate tape-to-gap contact allowing reduced tape tension and elimination of pressure pads.

Typical Applications — Instrumentation recording including carrier modulated types such as AM, FM or Pulse, as well as straight digital and analog recording. Tracks of the P-BQQ head are compatible with the 4-track stereo system making it ideal for audio duplication, background music and 4-channel in-line stereo.

Two versions are available, offering a choice between the minimum interchannel crosstalk and lower price. The P-BQQ style has the superior interchannel crosstalk rejection of 55 db. For some applications, such as pulse recording, the 18 db crosstalk rejection of the more economical BQQN model may be acceptable.

ERASE HEADS

All Nortronics erase heads have efficient double-gap construction plus metal faces and cases for superior heat transfer. They will operate effectively at erase frequencies up thru 100 kc. and also on d.c. **Two low-cost standard case sizes, "L" and "S,"** in the various mounting styles as illustrated to the right and indicated below. All erase models are also available in the B-case style to match the r/p heads; example, B2EQ4-N which is identical electrically to the SEQ4.

Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear** or **no mount.**

L Size
SEQ
(Side Mount—S23)

S Size

(Rear Mount—R-12S)

S Size

(Base Mount—B3)

B Style

(No Mount—N)

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following is a typical example:

SEQ4-R-12S, 4-track (quarter track) stereo erase head, No. 4 erase electrical code, "S" case, rear mount, 12 inch shielded leads.

Erase Mounting Designator follows model number in this fashion:

"SEQ4-N9", no mount (S Size)

"-N", no mount (L Size)

"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.

"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.

"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).

"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).

For "B" style erase heads, mounts are the same as for R/P heads.

TAPE HEADS

2-track heads for ¼" tape

PR SERIES

- Sets a new standard for high performance magnetic heads.
- Unexcelled response from 20 HZ to 20KHZ.

Professional series R/P heads. Designed especially for long wave length response with extra wide pickup poles, smooth response characteristics are obtained to below 20HZ. Fine precision lapped laminated core stacks and deposited gaps extend short wavelength response. Extra deep deposited quartz gap.

BASIC MODEL NUMBER	PROFESSIONAL PR-B2H 2 TRACK (.080 INCH TRACK WIDTH)

10 KHz/1 KHz Ratio	—	—	—	+1 DB	+3 DB

ALL NORTRONICS erase heads have efficient double-gap construction plus metal faces and cases for superior tape contact surface and heat transfer. MEH, SEH and BZEH types have same metal core construction and will erase over 60 DB. at operating frequencies up to 100 KHZ. Case sizes shown at left are "L"—large for side mount, "S"—small for base and rear mount, and "B"—standard r/p size.

PR-B2EH "PRO" series erase heads have super-efficient hybrid ferrite/laminated core structures which give erase depth in excess of 70 DB. and operate at frequencies up to 200 KHZ. Available in B-style only, with standard mounting options.

Erase heads are shown with various mounts, but all are available in your choice of **base, side, rear or no mount.**

S Size MEH (Rear Mount—R—12S)

L Size (Side Mount—S23)

S Size SEH (Base Mount—B3)

B Style (No Mount—N)

To determine erase model number, select a basic model number, add the erase electrical code, add a dash (—) and add mounting designator (below). Following are typical examples:

MEH1-S23U, 2-track (half track) mono erase head, No. 1 erase electrical code, "L case," **side mount, track up** (studs are to **left**).

Erase Mounting Designator follows model number in this fashion:

For "B" style erase heads, mounts are the same as for R/P heads.

"SEH2-N9", no mount (S Size)
"-N", no mount (L Size)
"-B3", standard base mount (Supplied S Size only). For mono heads, add a U for up or D for down after the B3 to denote track up or track down.
"-S23", standard side mount (Supplied L Size only). For mono heads, add a U for up or a D for down after S23 to denote track up or track down.
"-R-12S", standard rear mount and 12 inch shielded leads (Supplied S Size only).
"-R-4U", standard rear mount and 4 inch unshielded leads (Supplied S Size only).

BIAS OSCILLATOR TRANSFORMERS

NORTRONICS

TO DRIVE RECORD AND ERASE HEADS

- Heavy-duty Ferrite E-core construction assures minimum external magnetic field.
- High efficiency, high Q, clean waveform, and good voltage regulation.
- Wide frequency and voltage range.
- Output voltage at secondary of transformer may be varied by adjustment of the D.C. power supply voltage to the oscillator.
- Power handling up to 3 watts.

Model Number	Circuit Type and Mount	Application	Typical Operating Frequency (KHz)	Secondary Voltage (RMS)	Compatible Nortronics Heads

Table and circuit list the various methods of operation for the T70-T2 oscillator circuit, to obtain power for Nortronics #4 erase heads, at three different frequencies.

T-70 SERIES

for printed circuit board mounting

- Pin terminals provide for plug-in and soldering
- May be used with standard transistor push-pull or single-ended Class "C" oscillator circuits.
- Nylon case measures 1¼" x 1½" x 1⅛"

T-60 SERIES for chassis mounting

- Color coded leads, anodized aluminum case (1⅛" diameter, 1⅜" high)
- Two 6-32 x ⅜" spade lugs
- Units for transistor and vacuum tube applications

CONNECTOR PLUG

4-Pin Black Phenolic Plugs permit instant connection to all 4 pins of Stereo Heads and 2 pins of Mono Heads. **105-20** plug is for all Nortronics heads except BQQ, P-B3Q and P-BQL.

PLUG & CABLE ASSEMBLY

Assemblies ready to plug onto Head Terminal Pins. Consist of proper plug and two shielded cables (nominal length 18" each). **139-70** is used with all Nortronics stereo heads, with cable pairs connected to the upper pair of pins and lower pair of pins. **139-77** is used with Nortronics mono-combo and certain cassette heads, with cable pairs connected to the right pair of pins and left pair of pins.

PIN CLIPS

The **109-54** is a gold plated beryllium copper push-on clip formed to fit the terminal pins of all Nortronics heads. Lead wires may be soldered easily to the small end of the clip, leaving the larger end open to push on to the terminal pins. Pin clips permit ready attachment or removal of leads to terminals of heads, and also eliminate damage to head caused by soldering leads directly to pins.

PIN CLIP & CABLE ASSEMBLIES

139 SERIES

Provided to make neat and simple electrical connections to the terminal pins of Nortronics heads. Two conductor (No. 26) shielded wire insulated with vinyl jacket, with 109-54 pin clips. Available in 2 lengths, 4 color combinations:

	9 inch	24-inch
Red-Orange	139-55	139-78
Yellow-Blue	139-56	139-79
White-Black	139-57	139-80
Green-Brown	139-58	139-81

ACCESSORIES

CONTACTOR HEAD

MODEL CH3

Use with metal-foil cueing to operate relay. Has two isolated contactor shoes. Model CH3-R-4U has rear mount and 4" leads. Model CH3-N9 is no-mount small-case size. CH3-B3 is base mount.

TAPE GUIDE POST

MODEL 173-13

A universal precision-made guide post for ¼" tape — may readily be mounted to control the path of tape travel. Chrome plated brass insures long life and friction-free operation. Height is readily adjustable by loosening the locking set screw and rotating the threaded post.

CARTRIDGE MOUNTING BRACKETS

MODEL 810-055

MODEL 810-045

Unique head mounting assembly for endless loop cartridge tape handlers (Fidelipac and Viking types). Eliminates awkward mounting and adjustment problems of rear-mount style heads. Offers "Micrometer" adjustments of head height, azimuth, and face perpendicularity. Lock screw on each head bracket "freezes" adjustments.

Heads fastened to bracket with quick-release screw clamp. Replacement time is a matter of seconds when heads are connected with plug and cable assemblies provided with kits.

#810-045 "B" Cartridge-Mount Kit. Up to three heads may be mounted on this assembly, using two no-mount R/P heads of the "A" or "B" size. A small case erase head may be added in the third position on the channel base by means of a #810-044 head bracket. Kit supplied unassembled, includes base channel, four jacks, two #810-042 brackets for the R/P or Combo heads, one #173-16 tape guide fork, and two plug and cable assemblies.

#810-046 "G" Cartridge-Mount Kit. As above, but with two #810-043 brackets for "G" or "T" size mono R/P heads.

#810-055 "B" Two Head Cartridge-Mount Kit. Accommodating two no-mount R/P heads of "A" or "B" size. Vertical back rail and jacks have been eliminated. Connection to the heads may be made by use of the 18" shielded plug and cable assemblies (provided).

#810-056 "G" Two Head Cartridge-Mount Kit. As above, but with #810-043 brackets "G" or "T" size mono R/P heads.

#173-17 Brake-Release Guide — for larger Viking metal cartridges.

UNIVERSAL MOUNTING BRACKETS

MODEL 810-027

SUB PLATE MODEL 123-28

MODEL 810-024

Designed for simplified mounting plus ease in adjustments.

These universal head mounting brackets provide for convenient adjustment of head azimuth height and tilt. Heads are easily snapped in and out of brackets, which are accurately positioned by means of "Micrometer" adjustment screws. Brackets are made of cadmium-plated steel and are supplied with mounting screws and spring—and can be combined with other Nortronics accessories to make various mounting assemblies.

#810-024 Head Nest. Includes bracket, guide posts and mounting plate for "A" and "B" Heads.
#810-027 Bracket. For "A", "B",, and "E" style no-mount heads.
#810-028 Bracket. For "G" size heads.
#810-041 Bracket. For small-case no-mount erase heads.

Amperex INDUSTRIAL AND HIGH FIDELITY Speakers

STANDARD SPEAKER SERIES

Amperex standard speakers offer a wide diversity in characteristics, size, and price for all kinds of radio and television sets, phonographs, tape recorders, sound columns, etc.

Most standard speakers have a flat magnet system of powerful Ferroxdure ceramic. For television sets and other applications where the leakage field should be kept as small as possible, there are Amperex loudspeakers with a Ticonal magnet in a pot system. Due to the use of Ticonal 750 these pot systems are very small.

NOTE: ALL STANDARD SPEAKERS AVAILABLE IN 4, 8, 15, AND 25 OHM IMPEDANCES.

*Ticonal Magnet in pot system

HIGH QUALITY SPEAKER SERIES

The high-quality speakers have been specially designed for use in Hi-Fi equipment, where a high power-handling capacity, a very wide frequency-range and a negligible distortion level are required. Examples of application: acoustic boxes, brass-reflex boxes, juke boxes, Hi-Fi enclosures with or without cross-over network and stereo columns.

NORTON® MAGNETIC HEADS

MULTITRACK

SERIES 2000/7500 — ERASE RECORD PLAY

RESPONSE/FREQUENCY CHARACTERISTIC

The Response/Frequency characteristics above, illustrate the exceptional performance of the Series 2000 thru 7500 Norton Magnetic Heads in direct and digital recording. The upper curves relate to the readback pulse amplitude for RB (return to bias) writing with the digital models and the lower curves relate to the unequalized playback amplitude of the analog models for constant current direct recording, both as a function of frequency (or rep rate). The five standard impedances available, together with the five tape speeds illustrated, total 25 different curves in each group, too many to clearly represent on a single chart. Pairs of inductance and tape speed are selected, which result in a set of curves peaking at the same level and having upper frequency limits proportional to tape speed. Therefore, the 1 mh inductance record/play response is at 120 ips; the 4 mh at 60 ips, and so on to the 250 mh response at 7½ ips. The other inductances are related to each as set forth in the included table. Each curve is at the same mv level as the others and so enables a quick comparison of level, frequency response, and required tape speed to achieve a desired performance goal. To read the curves, first refer to any Series found on the following pages, and note the Typical Operation data and the 0 DB playback reference level in mv rms for direct recording or +12 DB reference level in mv p-p for RB pulse recording. Then referring to the curves, calculate the response obtainable at the inductance and tape speed contemplated.

DIGITAL RECORDING

Selecting the 5500 Series from the following pages for analysis, the 60 mh track for RB pulse recording has a +12 DB reference level of 10 mv p-p at 15 ips. The readback pulse at 15 ips is 10 mv p-p and constant up to a 15 kHz rep rate, equivalent to a 1000 ppi recording density, with a 20 μsec, 3 ma p-p write pulse (rise time 20 μsec). At a faster rep rate of 30 kHz (2000 ppi) at 15 ips and a 10 μsec, 3 ma p-p pulse (rise time 10 μsec) the readback pulse is 5 mv p-p (10 mv less 6 DB) with all pulses present, and 10 mv p-p for an isolated pulse.

Writing and reading at 7½ ips the readback pulse amplitude of the 60 mh track is 5 mv p-p (10 mv less 6 DB) and flat to 7.5 kHz, with a 30 μsec 3 ma p-p pulse (rise time 30 μsec).

Full output is obtained up to a recording density of 1000 ppi with equal pulse on time and rise time at the values shown in the graph below. Operation up to 2000 ppi at reduced read amplitude requires halving these times. Increasing the times will reduce the recording density and readback level, and is not recommended. A better solution is to choose a lower inductance to preserve the recording density capability.

DIRECT RECORDING

Selecting the 2000 Series from the following pages for analysis, the 15 mh track for direct (bias) recording has a stated playback 0 DB reference level of 1.8 mv rms which at 30 ips is at 30 kHz. At 1 kHz the playback level drops to 0.15 mv rms (21 db below 1.8 mv). Operated at 7½ ips its 1 kHz and 30 kHz levels are both 0.15 mv rms (1.8 mv less 12 db less 9 DB). Increasing the inductance to 250 mh would increase the 1 and 30 kHz play level to 0.6 mv rms (1.8 mv less 9 DB) at 7½ ips. It can be seen that the short wavelength response to over 4000 cpi together with a maximum contour effect deviation of ±2 DB from the 6 DB/octave slope permits a useful bandwidth of over 10 octaves at any tape speed, and with the range of inductances available, permits the highest play level consistent with the frequency range of the system.

ERASE RECORD PLAY

STANDARD FEATURES SERIES 2000/7500

Standard features include extremely low crosstalk ratings and +75°C temperature operation without derating, plus a mechanical accuracy permitting hard mount or adjustable mount installation. Rugged solid metal construction, shock and vibration resistant, provides a hard, stable, low friction, long wear surface for the tape. The cores, shields and all metallic members are mechanically and electrically bonded together for effective electrostatic shielding and grounding of static charges. Precision finishing of the recording face to micro-inch tolerance insures intimate contact of the tape with every channel for uniformly excellent response independent of track location.

OUTLINE & MOUNTING DIMENSIONS

TAPE WIDTH	HEIGHT H	MOUNTING HOLES
¼	7/16	4-40 Thread Thru
½	¾	4-40 Thread ¼" Deep Each End
1	1½	

TERMINAL BOARD CONNECTION DIAGRAM

TERMINATION: Silver plated solder lugs on a high temperature glass-epoxy terminal board are standard on all series. Tracks are numbered from 1 through 28 (bottom to top). Start and finish terminal pairs of each track are correspondingly numbered and located as illustrated.

2 TO 7 TRACKS — 8 TO 28 TRACKS

SELECTIVE ERASE HEADS

Multitrack selective erase heads to match the formats of the NORTON Series 2000/7500 units are available. All heads offer erase track widths at least 10 mils wider than the record tracks to insure full erasure. Outline and mounting dimensions are the same, and a standard 1 mh inductance is stock with other impedances available on request.

Erase heads for the Series 2000 and 3500 heads are a single unit with the same number of tracks and track spacing as the record head. Erase heads for the Series 4500 thru 7500 units consists of a pair of heads, each with double track spacing. Odd number tracks are on one unit, and even number tracks on the other.

Catalog numbers for the erase heads have the same Series number as the record head except for the suffix which changes to 1E as in the following example: Catalog #3510-1E is a 1mh erase head for use with the 10 track 1" tape head in the Series 3500.

ORDERING INFORMATION

To specify the complete catalog number for ordering purposes designate the Series number of the head you require, the inductance in mh and the function ie. Record (AR) only, Record/Play (ARP), or Play (AP) only for audio and analog applications: or Record (DR) only, Record/Play (DRP), or Play (DP) only for digital applications, as in the following example: Catalog #4507—15 DP which is the Series 4500, 7 tracks, 15mh Digital Play Head for ½" tape.

TELEPHONE EQUIPMENT

FOR MILITARY and COMMERCIAL APPLICATIONS

SWITCHBOARDS • CENTRAL OFFICE EQUIPMENT • HANDSETS • COMPONENTS • EARPHONE & MICROPHONE ELEMENTS • ACCESSORIES

TELEPHONE SWITCHBOARDS, CENTRAL OFFICE EQUIPMENT AND HANDSETS

We are prime producers of manual and dial military switchboards, central office equipment and versatile handsets for many applications. Telephone facilities from 12 to 1,000 lines can be provided, for up to 160 manual or dial trunks, with our various equipments. Adaptations of standard equipment can be made to specifications.

SB-86/P
Portable, local battery, field type manual switchboard.

Complete, transportable manual telephone central office.

SB-22A/PT
Compact, portable, local battery field type switchboard.

SB-993
Manual telephone switchboard for stacking conference calls.

H-33F/PT
Waterproof handset supplied with U-161/U connector.

TYPICAL TELEPHONE COMPONENTS

Widest Choice Available of Components, Elements and Accessories To Meet All Requirements.

(A) B3001P-1 MICROPHONE ELEMENT. Carbon capsule. Impedance: 40 ohms nominal. Frequency Response: 300-4000 Hz. Temperature Range: −40°F. to +150°F. Adaptable to standard WECO handsets. Made to MIL-M-11095A.

(B) C3001P-10 EARPHONE ELEMENT. Magnetic type. Impedance: 300 ohms nominal. Frequency Response: 300-4000 Hz. Temperature Range: −40°F. to +150°F. Reliable mechanical and acoustical stability. Adaptable to standard WECO handsets. Made to MIL-H-11134D.

(C) D3014-362 REEL & CABLE ASSEMBLY, RETRACTABLE. Accepts various cord types and sizes. Extends cord up to 4 ft. Provides neat, convenient cord storage. Readily applicable for use in telecommunication systems, test equipment, and others.

(D) D3014-318 TELEPHONE SWITCHBOARD MODULE. Shows typical application of Reel & Cable Assembly (—362) for field or stationary switchboards.

(E) B3001-18 BAR SWITCH. Double pole. 1 amp. 30V D.C. contact rating. Instantaneous actuation with nominal pressure at any point on bar. Operating life tested in excess of 500,000 cycles.

(F) C3014-105 THUMBWHEEL SWITCH. Flat, horizontal construction saves valuable panel space. One-finger operation. Permits multi-position, multi-circuit control. Heavy duty contacts mounted on leaf springs.

(G) D3014-76 THUMBWHEEL SWITCH & JACK ASSEMBLY. Shows typical application of switch (—105) with switchboard plug-in jack.

(H) D3014-320 LEVER SWITCH. Exceptionally rugged construction provides greatest operation dependability. Positive detent action. Return spring design reduces contact bounce and chatter. Three-position, multi-circuit contacts available.

(J) C3014-77 SIGNAL INDICATING RELAY. Requires only ¾" dia. panel space. Gives positive indication of relay operation. Combines signal-relay operation in one package. Operable from either of two individual coils.

(K) D3014-38 HOLE-IN-HEAD BINDING POST. Saves space. Provides easy, convenient, positive connection. Wire inserted at front of post instead of side. "PUSH-INSERT-RELEASE" — wire positively locked in place.

(L) B3014-39 CIRCUIT PROTECTOR. Reusable protective device for communication systems. Shorts the circuit to be protected against high voltage surges. Factory adjustable to break-down voltage required.

(M) B3014-54 BATTERY BLOCK. Provides convenient storage and method for connecting two "D" size cells into circuit.

(N) G-42A/PT HAND RINGING GENERATOR. Used for ringing field telephones. Centrifugally operated switch operates at a crank speed of about 140 rpm. The generator delivers 100 volts at 20 cycles at a crank speed of 200 rpm.

MITSUMI COMPONENTS

We have a wide range of standard products for electronic components effectivity, and most of them meet or exceed your specs. They are available off the shelf. Shown here is only a representative sampling of our products. When you need, reliable and dependable components, Ask For Mitsumi. We will provide anything you wants.

UHF TV Tuner
All-transistor construction provides extremely low power consumption and spurious radiation well below both European FTZ and United States FCC standards, something which is extremely difficult, if not impossible, to attain with vacuum tube systems. Frequency drift is held to a minimum through the use of temperature compensation and an adjustment-free variable capacitor. Wide range of types available, from standard models to high performance color TV models.

VHF TV Tuner
Revolutionary new VHF tuner with switch plus built-in IF amplifier and AGC (automatic gain control). These tuners feature easy adjustment extremely small local oscillator drift, superb S/N ratio, and unmatched electrical and mechanical reliability. Wide range of types from standard models to high performance color TV models to choose from.

FM Tuner
Mitsumi FM tuners employ all silicon transistors and feature compact size, lightweight, and excellent temperature and humidity characteristics. Amplification and S/N ratio are, of course, excellent. Moreover, use of a special RF circuit and high Q IFT provide unparalleled selectivity. Metal case and specially designed circuit reduces spurious radiation to an absolute minimum.

FM Multiplex Adapter
Noise, as well as erroneous operation due to noise, have been completely eliminated by the use of a special bias circuit.
Separation greater than 25dB between 300Hz ~ 4kHz and greater than 20dB at 10kHz. Temperature characteristics and S/N ratio are also excellent.

Car Tuner
Easy to operate pushbutton system. Silicon transistors and printed wiring, as well as Mitsumi developed high Q IFT and other high reliability components provide superb electrical, temperature, and mechanical characteristics. Simple, semipermanent mechanism. No drift even when subjected to shock and vibration.

Hybrid IC
Consisting of a high reliability transistor switch and stable elements sintered onto an alumina substrate, these hybrid IC are perfect for use in linear circuits, DC constant voltage circuits, and digital circuits.

Cds Photoconductive Cell
Sintered film type Cds features small variations in light sensitivity and extremely small light resistance.
Spectral wavelength corresponding to application. Television camera, automation equipment types are available.
Moreover, photoconductive cell-lamp composite element, light source-light receiver composite types are also available.

Micromotor
Original magnetic circuit, bearings, rectifier, and mechanism not only eliminate starting troubles but also assure stable operation, long life, and superb temperature and humidity resistance.
Ideal for cassette recorders, car stereo, and other acoustical products as well as 8mm cameras, all types of servos, automation equipment, and other applications.

Synchronous Motor
Extremely small induction type multi-pole synchronous motor incorporating magnets in the rotor.
Mitsumi synchronous motors boast extremely fast response and powerful rotating torque dispite their small size. Rated voltage 100V, speed 1, 15, 1000 rpm.

PRODUCTION ITEMS
Thick Film ICs, UHF & VHF TV Tuners, Front-end FM Tuners, Push-button Tuners, IF Transformers, Various Coils, Polyethylene Variable Capacitors, Magnetic Heads, Micromotors, Synchronous Motors, CdS Photoconductive Cells, Trimmer Capacitors, Semi-fixed Resistors, Switches, Terminals, Fuse Holders, Small Mechanical Components.

Polyvaricon
Polyvaricon is an extremely small variable capacitor developed through our unrelenting research and consists of a variable capacitor with a highly inductive polyethylene film inserted between the stator and rotor.
The polyvaricon features high resistance to howling and superb Q. AM use, FM use, AM. FM use, and a wide variety of other types are available.

Trimmer Capacitor
BC, SW, FM radio receiver, high quality radio, communications equipment, and measuring instrument types are available. The use of a polycarbonate and steatite base provides unexcelled Q. Linear capacitance change facilitates use. Superb heat resistance and no changes due to aging.

IF Transformer
Low-cost, high reliability coils produced by automatic production techniques employing a fully automatic winder developed through Mitsumi's unmatched technology. AM use, FM use, TV use, and other general use IFT are available.

Various Coils
Excellent Q, wide inductance variation range, and excellent temperature characteristics. Radio antenna, OSC, IF detector pack, television, and a variety of other types, all boasting compact size and light weight, are available.

Magnetic Head
Twenty standard 8-track and 4-track types are available for stereo, cassette, monaural, and other applications. Uniform, stable quality is assured through the use of new materials and Mitsumi's unique precision machining techniques.

Switches
Permanent, low contact resistance, super insulation resistance switches produced under rational quality control conditions.
See-saw switches, toggle switches, slide switches, wire switches, snap switches, snaction switches, and a host of other types are available.

AMP gives you the and Data Entry

CARD READER (GI/161/261)

- low cost matrix badge card reader
- small size makes it especially adaptable to applications with limited space
- reads 10 columns of a 15-column card, 15 columns of a 20-column card or 17 columns of a 22-column card
- available cross matrix for numeric data, matrix alpha-numeric, or telephone dial code

READER/IMPRINTER

- reads punched holes and imprints embossed data from credit cards
- imprints on command after data is read or completes cycle without imprinting
- imprint area has maximum position flexibility
- accommodates many form sizes such as manifold tab card sets as well as large sales slips

CREDIT VALIDATION TERMINAL

- used to selectively imprint a document based on computer decision
- uses punched and embossed card for account number input and imprint
- slide switch used for variable data and rotary matrix switch used for fixed data
- available for interface, touch-tone, teletype, or USASCI II codes

MATRIX ROTARY SWITCH

- direct visual display
- positive detent action
- wide selection of sizes
- economy achieved by integral interwiring

MATRIX SLIDE SWITCH (Without visual display.)

- standard sizes—5-slide by 10-positions, also 5 x 16, 10 x 10 and 10 x 16
- positive detent positioning
- completely solderless wiring interface
- available decimal and hexadecimal codes

MATRIX SLIDE SWITCH (With visual display.)

- standard sizes—5-slide by 10-positions, also 5 x 16, 10 x 10 and 10 x 16. Special sizes available on request
- positive detent positioning
- small, compact—takes up minimal space
- ⅛″ high characters

most in Programming Devices

. . . Everything you need for computer input, process control, machine control, test programming, production control, status indication and access control.

DATA ACCUMULATION TERMINAL

- used to transmit information contained in cards—variable data such as quantity and fixed data
- communicates to incremental magnetic tape, paper tape or communications controller
- available with modems for bit-serial teletype compatible or character serial touch tone
- simplified DC level systems and multiplexers optional

LOW CAPACITANCE SHIELDED PATCHCORD PROGRAMMING SYSTEMS

- three standard sizes—960, 1920 and 3840
- spacing .375″ centers
- designed for applications with signals in the KC and low MC frequency range

COAXIAL PATCHCORD PROGRAMMING SYSTEMS

- .375 x .270 spacing
- three standard sizes—506, 1012 and 2024
- low crosstalk—60db to 100 MHz
- individual coaxial contacts

STANDARD PATCHCORD PROGRAMMING SYSTEMS

- choice of sizes—240, 480, 816, 1224, 1632, 1768, 3264 and 4896 holes
- versatile rear bay wiring
- post patch capability
- double wiping action for reliability
- variety of patchcords and accessories

PINBOARDS

- available in many standard sizes. Special designs on request
- low cost color coded shorting pins
- machine applied terminations
- silk screened or engraved to customer requirements
- diode pins available

DATA ACQUISITION SYSTEMS

DATALOGGING SYSTEMS FROM STOCK UNITS. ASSEMBLED TO CUSTOM REQUIREMENTS

The Dataloggers accept multiple analog signals, from physical transducers, such as thermocouples, strain gauges, and similar devices. These are scanned by a multiplexer and programmer, individually conditioned to the appropriate voltage level; digitized, converted to computer compatible format and recorded.

SIGNAL

TAPE

SERIES M

This datalogger is available with either 10, 100 or 1000 channel multiplexer capability, digitizing and recording in computer compatible magnetic tape. The tape format can be either straight binary or binary coded decimal, 7 or 9 tracks and 200, 556 or 800 b.p.i. The system speed can be from manual push button to 1000 characters/second asychronous or up to 5000 characters/second in the slew mode.

SERIES P

This datalogger is available as the above, but the output is recorded in computer compatible paper tape, such as ASC11. The system speed is 20 characters/second as standard and up to 120 characters/second as options.

SERIES T

This datalogger is available as the above, but with teletype output. The teletype gives both punched paper tape output in the ASC11 code and also a line printer. The teletype includes a keyboard for manual input data and can be used for computer input. Speed is controlled by the teletype at 10 characters/second.

SERIES K

This datalogger is available as above, but with output onto magnetic tape cassettes. The format is compatible with teletype and the cassettes can be read out onto teletype machine or over a datalink to a shared time computer.

SERIES C

This datalogger is available as above, but controlled from a small computer, which can perform on line computation and read out onto all forms of output devices, such as magnetic tape, paper tape, and teletype. Memory is 4096 words and can be expanded as required.

OPTIONS

Many options and additions are available from stock units to expand the capability of the systems. Other options are available from the more than 1000 different logic modules used in our special designs.

DATALOGGER COMPONENTS

The full range of components used to build up the datalogger systems are available as individual products. Each designed for ease of interface with individual powers supplies, pin board programming and DTL or TTL compatible logic levels.

MULTIPLEXERS - SERIES - 012

Both reed relay scanners and FET multiplexers from 10 channels to 1000 channels are available as standard. Using a unique modular design, the multiplexers can be built up from a wide range of modules to give 1, 2, 3 or 4 wire switching. Features include low thermal switching, high common mode rejection, switched guard, flying capacitor filtering, and programming.

A/D CONVERTERS - SERIES - 013

These converters have been designed as system components and are available as either binary or decimal units. Conversion speed is 10 Kc compatible with either reed relay or solid state multiplexing.

Standard units available include:

Model 013-012 — 3 decimal digits plus sign.
Model 013-121 — 4 Decimal digits plus sign.
Model 013-123 — 5 Decimal digits plus sign.
Model 013-112 — 11 Bit binary plus sign.
Model 013-111 — 12 Bit binary.

DIGITAL CLOCKS - SERIES - 015

This clock has been designed not only as a visual display of time, but also to be easily integrated into the data handling systems. All inputs and outputs are buffered TTL or DTL compatible logic levels.

Model 015-016 — Days, Hours, Minutes and Seconds
Model 015-017 — Hours, Minutes and Seconds

UNIVERSAL CONTROLLER COUPLERS

These units have been designed to control the overall system and also to serialize parallel data into computer compatible format. The Coupler has plug-in modules to drive output devices such as punched card, paper tape, magnetic tape, teletype and computers. It is also pin board programmable for control functions and computer format, and front panel controls for word length, record length, recycle point and cycle time.

ANADEX DIGITAL/ANALOG BUILDING BLOCKS

The next time you have a digital/analog application, call Anadex. Anadex Instruments not only puts together the finest digital/analog instruments at prices that make sense, but also has the capability of putting them together in a system. For immediate reply to your digital/analog system application, call (213) 873-6620.

ANALOG DEVICES INC
PASTORIZA DIVISION

• Data Conversion Modules
• D/A, A/D Converters
• Sample/Hold Amplifiers

The Pastoriza Division of Analog Devices offers a wide variety of data conversion modules. These include analog-to-digital converters, digital-to-analog converters, sample-and-hold amplifiers, analog switches, etc. Comprehensive catalogs, evaluation samples and information on newly developed products are available upon request from Analog/Pastoriza or your local Analog Devices sales office.

A/D CONVERTERS

ADC-U SERIES The ADC-U Converter is a low cost model especially designed for OEM applications. This unit features open card design built around the MINIDAC. All components are accessible for repair or replacement. ADC-U is pin-compatible with the ADC-T series.

Resolution:	Up to 12 bits
Input Range:	0 to +10V, ±5V, ±10V
Speed of Conversion:	12 bits in 10μsec, 10 bits in 6μsec, 8 bits in 4μsec
Price:	$775. (12 bits)

ADC-F SERIES The ADC-F is a very fast successive-approximation converter requiring only one microsecond for the total conversion with 10 bits resolution. It is pin-compatible with the ADC-U and ADC-T Series for upgrading existing designs.

Input Range:	0 to +10V, ±5V, ±10V
Total Conversion Time:	100 nanoseconds per bit ±10%
Resolution:	Up to 10 bits
Output:	10 parallel bits TTL compatible
Price:	$1990. (10 bits)

SAMPLE/HOLD AMPLIFIERS

SHA I, SHA II Sample and Hold Units are used to strobe (sample) changing input voltages at an exact time and to hold the value at the output for an indefinite period. The SHA Models I and II are used as high-speed, resolution A/D Converter input signal conditioners. The SHA I is designed for the standard ADC-T and ADC-U Converters. The SHA II is especially designed for the ADC-F high speed Converter and features a 10-nanosecond-aperture strobe time.

	SHA I	SHA II
Input Range:	±5V, ±10V	±5V
Slew Rate:	50V/μsec	50V/μsec
Aperture Time	< 100nsec	10nsec
Leakage Rate:	1mV/msec	125mV/msec
Price:	$225	$350.

SHA III, SHA IV The models SHA III and SHA IV are modular, low priced sample and hold amplifier modules specifically designed for general purpose applications requiring extremely good hold characteristics over relatively long periods of time. Data distribution systems to drive meters, recorders, etc. from D/A converters are typical applications. SHA IV is optimized for low switching transients.

Gain:	+1, ±0.01%
Linearity:	±0.005%
Input Impedance	
Sample Mode:	100MΩ
Hold Mode:	20KΩ
Decay Rate:	10mV/sec
Price(SHA III, SHA IV):	$95/120

D/A CONVERTERS

MINIDAC MDA-L is a unique miniature potted module for printed circuit card mounting. It contains a 12-bit switch system, resistor networks, and a reference supply which provides up to 12-bit digital-to-current conversion. The output current can be used directly into a resistor for up to 2 volts output or may be fed to the summing point of an operational amplifier

Settling Time:	200 nanoseconds to 0.05%
Resolution:	Up to 12 bits binary or BCD
Output Range:	0 to 2mA
Input Signals:	Compatible with DTL or TTL inputs
Price:	$195. (12 bits)

DAC-T SERIES The DAC-T Series is essentially a MINIDAC mounted on a printed circuit card, with a digital buffer register and protected output amplifier, to provide a complete digital-to-voltage converter. It provides a variety of output voltage ranges, including bipolar operation. The many options permit the customer to purchase a converter, essentially off-the-shelf, to meet his exact requirements at minimum cost.

Resolution:	Up to 12 bits binary or BCD
Settling Time:	Medium or high speed options: 20μsec to < 0.1% or 2μsec to < .01%
Output Voltage Range:	0 to +5V, 0 to +10V, ±5V or ±10V
Input Signals:	DTL or TTL compatible
Price:	$355. (12 bits)

DAC 10-H This completely self contained 10 bit D/A converter costs just $55 in 100 quantities and includes DTL/TTL compatible input switches, resistor ladder network, precision reference and output amplifier with tracking gain resistors.

Resolution:	10 bits binary
Accuracy:	±½LSB (0.05%)
Settling Time:	20μs to .05%
Linearity:	±½LSB
Price:	$75.

DAC-15R The new DAC-15R is a fast 15 bit high resolution digital-to-analog converter for high accuracy applications. Completely self contained on a single printed circuit card, the DAC-15R includes input storage register, precision reference supply, solid state switching network and output amplifier.

Settling Time:	1μsec (Fast version)
Resolution:	15 bits binary
Linearity:	±0.0015% (±½LSB)
Overshoot:	< 1 LSB (Stable version)
Temp. Coeff:	±7ppm/°C
Price:	On request

MICRODAC The MICRODAC Model AD550 monolithic quad current switch consists of four logic-operated switches and their associated circuitry, all on a single monolithic chip. When connected with precision resistors and reference circuitry, it can be used to form D/A and A/D Converters having 12-bit accuracy, with unipolar or bipolar binary resolutions of 4, 8, and 12 bits, or BCD resolutions of 1, 2, 3, or 4 digits.

Accuracy:	12 bit over −55°C to +125°C
Logic:	TTL, DTL, RTL Compatible
Package:	Hermetic flatpack or dual in-line
Settling Time:	1 μsec
Price:	On request

ANALOG DEVICES, INC. · 221 Fifth Street · Cambridge, Massachusetts 02142 · (617) 492-6000

Analog to Digital Converters

Multiplexed Analog to Digital PCM System

Astrosystems solid state Multiplexed PCM System is a 50 channel data acquisition system which converts synchro and linear AC inputs to a serial PCM output for data recording and/or telemetering. The basic unit provides a resolution and accuracy of 15 binary bits (.003%). Signal conditioning modules are provided for all inputs, with typical characteristics of 13 megohms input impedance and 80 db common mode rejection. The basic system includes power supplies, signal conditioners, multiplexer, converter and PCM code conversion. Write for Data File No. 109.

Digital Angle Readout

Astrosystems Digital Angle Readout is a simple, reliable and accurate device for converting synchro and resolver input angles to a direct in-line decimal display and electrical digital format. Guaranteed accuracy is 0.01° *peak* error from all causes. The standard model accepts either synchro or resolver inputs at 11.8, 26 or 90 volts line-to-line. Both the visual and electrical outputs continuously track the synchro input. Write for Data File No. 110.

Synchro to Digital Converters

Astrosystems high accuracy Synchro to Digital Converters convert angle inputs from synchros to an equivalent binary or BCD output. Resolutions from 12 to 18 binary bits are available. Accuracy is ±1 bit total peak error including digitizing errors. Converter operation is ratiometric using toroidal transformers which make the units insensitive to transformation ratio and phase shift variations as well as harmonic distortion and noise. Write for Data File No. 101.

Multiplexed Synchro to Digital Converter

Multiplexed Synchro to Digital Converters feature a high accuracy ultra-reliable method of converting multiple synchro and resolver inputs to parallel or serial digital outputs. The converters are completely solid state and have a basic accuracy of 16 binary bits (20 seconds of arc). The units are insensitive to wide variations in input voltage and frequency. Write for Data File No. 109.

Digital to Analog Converters

Airborne Digital to Analog Converters

Airborne solid state Digital to Analog Converters feature high reliability, high density packaging and low power consumption. Units are available to provide synchro, resolver or AC output signals to a resolution and accuracy of 16 binary bits. A full range of standard card and circuit designs are available to enable quick delivery of special units. Converters meet the requirements of MIL-E-5400 for airborne equipment. Write for Data File No. 103.

Shaft Angle Encoder

This unique solid state Shaft Angle Encoder is a completely self contained system for transforming shaft rotations into a direct decimal visual display and a digital output capable of feeding computers, printers and various types of off-line equipment. A magnetic transducer is used for long life and high reliability. Angle measurement is absolute, not incremental, to high resolution and accuracy. Write for Data File No. 114.

Multichannel Digital to Analog Converter

Multichannel solid state Digital to Analog Converters provide AC and/or DC voltage output signals proportionate to a digital input. Units feature 15 bits resolution and accuracy. The DC as well as the AC outputs are floating and completely isolated from each other as well as from the digital inputs. Standard interfaces are available to match most computer and peripheral equipment interfaces.
Write for Data File No. 102.

Digital to Synchro Converters

Digital to Synchro Converters accept and register digital angles in binary or BCD code and convert these inputs to an equivalent synchro or resolver output. Standard models are available to operate as synchro transmitters (CX) or synchro control transformers (CT). Accuracy and resolution to 18 bits is obtained through the use of tapped high precision toroidal transformers to derive the required output voltages. Write for Data File No. 102.

Special Purpose Converters

Digital Angle Indicator

A solid state all electronic device for measuring and displaying angle inputs from remote synchro or resolver inputs. Large inch-high characters on NIXIE® tube readout provide higher visibility and readability than servo drum dials. Accepts synchro or resolver inputs at 11.8, 26 or 90 volts line-to-line. Four decade BCD digital output is available for driving off-line equipment without adding decoder. Write for Data File No. 115.

Synchro to DC Converter

A miniature solid-state light weight unit that transforms a 3-wire synchro or 4-wire resolver input to a linear DC output proportional to the equivalent input angle. Output is completely smooth over the entire 360° angular range and is without transients, even at cardinal points. Suitable for applications in servo system testing, general computer use, or any other area where precise angle indication is required. Write for Data File No. 121.

Commercial Units

These miniaturized, light weight, high accuracy solid state converters on cards, both Synchro-to-Digital and Digital-to-Synchro, are contained on standard 5 x 8 inch printed circuit cards. Considerably smaller, less expensive and lighter in weight than equivalent conventional units, they fit into standard mounting racks and can be incorporated into existing systems without special interfaces. Ideally suited for incorporation into large process control and computer command systems. Write for Data File Nos. 125 and 126.

Multispeed Converters

Ruggedized, portable, all solid state units that convert multispeed or single speed synchro or resolver inputs into six-digit decimal visual displays and BCD (8-4-2-1) electrical outputs. Accept 1x, 36x or 1x and 36x inputs. Accuracy and resolution to 001°. Voltage inputs 11.8 volt, 26 volt or 90 volt line to line. All synchro conversions performed on ratiometric basis using high precision tapped toroidal transformers as the basic measuring element. Write for Data File No. 201.

Modular Plug-in Components, Commercial or Mil Specs

FUNCTION	MODEL	INPUT	SAMPLING-ENCODING RATE (MAX.)	RESOLUTION/ ACCURACY	GENERAL
A/D - Binary (BCD Optional)	AD4100 (Airborne) AD5100 (Ground)	Single (or multiplexed) unipolar or bipolar voltage, 0 to 5V. Includes sample and hold.	1,000 (10,000 optional)	8 - 13 bits/ ± .025%	Binary, offset binary or sign and magnitude. Absolute or ratio encoding. External or internal reference.
Multiplexer-Analog	MX4100 (Airborne) MX5100 (Ground)	High or low level, single ended or differential. Includes guard circuits. >10 megohms (FET) inputs. AC or DC signals.	>10,000	± .025%	Binary address random sampling, any number of channels. High common mode rejection, low cross talk. Low level inputs require SC4100/ 5100 Amplifier with A/D Converter.
D/A - Bipolar (Binary)	DA1000 (Airborne) DA2000 (Ground)	External AC or DC reference of ±5V peak to operational amplifier. (Internal DC reference available.)	25,000	12 bits	Output equals input X binary multiplier (to ±5V) from operational amplifier (±5 ma. max.).
S/D - Shaft Angle (Sampling)	SD1200 (Airborne) SD2200 (Ground)	Multiple synchros or resolvers, single or dual speed, any number of inputs.	800	13 bits/ ± 6 min.	Binary, BCD, or combined dual-speed codes.
S/D - Sin/Cos (Sampling)	SD1300 (Airborne) SD2300 (Ground)	Multiple synchros or resolvers, single or dual speed, any number of inputs.	400	13 bits/ ± 6 min.	Binary, encodes ratio of Sin/ Ref and Cos/Ref.
S/D - Shaft Angle (Tracking)	SD1400 (Airborne) SD2400 (Ground)	Single channel, synchro or resolver, to 1000°/ sec or higher.	Continuous	13 bits/ ± 6 min.	Binary, BCD, or combined dual-speed codes.
D/S - Sin/Cos	See DS1100 and DS2100	Binary Sin/Cos codes, plus AC reference.	25,000	12 bits	Same options as DS1100/ 2100.
D/S - Shaft Angle Transmitter (CX)	DS1100 (Airborne) DS2100 (Ground)	Binary angle code plus AC reference (50-400 Hx). Single or dual speed types.	25,000	12 bits/ 0.1°	Output 11.8/90V rms, isolated three wire, current limited to 400/50 ma. rms, short/open circuit proof.
D/S - Control Transformer (CT)	See DS1100 and DS2100	Binary angle code and single speed synchro signals.	25,000	12 bits/ 0.1°	Output single AC signal to drive servo amplifier.
D/S - Control Differential (CDX)	See DS1100 and DS2100	Binary angle code and single speed synchro signals.	25,000	12 bits/ 0.1°	Output 11.8/90V rms, isolated three wire, current limited to 400/50 ma. rms, short/open circuit proof.
Linear Sweep Resolver	See DS1100 and DS2100	Linear sweep voltage, 0 to +5V, up to 1 kHz rep rate, into operational amplifier.		12 bits/ 0.1°	X-Y output signals for cathode ray tube deflection amplifier inputs.

Settling Time	10 μsec	12 μsec	20 μsec	50 μsec

±35 VOLT DEFLECTION AMPLIFIERS

The models DA223, DA224 and DA225 are dc-coupled, all-silicon, solid-state modular packages capable of supplying up to ±2.0, ±4.0 and ±6.0 amperes of deflection current respectively to each axis of a directly-coupled deflection yoke. A unique method of damping optimizes the amplifier for the particular yoke being used by means of an adjustable potentiometer. The amplifiers also feature extremely fast settling time and high bandwidth. The user has the choice of operating the amplifiers Class A for achieving nonlinearities of ±0.02% maximum or Class AB for minimum power consumption.

MODULAR CRT BUILDING BLOCK COMPONENTS

Individual, compatible plug-in circuits such as: DF2050 Dynamic Focus Generator; DF347 Electromagnetic Dynamic Focus Amplifier; DF2496 Electrostatic Dynamic Focus Amplifier; LC2656/2676 Precision Linearity Correction Circuit; VA2076 Video Amplifier (10 MHz); VA2075 Gamma-Corrected Video Amplifier (10 MHz); VA2769 Video Amplifier (10 MHz, 60 volt output); VA2077 Video Amplifier (30 MHz); SG1190 X-Y Sawtooth Generator; PP529 Phosphor Protection Circuit; DA341 Deflection Amplifier (±200 ma); DA1340 (±.75 amperes); EDA800 Electrostatic Deflection Amplifier (350 volts plate-to-plate positive or negative); EDA1504 Electrostatic Deflection Amplifier (500 volts plate-to-plate positive or negative); FR1882 Static Focus Regulator; BA1714 Blank/Unblank Amplifier. All Beta circuitry features silicon semiconductors and temperature stable metal-film resistors throughout.

HIGH & LOW VOLTAGE CRT POWER SUPPLIES

SERIES HV provides regulated high voltage outputs for CRT electrodes — anode, focus grid, G2 and filament.

Model No.	Anode Output Range
HV8	1-8 kv
HV15	5-15 kv
HV25	15-25 kv

SERIES PAK provides regulated low voltage outputs for Beta modules — ±35 volts, ± 20 volts, G1 and filament.

Model No.	±35 volt (deflection) Output
PAK16	16 amperes

PRECISION TUBE AND COIL MOUNTS

Flexible combinations of standard assemblies for the precision mounting and alignment of CRT's, yokes and coils: CRTM Basic CRT Mount includes removable bezel, rods and neck end clamps; DSTM Dual Gun Recording Storage Tube Mount, includes rods and neck clamps both ends; MCM Micropositioner Coil Mount allows 6 independent motions and positive lock; FYM Fixed Yoke Mount for application where micropositioning is not required; FYMS Fixed Yoke Mount for servo-type mounted yokes; CCM Centering and/or Alignment Coil Mount; MS983 Magnetic Shield Enclosure.

Burroughs Computer System Components

Magnetic Tape Transports

Free-standing Units.

Several models are offered to meet various tape speed requirements. Bi-directional units operate up to 120 inches per second. All models feature gentle tape handling, end-of-tape sensing, fast start/stop, remote and local control, easy threading and dust-free operation. Packing densities up to 800 bits per inch; transfer rates up to 72 KC per second.

4-station "cluster" Units.

Unique Burroughs design permits four tape drives to share common electronics and cabinetry. Compact, economical, easy to use. Uses 7 or 9 channel tapes, or both. Packing densities up to 1600 bits per inch; transfer rates up to 36KC per second.

Line Printer

High speed drum printer offers 64 alphanumeric and special characters, prints 132 characters per line. Features a 132-character print buffer, plus immediate access print cycle. Handles multipart forms 5 to 20 inches wide. Available in 700 and 1040 line per minute models.

On-Line Disk File

Full electronic switching via individual, fixed read/write heads provides very high speed access to every disk address regardless of total capacity. Fast, flexible, and fully proven. Individual modules available in 16-, 80- and 160-megabit capacities, with transfer rates up to 9 megabits per second. Expanded systems of up to 100 modules are possible dependent upon control unit.

Punched Card Reader

This reliable, high speed Burroughs reader handles short cards as well as standard 80-column cards. Features photoelectric reading and positive strobing of each card column. Unit shown reads 1400 cards per minute. 475 and 800 cpm models also available.

New Low-Cost Card Reader! Operates at 300 cpm flow mode, and 200 cpm demand mode. Same reliable photoelectric reading principle as higher speed units. Reads standard 80-column cards with strobe output for each card column.

Card Punch

300 card per minute punch features magnetic core buffer, solid-state echo check punching verification, low maintenance. Unit may be loaded or unloaded while operating; can idle indefinitely without card damage. 3 program-selected stackers.

Manual Tape Punch

A precision unit for adding information to an already prepared tape. Fast, easy, and accurate. No need to reinsert the tape in the main perforator. Accommodates standard Teletype and Commercial Control Flexowriter tapes. Corrects up to an 8-hole code. Tape slips in easily, and is held in perfect registration.

Decimal Keyboard

A modestly priced, versatile input device adaptable to a wide variety of data processing and communications systems.

A compact 13-key unit with a featherlight touch for high speed indexing.

Whatever your requirements for

TIME CODE EQUIPMENT...

Look to Chrono-log

Series 30,000

INTEGRATED CIRCUIT CLOCK/CALENDARS

Meet specific system needs at off-the-shelf prices

Applications
Wherever a digital output of real or elapsed time is required such as data logging, data transmission, data processing, time display, telemetry and digital printout systems.

Versatility, at low cost
Over 7,000 standard configurations available to meet specific system requirements at off-the-shelf prices which are less than the prices of electromechanical clocks. Use of common interface wiring and logic levels save you the costs of making engineering and documentation changes from one application to the next. Options include:

- BCD or NIXIE-type front panel displays
- Outputs of hours, minutes and seconds or other time ranges
- Day-of-the-year or month-and-day calendars
- Parallel and/or serial outputs
- Commercial or military temperature ranges
- A variety of internal or external time bases
- Various power supply inputs

System compatibility
Use of TTL monolithic units, DTL and TTL circuits provide the optimum characteristics for clock applications, permitting simple interface with the most popular integrated circuit families. Chrono-log clock circuits are extremely reliable and provide excellent noise immunity.

Small size
Measures only 1¾ in. high, 9½ in. wide (half rack), and 8¾ in. deep.

For complete details request Bulletin 30,000.

OTHER CHRONO-LOG TIME CODE EQUIPMENT:

Time Code Generators—for recording, telemetry, range timing and other real time systems using IRIG, NASA, Vela or other time code formats. Both parallel outputs and serial modulated carrier outputs are provided for analog magnetic tape recording systems. Ask for Bulletin 4,000.

Low Power Time Code Generators—for field and airborne systems. Operate up to 60 hours from internal standby batteries. Internal oscillator has stability of 2 parts in 10^9 per day. Ask for Bulletin 26,000.

Time Code Readers—accept serial time code input in forward or reverse direction, fast or slow speed. Available for a variety of time codes or in universal multi-code models. Displays time reading and produces parallel and serial outputs of time for data processors, graphic recorders and other data devices. Ask for Bulletin 5,000.

Automatic Tape Search Control—controls tape drive to search for data at high speed and play back selected portions of recording. Provides front panel selection of start and stop times. Eliminates manual searching and playback. Ask for Bulletin 6,000.

Whatever your requirements for time code equipment, look to Chrono-log to fulfill them. For more information, contact your local Chrono-log field engineer or write us directly.

OVER 6 MILLION analog connections a second;

The Computer Labs Model MUX-810 Multiplexer will connect eight analog inputs to a single output at a rate of 6.6 million connections every second. Channels can be connected sequentially, with any number in the sequence; random access; or manually, with a front panel push button. **Equivalent "ON" resistance is 0.2 ohm, making the Model MUX-810 an ideal choice for switching 100-ohm lines.**

INPUT CHANNELS: 8 Can be switched sequentially (any number); random access; or manually, with push button	LOGIC LEVELS: "1" = +2.5 V to +4.5 V "0" = 0.0 V to +0.5 V All loads 50 ohms or greater
INPUT VOLTAGE RANGE: 2.2 V P-P max. (−1.1 V to +1.1 V)	LOGIC INPUT IMPEDANCE: 100 ohms
DC ACCURACY: ±2 mV (Max. difference input to output)	CHANNEL INPUT IMPEDANCE: 1000 ohms in parallel with 20 pF
LINEARITY: 0.05%	CHANNEL BANDWIDTH (−3 dB): 15 MHz min.
DC OUTPUT IMPEDANCE: 0.1 ohm	CHANNEL CROSSTALK (@ 5 MHz): −60 dB
SETTLING TIME: ±10 mV of final value = 150 ns ± 5 mV of final value = 400 ns	POWER: 120 V ±5%; 300 mA PRICE: $2,400

COMPUCORD computer system cassettes

Compudette 1100

The "true industrial" cassette loaded digital tape transport dieally suited for OEM applications. The Model 1100 is the most versatile recorder of its kind and it is priced well below any comparable equipment.

Read/Write Speed:	5 ips bidirectional incremental/continuous
Speed Accuracy:	±2%
Packing Density:	500 bpi or 1000 bpi
Start/Stop Time:	20 milliseconds
Rewind Speed:	80 ips
Transfer Rate:	5,000 bps (5KHZ)

Compudette 1200

Built around the Model 1100, this unit provides a complete electro-mechanical tape system that accepts parallel word input up to 32 ibts in length. The only true incremental/continuous recorder available.

Data Input/Output:	Parallel lines 5 to 32
Data Advance:	Pulsed input for incremental or held @ 1 for continuous
Inter-record Mark:	Input of 1 generates inter-record mark
End-of-file Mark I/O:	Input of 1 generates inter-OEF mark
Load Point Search:	Input of 1 causes tape search for BOT mark
BOT/EOT Sensing:	1 output
Error Correction:	DataRite corrects single bit errors on character by character basis
Logic Levels:	DTL or TTL compatible

COMPUCORD INC.

Compudette 1400

The Model 1400 provides three transports in a 19-inch panel. They are such that one can be inputting data while one or both of the other transports are outputting data or performing any of the other functions.

Data Input/Output:	Parallel lines 5 to 32
Data Advance:	Pulsed input for incremental or held @ 1 for continuous
Inter-record Mark:	Input of 1 generates inter-record mark
End-of-file Mark I/O:	Input of 1 generates inter-OEM mark
Load Point Search:	Input of 1 causes tape search for BOT mark
BOT/EOT Sensing:	1 output
Error Correction:	DataRite corrects single bit errors on character by character basis
Logic Levels:	DTL or TTL compatible

Data Sense 5000

A multi-purpose data terminal capable of operating as a complete independent processor. The DS 5000 allows the user keyboard insertion on digital magnetic tape, visual display, and digital magnetic tape recording at low system cost.

Character Set:	26 Alpha, 10 Numeric, 8 Punctuation, 18 Symbols, displayed on video screen
Video Display Size:	16 square inches
Memory System:	MOS Recirculating tape storage (DataRite circuit)
Code Internal:	ASCII
Tape Control:	Forward/Reverse (read, write, search) EOF, Inter-record code
Record Length:	Variable 0-400 characters

COMPUCORD INC. 225 Crescent Street, Waltham, Massachusetts 02145 617/891-0080

MODERN VALUE-ENGINEERED PRODUCTS

DISPLAY MODULES

The DM500 and DM600 Series are self-contained, plug-in decimal display units. The DM500 Series use Amperex gas discharge type indicator tubes and the DM600 Series use the **RCA NUMITRON** 7-segment indicator tubes. Both series are available with decade counter, decoder/driver and quad latch storage register. All models plug into a standard 15-position (0.156" spacing) connector. The indicator tubes provide numerical readout from 0 to 9 including decimal point. **AN ATTRACTIVE BEZEL AND MOUNTING CHASIS IS AVAILABLE.** Single quantity prices start as low as **$25.90.**

A/D Converter

D/A Converter

DC POWER SUPPLIES

The PM400, 500, 600 and 700 Series Regulated DC Power Supplies offer a total of 73 models with output voltages ranging from 3.6 to 180 VDC. The PM400, 500 and 600 Series have power outputs of less than 2 watts. The PM700 Series offer 5, 15 and 180 VDC supplies with up to 18.9 watts power. The PM800 Series Unregulated DC Power Supplies offer six models with output voltages from 5 to 45 VDC and output currents up to 440mA. Single quantity prices for the PM400, 500 and 600 Series start at **$25.95.** The PM700 Series start at **$31.95** and the PM800 Series start at **$16.80.**

Display Modules

A-TO-D CONVERTERS

The AD300 Series offers 14 standard models providing binary or BCD output code with 8, 10 or 12 bit binary resolution or 12-bit BCD resolution. Bipolar inputs of +4V to −4V or +10V to −10V are standard input configurations. 10KC conversion rates are standard, 20KC available. Accuracy is ±0.025%, ±½ LSB. The AD 300 Series are mounted on three plug-in P.C. boards measuring 2.75" x 5.25" x 1.0". Single quantity price for 12-bit binary 10KC, only **$189.00.**

D-TO-A CONVERTERS

The DA035 Series provides 8, 10 or 12-bit binary or 12-bit BCD resolution, with or without input data storage, on a P.C. card measuring 2.75" x 5.25". Inputs are TTL and DTL compatible. There are 40 models with six full-scale analog output ranges up to ±10 volts and ±10mA available. F.S. settling time is less than 50μ sec. Conversion rates up to 200 KHz. Accuracy on 12-bit models is ±0.05%, ±½ LSB. Single quantity prices start as low as **$69.00.**

DC Power Supplies

CompuREED™ RELAYS AND SCANNERS

The CR300 Series Relays are the newest development in low-level analog switching. The series includes 12 models available in one, two or three pole, form "A", switching configurations with dry or mercury-wetted reed switches operating at rates up to 200 samples/second. The CM600 Series CompuREED™ Scanner uses the CR300 reeds to provide economical low-speed, high-accuracy sampling of analog signals in the ranges of ±5 millivolts to ±1 volt full scale with programmable gain control. The reed switches provide extremely low (<0.1 microvolt for 5% coil duty cycle, and <1.0 microvolt for 100% coil duty cycle) thermal offset. CR300 Series prices are typically **$14.00.** A typical price for the CR600 Scanner is **$24.00 channel.**

LOW-LEVEL MULTIPLEXERS

The **significantly different** LM700 Series Low-Level Multiplexers feature **transformer isolation** of each channel allowing independent operation. Also featured is high common mode voltage capability of 120V RMS. The LM700 Series has an input range of ±5mV to ±1 Volt and an accuracy of ±.05% RTO, ±5 microvolts RTI, ±½ LSB. Up to 10 KHz channeling rates may be achieved. Common mode rejection—120DB @ 60 Hz with 1K ohm unbalance in the input lines. Gain settings are programmable. Popular models are LM723 (64-channel), LM738 (128-channel). Both include ADC and appropriate power supplies. Typical price is **$95.00 per channel.**

Digital Panel Meter

CompuLogIC™

CompuLogIC™

The CL800 Series comprises a complete family of plug-in logic circuit modules using monolithic DTL integrated circuits. The series consists of positive logic, NAND based circuits with each circuit card containing two hermetically sealed, 14-pin, dual in-line, ceramic packages. Each circuit module measures only 1.25" x 2.5" and mates with standard 30-pin, 15-position, card-edge connectors with 0.156" spacing. The basic series consists of 18 separate circuit module types containing both high and low-speed models. A typical price for CompuLogIC™ is **$10.00.**

CompuREED™

Low Level Multiplexer

DIGITAL PANEL METERS

The DP400 Series measures DC voltage accurately (.05% ±½ count for 2000 and 4000 count models. .02% ±1 count for 10,000 count models) with up to 10,000 count resolution. It offers 11 voltage ranges (200mV, 400mV, 1V, 2V, 4V, 10V, 20V, 40V, 100V, 200V and 400V). Temp. coefficient is .005%/°F(2000 and 4000) and .003%/°F (10,000). Single quantity prices start as low as **$198.00. Guaranteed shipment within 15 to 30 days.**

DATA CONVERSION MODULES

THIS IS OUR STANDARD MODULE:

FRONT VIEW

SIDE VIEW

BOTTOM VIEW

SOME OF THE CONVERTERS WE PACKAGE IN IT ARE:

8-13 BIT D/A CONVERTERS
—including 50ns settling, 100 mA output, multiplying AC, and economy versions.

14 BIT SYNCHRO-TO-DIGITAL CONVERTERS
—with ±4 minute ±0.9 LSB accuracy and isolation of reference and input.

14 BIT SOLID STATE CT's
—with ±4 minute accuracy and isolation of input and output.

8-11 BIT A/D CONVERTERS
—including ultra-fast, fast, and economy versions.

14 BIT DIGITAL-TO-SYNCHRO CONVERTERS
—with ±4 minute accuracy and isolation of reference and output.

14 BIT DIGITAL-TO-RESOLVER CONVERTERS
—with ±4 minute accuracy, and isolation of reference and output.

14 BIT SOLID STATE CDX's
—with ±4.5 minute accuracy and isolation of input.

ALL ARE AVAILABLE IN THREE OPERATING TEMPERATURE RANGES: —55 TO +85°C, —25 TO +70°C, AND 0 TO +50°C. HERMETICALLY SEALED VERSIONS ARE AVAILABLE. WE ALSO SUPPLY MULTIPLEXERS, SAMPLE & HOLD MODULES, AND SPECIAL PURPOSE CONVERTERS. PLEASE SEE SECTION 1100 FOR A LISTING OF OUR SIGNAL CONDITIONING MODULES, INCLUDING WIDEBAND DATA AMPLIFIERS.

A DIVISION OF SOLID STATE SCIENTIFIC DEVICES CORP.

DC INC.

datacom,inc.

P. O. BOX 278 • FT. WALTON BEACH, FLORIDA 32548 • AC 904 242-3113

Datacom specializes in the production of computerized data acquisition equipment, multiplexing and digitizing equipment (for both high and low level sources), timing equipment, computer peripherals, and computer aided process control equipment for industry. Datacom maintains a staff of experienced engineers to advise customers on special requirements.

LOGIC CARDS Datacom offers a full line of logic modules and accessories for those who wish to build their own customized digital equipment. Contact our plant for more detailed information, including pertinent specifications, on Datacom's line of DTL, TTL, and MSI integrated circuit digital logic cards. Card files, chassis and power supplies as well as other accessories are available from Datacom.

TIMING EQUIPMENT

TIME CODE GENERATOR

TIME CODE REGENERATOR

DIGITAL CLOCKS

DATA SYSTEMS

COMPUTER CONTROLLED DATA ACQUISITION SYSTEM

The basic system acquires 16 channels of high level analog data for processing by the computer. Processed data may be printed by the ASR-33 Teleprinter or recorded on magnetic tape.

DATA LOGGER

The basic system digitizes 16 channels of high level analog data and records the data in a computer compatible magnetic tape format.

FIBER TESTER

The basic system acquires elongation and load data from an instron tensile tester. When the fiber under test breaks, the system lists the test results on the ASR-33 Teleprinter. Examples of the type of test data obtainable are: decrimping load, decrimping elongation, decrimping area, yield load, yield area, breaking load, breaking elongation, estimated tenacity, initial modulus, secondary modulus, standard deviations, and others.

  ABSOLUTE

WIDEST RANGE OF OPTIONS
- ANY NUMBER OF AXES
- ANY NUMBER OF DIGITS PER AXIS
- SIGN (+ OR –)
- OFFSET CONTROLS
- PRESET COINCIDENCE
- BCD OUTPUT (8-4-2-1 CODE)
- POWER FAILURE LATCH
- RESOLUTION SWITCHES
- TWO POSITION DECIMAL POINT SELECTOR

PLUG-IN COMPATABILITY TO DGC ELECTRONIC SCALER AND DATA TRANSFER SYSTEM.

DATA TRANSFER SYSTEM FEATURES VERSATILITY

ACCEPTS DIGITAL DATA FROM:
- DIGITAL VOLTMETERS
- A TO D CONVERTERS
- TIME CODE GENERATORS
- COUNTERS
- DIGITAL CLOCKS
- ANY OTHER DIGITAL OUTPUT DEVICE

INTERFACES DIRECTLY TO:
- KEYPUNCHES
- TYPEWRITERS
- TAPE RECORDERS
- PRINTERS
- PAPER TAPE PUNCHES
- ON LINE WITH A COMPUTER
- THE MULTIPLEXING OF MORE THAN ONE SYSTEM

THE DATA TRANSFER IS THE KEY COMPONENT IN ANY DATA ACQUISITION SYSTEM. WE WILL SUPPLY THE DATA TRANSFER ALONE OR THE ENTIRE DATA ACQUISITION SYSTEM.

SENSORS & TRANSDUCERS

DGC WILL SUPPLY THE DATA TRANSFER ALONE OR THE ENTIRE DATA ACQUISITION SYSTEM.

DATATOTAL INC.

DIGITAL PRINTERS

- DECIMAL, TWELVE LINE, OR B. C. D. INPUT
- FOUR TO TWELVE ACTIVE COLUMNS. (MORE ON REQUEST).
- ASYNCHRONOUS OPERATION; SIX LINES PER SECOND AVERAGE SPEED. SYNCHRONOUS OPERATION FOUR LINES PER SECOND.
- SPECIAL CODE CHARACTERS AVAILABLE.
- COMPACT IN SIZE, DESK TOP OR PANEL MOUNT.
- TICKET OR CARD PRINTER AVAILABLE.
- UNIQUE INKING SYSTEM WITH NO RIBBON GIVES A CLEAR SMUDGE-FREE PRINT.

Datatotal offers a complete range of medium performance Digital Printers with models suitable for O.E.M. or user applications. The basic mechanical and electronic design is modular giving great flexibility in input mixes and ease of service.
All Datatotal Printers are normally furnished for 110V 60 Hertz operation and the units are supplied complete and ready to go. The Printer employs individual interchangeable count modules in each column allowing spacing of format to suit specific applications. Time and date print out can be supplied along with various code identification characters. Should at any time a special character, that we do not have, be required we will provide one at a low one time charge.
Units can be supplied with or without drive electronics and various Ticket Printer options are available.

BRIEF SPECIFICATIONS

MODEL NUMBER	NUMBER OF COLUMNS STANDARD UNIT	PRINT SPEED LINES PER SECOND	DIMENSIONS 12 COLUMN UNIT WIDTH	HEIGHT	DEPTH	ENTRY CODE
1141C	4-12 (More on Request)	6 Per Second Average	4⅝"	4½"	15"	Decimal or Twelve Line
1141CD	4-12 (More on Request)	6 Per Second Average	4⅝"	4½"	15"	B.C.D. (1248)
1141B	4-12 (More on Request)	4 Per Second	4⅝"	4½"	15"	Decimal or Twelve Line
1141BD	4-12 (More on Request)	4 Per Second	4⅝"	4½"	15"	B.C.D. (1248)

31 PARK ROAD, NEW SHREWSBURY, NEW JERSEY P.O. BOX 275, EATONTOWN, NEW JERSEY 07724
(201) 542-7870

The Integrated Circuit Logic Card with *More Value* Built In

Datascan now offers you the most complete line of *function* IC cards — DTL 200 series, TTL 600 series and HTL (High Noise Immunity) 400 series, power supplies, hardware and accessories. All three card lines are pin for pin interchangeable.

Pull-Up Resistors
Provision for mounting resistors right on card — reduces number of interconnections, cards and cost.

Test Points
Optimum number with no added capacitance or sacrifice in function capacity.

Dynamic Decoupling™
Exclusive with Datascan — eliminates high and low frequency noise for extremely reliable system operation. The decoupling circuit is right on the card.

Edge Connections
44 pins for economy, availability, reliability—compatible for any type of termination.

Card Keying
Unique 3 slot interpin keying — prevents accidental interchanging or reversing—saves all 44 pins for active connections.

A New Concept in Logic Card Systems

- Economic Savings
- Less Noise Problems
- Less Software
- Plug-in Conveniences
- Over 100 Function Logic Cards Available
- Exclusive Dynamic Decoupling™

The new WRAP-X cards contain wire wrap sockets for 14 pin IC'c and/or 16 pin MSI chips. They are mechanically compatible with over 100 Datascan "function" logic cards — i.e., decimal converters, comparators, shift registers, etc.

You select which complex function cards you need and then do the simple logic yourself. Or, supply a block diagram or schematic and we will complete the system using computer-aided design and wire-wrap techniques. You save time, money and trouble.

One reason you save is that WRAP-X works with existing standard function cards; complex function cards which cannot be economically duplicated with the back-plane approach. The back-plane approach requires complex interconnections, extensive run list and many hours of engineering time.

Datascan's exclusive Dynamic Decoupling circuit is on every function logic card and WRAP-X board to assure low noise operation and system reliability.

Write for complete information and WRAP-X layout kit.

Wrap-X Module Price List

292A Wrap-X Module with sixteen 14 pin sockets	$47.00	OEM quantities of Wrap-X Modules with both 14 and 16 pin sockets are available on request. Consult factory for OEM discount schedule.
292B Wrap-X Module with sixteen 16 pin sockets	$49.00

2 Input NOR Gate	274
2 Input AND Gate	275
2 Input Exclusive OR Gate	276
8 Input NAND, Expandable	278
10 Input NAND Gate	279
2 Input Power Gate	290
Power Transfer Gate	691

ACCESSORIES

POWER SUPPLIES

Solid state units, with current limiting and over-voltage protection. Available for use with or without dynamic decoupling in the logic system.

CARD DRAWERS

Datascan offers standard card drawers with 1 rack (40 slots), 2 racks (80 slots) or 3 racks (120 slots). All drawers are furnished with a finished 5¼" front panel, handles and holes for mounting chassis slides. Drawers can be furnished, at the customer's option, with solder, wire-wrap, termi-point or taper pin connectors; chassis slides; 4-layer power buss and rear connector panel.

DATASCAN, INC. 1111 Paulison Avenue, Clifton, N. J. 07013
Telephone 201-478-2800

datatron...expanding man's capability with data.

From its inception. Datatron has purposely sought to attain a national position of leadership in the fast growing commercial and government markets for low-cost, high-performance electronic equipment and systems. Through continual development of new approaches to problem solving in instrument design, the company has carved out four distinct areas of achievement.

data handling systems — Datatron has a proven capability and background of successful experience in matching the design and manufacture of data handling equipment to problems encountered in widely varying fields of operation. These areas range from jet engine testing through data communication in the petrochemical field.

timing instrumentation — Engineering innovations, including reduction in equipment size and cost, coupled with increased capability and reliability quickly established Datatron's reputation in the forefront of timing technology.

video tape editing — By applying previously gained knowledge to the television industry, Datatron produces equipment providing fast and accurate control for both editing and real time control of quadraplex and helical video recorders.

microelectronic testing — The company has spearheaded a new dimension of total service capability in the electronic testing of integrated circuits, components, arrays, and modules. Utilizing either the Microelectronic Testing Laboratories or the company's unique series of computer controlled test equipment, Datatron can solve any manufacturer's testing requirement no matter how small or complex.

DATATRON data handling systems

data acquisition systems — In the field of data acquisition and reduction, Datatron provides three alternate approaches to system implementation: (1) High performance, low cost systems (very small to medium size) for solving specific problems encountered in research or production areas. (2) Design and construction of systems for OEM applications. (3) An extensive line of linkage equipment for interconnecting subsystems.

data handling systems — Datatron can solve special data handling requirements in one of two ways. Small system requirements can normally be implemented using standard building blocks so that the system in effect becomes a standard product. Medium size systems, though often requiring more in the way of special engineering, can also be easily implemented using standard available building blocks. Such items include acquisition of meteorological data, monitoring of cardiograph information, logging of geophysical data, acquisition of data from radar pedestals, and monitoring of jet engine test cells. Other types of systems include magnetic tape to paper tape conversion and verification systems.

OEM systems — Datatron has extensive experience in providing OEM systems as accessories to analytical instruments. This requires the capability to produce reliable, low-cost equipment, and to respond quickly to customer requirements. Examples include the acceptance of analog and digital outputs from analytical instruments, their conversion to a predetermined format, and subsequent recording on such output devices as teletypewriters. High performance systems have been provided in environments ranging from oil well drilling rigs to electron current beam spectroscopy. Other OEM contracts have covered special counters and interface equipment to link graphic display devices to a computer via telephone dataset.

linkage equipment — Where a complete system is in existence but specialized equipment for the interconnection of subsystems is required, Datatron's capability for building a wide range of linkage equipment can be of great value. Typical linkage systems would connect a digital computer to a digital tape deck, XY plotter, timing system, or existing data system. Other linkage systems can connect digital tape transports to telephone datasets, punched paper tape, printer, XY plotter, etc.

DATATRON video editing equipment

By applying timing techniques long used in the instrumentation field, Datatron offers a new approach to the real time control and editing of both high band quadraplex and helical video tape recorders. The Vidicue 5000 series of video editing equipment consists of Model 5100 Time Code Generator and the Model 5200 Control Unit. The Model 5100 is used during the video recording process, laying down on the cue track a time code identifying the tape to the video frame. During the editing or real time control process the Model 5200 Control Unit is used to control and precisely synchronize up to three video tape recorders. The operator can control his video tape recorder in one of four ways:

1. *Cue/Preview* — The automatic cue of a single video tape recorder to a preset point and the preview of a desired section of the tape.
2. *Add-On Edit* — The sequential assembly of material on the record tape from the playback tape.
3. *Insert Edit* — The user can insert new material in a prerecorded tape.
4. *AB Roll* — The most complicated of the edit modes involves precise control and synchronization of three machines. In this mode, data from two playback machines is made available for an effects edit on the record machine.

DATATRON microelectronic testing

microelectronic testing — Datatron offers a comprehensive program for the preconditioning, testing, and evaluating of integrated circuits, arrays, modules, and printed circuit cards.

1. For customers whose testing requirements do not justify the purchase or lease of a system for in-house preconditioning and testing, a complete testing service is available through Datatron's Microelectronic Testing Laboratories division.
2. Where quantity use of integrated circuits, arrays, or printed circuit cards makes an in-house tester practical, Datatron offers its Model 4400 Digital Module Tester.

The Model 4400 Digital Module Tester automatically tests (both DC and functionally) small, medium, and large scale integrated circuits and printed circuit cards having up to 100 active pin connections. Principle features of the Model 4400 are:

1. *Speed* — The unit tests devices at rates of up to 50,000 tests per pin per second.
2. *Total Test Capability* — At each pin, voltage may be forced and the resultant current monitored, or current forced and the resultant voltage monitored.
3. *Programming Flexibility* — Each pin can be independently set for both voltage and current values.
4. *Operational Flexibility* — This system includes a general purpose 16-bit computer providing flexibility both in the generation of programs and data logging.
5. *Low Cost* — The system is priced competitively with testers offering considerably less in performance.

Both Go/No Go and parametric tests can be performed by the Model 4400. When an error occurs during Go/No Go tests, the pin in error is indicated along with the point in the test program at which the error occurred, and the pass through the test if operating in a multiple pass mode. An integral analog-to-digital converter and multiplexer permit the operator either manually or under computer control to read current or voltage at any pin or bias supply within the system.

Data logging of test results can be obtained either on the teletype included with the system or optional punched tape or magnetic tape units. Data logging can be performed in one of three modes:

1. Record pin in error, point in program at which error occurred and pass (if multiple pass).
2. Same as 1. above, plus the recording of voltage and current at the pin in error.
3. The recoding of voltage and current at selected pins for every nth device.

The Model 4400 is programmed using a conversational routine between the computer and the operator. In this routine the computer asks questions and the operator responds. Since only a limited response is permitted to all questions, it is extremely difficult for the operator to misprogram a device. The tester's strictly English language format offers another major benefit. After, only a short period of familiarization, operators can prepare complete programs within one hour.

microelectronic testing laboratories — The Microelectronic Testing Laboratories (MTL) division of Datatron completes the cycle of total service capability. As an independent laboratory, MTL provides a new service to the commercial equipment manufacturer. This service is a unique concept of high volume, low-cost preconditioning and screening of microcircuits.

For the first time, the commercial equipment manufacturer has a service to parallel that available to the military and aerospace equipment manufacturers. By abstracting from and implementing the most usable portions of the military and aerospace high reliability programs, MTL is able to provide orders of magnitude improvement in commercial system reliability at an extremely low cost.

The services offered by MTL include device burn-in (aging), thermal shock, and computer controlled DC, functional testing. Experience proves that such preconditioning more than pays for itself in reduced manufacturing costs, plus vastly improving the reliability of the end product.

MTL performs an additional service for each customer by identifying each electronic component according to its specific failure mode, and by supplying a summary report showing a complete recap of the entire lot subjected to testing.

DATATRON timing instrumentation

Whenever analog data is recorded on instrumentation tape recorders, the need exists for timing equipment. By laying a serial time code down on one track of the tape recorder during data acquisition and then during data reduction playing it back, timing instrumentation provides both indexing and correlation of recorded data. Datatron offers a complete line of timing equipment to solve your problems.

In addition, Datatron also possesses extensive capability in the production of timing systems. These include complete range timing systems, countdown systems, sequencer control systems, and computer integrated timing systems.

Model 3000 Time Code Translator/Generator

When coupled with the Datatron Model 3400 Tape Search Unit, the Model 3000 Time Code Translator/Generator provides a complete, highly flexible timing system for those facilities where both data acquisition and reduction are performed.

As a generator, the unit accumulates time from an internal frequency standard. Synchronization controls permit close correlation, if desired, to an external time standard. The Model 3000 generates up to five serial time codes simultaneously while also outputting pulse rates for system synchronization and parallel data for time tagging of information.

As a translator, the unit will accept many different time codes such as the IRIG and NASA families, the XR3 code, or the Vela uniform code simply by changing a printed circuit card. High or low speed, forward or reverse translation is provided and outputs include serial time codes, parallel data, and pulse rates. Such items as input carrier filters, and digital error bypass logic usually found only on much more expensive units are included as standard features in the Model 3000.

Model 3100 Time Code Generator

Where timing is required for data acquisition at a site remote from the data reduction station, the Model 3100 Time Code Generator is an ideal solution. This generator accumulates time from an internal crystal oscillator, includes synchronization logic, and outputs up to five serial time codes along with pulse rate and parallel outputs.

Model 3200 Time Code Translator

The Model 3200 Time Code Translator permits high or low speed, forward or reverse translation of a time code from magnetic tape or can be utilized as a terminal device to accept a time code over RF link. The unit provides serial time code ouputs for the redubbing of magnetic tape or "quick look" on strip chart recorders, parallel outputs for entry into digital data systems or time tagging of recorded digital data, and pulse rates for system synchronization.

Model 3400 Tape Search Unit

The Model 3400 Tape Search Unit Complements the Model 3000 Time Code Translator/Generator and Model 3200 Time Code Translator. When used in conjunction with a translator, this unit provides automatic search for a data interval as programmed by front panel rotary thumbwheel switches or by a digital computer.

Model 3600 DC Code/Failsafe Unit

The Model 3600 DC Code/Failsafe Unit adds capability and flexibility to either the Model 3200 Time Code Translator or the translator portion of the Model 3000 Time Code Translator/Generator. Utilization of the Model 3600 with either of these units provides the capability of accepting DC level shift time code inputs and also eliminates output discontinuities due to dropout of either a modulated carrier input or a DC level shift input. The Model 3600 has a wide dynamic range commensurate with the dynamic ranges of both translators.

Model 3700 Remote Display Unit

The Model 3700 Remote Display Unit accepts up to 15 digits of parallel BCD inputs, converts these to a decimal form and drives the front panel Nixie display. The inputs to the Model 3700 are compatible with the parallel BCD time outputs of the Model 3000, Model 3100, Model 3200, and Model 3350 timing units. Other logic level inputs are also available.

Model 3350 Digital Clock

The Model 3350 Digital Clock accumulates time-of-day and day-of-year utilizing either an internal crystal oscillator or the 60-cycle power line as a frequency source. Digital outputs are available for time tagging data when the clock is used in data system applications. Accumulated time is displayed on the front panel. The unit is entirely solid state, but is priced competitively with electro-mechanical or mechanical units.

Datatron's creative engineering approach is supplemented by a completely new manufacturing facility with an experienced staff capable of making on time deliveries and providing total after-sales service.

MODELS 2014 & 2020

DIGITAL PRINTERS

• 4 to 20 columns • 60 lines per minute • BCD parallel entry 8421, 4221, or 2421 • Modular construction • All solid state circuitry • Available options include: clock printout, log indexing, floating point, memory, 180 lines per minute

Digitron Printers are specifically designed for the facility requiring a low-cost digital printer for recording from all types of digital instruments and systems. They are complete units with power supply and all electronics, ready for recording.

SPECIFICATIONS

MODEL 2014 AND MODEL 2020 DIGITAL PRINTERS

1. PRINT RATE
1 line per second.

2. NUMBER OF COLUMNS
Basic Model 2014 ..... 4 to 14 columns
Basic Model 2020 ..... 10 to 20 columns

3. FORMAT
Horizontal spacing: 0.285″ ±.002″.
Vertical spacing: 4.25 lines per inch.
Character size: 0.160 x 0.100 W.

4. PRINTABLE CHARACTERS PER COLUMN (FONTS AVAILABLE)
Choice of fonts in any column is as shown in the following table. Note: A fixed colon or decimal point can be supplied to print between any column.

5. PAPER
Length approximately 250′. Model 2014 uses 4″ width. Model 2020 uses 6″ width.

6. MOUNTING
Rack mounting, standard: 7″ H x 19″ W x 15″ D, or — Table mounting, portable case with handle: 7¼″ H x 10″ W x 16¼″ D.

7. POWER
115 Volts ±10 Volts, 50 to 400 Hz fused at ½ A.

8. CONSTRUCTION
Modular, all silicon semiconductors and integrated circuits.

9. FRONT PANEL CONTROLS
Power-on switch and indicator light.
Print switch, reset switch, hours advance and minutes advance.

10. DATA INPUT (LOGIC LEVELS)
A. Standard: "1" = +2.4 to +30 VDC; 100K ohms input impedance.
"0" = +0.4 ±0.4V; 1.5 ma (std. DTL Load).
B. Alternate: "1" = −3V to −30 VDC; 100K ohms impedance.
"0" = −0.4 ±0.4V; 100K ohms impedance.

11. PRINT COMMAND
A. Contact closure to gnd. (normally closed, continues to print when open).
B. −3 to −30 VDC, continues to print until signal is removed. (See 10B).
C. +3 to +30 VDC, continues to print until signal is removed. (See 10A).

12. CONTROL SIGNAL
Busy during print cycle: 1 second.
A. +3.5 VDC gate during print cycle. Normal reference ground.
B. Vcc (−30 to +30V) during print cycle. Normal reference ground. User must supply Vcc.

13. OPTIONS
F ... Floating Point.
H ... High Speed — 180 lines per minute.
M ... Memory.
P ... Table Model — Portable case.
T ... Digital Clock — prints AM or PM, hours 1 through 12 and minutes 0 through 59. Memory prevents loss of time during print cycle. Time set switches on front panel.
U ... Print Identification Index — Pulsed counter shows numerical sequence of recording from 1 to 99. May be reset by front-panel switch, contact closure to ground, or signal of (−3 to −30V, see Item 10) or (+3 to +30V, see Item 10).
V ... Decimal Point or Colon.
X ... Special Fonts.

AVAILABLE CHARACTER FONTS PER COLUMN

Font	Characters In Font											
A	0	1	2	3	4	5	6	7	8	9	.

*These 12-position fonts are used for time recordings from an internal clock. See options, Item 13 of these specifications.

GEO SPACE SYSTEMS, INC.

DIGITAL SYSTEMS AND TIMING EQUIPMENT

COMPLETE TIMING SYSTEMS

APOLLO TIMING SYSTEM

The most sophisticated central timing systems built by Geo Space Systems, Inc. were installed onboard the National Aeronautics and Space Administration's new Apollo instrumentation ships. The system generates time codes and a variety of standard and nonstandard reference frequencies and distributes them to range instrumentation equipment located throughout the ships. It provides time signals that are synchronized within one ten thousandth of a second with the Naval Observatory.

Outputs, derived from precise rubidium and crystal frequency standards by redundant master time-of-year clocks and time signal generators, include standard NASA and IRIG time codes, serial binary time-of-year and time-of-day, serial binary-coded-group time-of-year and paralleled BCD time-of-day. Elapsed time clocks are incorporated for complete pre, or post event timing, and feature manual or automatic initiation. All frequencies and time codes are channelled through a system patch panel for programmable distribution. A time scaler produces time and event markers for use with event recorders and plotting boards.

The system's time comparison equipment includes a WWV receiver, a VLF receiver, chart recorders and an oscilloscope featuring a plug-in unit to make it readily available for use in synchronizing, timing procedures and troubleshooting. VLF doppler effect is corrected by a ships motion compensator.

The utmost in operational dependability has been incorporated into this system, exemplified by: The crystal frequency standard, phase-locked to the rubidium frequency standard to within ±0.2 degrees, is automatically switched in place of the rubidium standard if the rubidium standard output drops to half amplitude or if there is a dropout of a whole cycle. A monitoring circuit accomplishes similar switching between master time-of-year clocks. Synchronous, non-transient switching between time signal generator outputs is provided by the transfer switch unit.

Redundancy also exists in the system master power supplies. An internal battery pack is also automatically selected in the event of main power failure. System battery chargers keep the stand-by pack ready at all times.

DIGITAL EQUIPMENTS AND SYSTEMS

TIME CODE GENERATORS

This line of advance-design equipments begins with the GTG-1000, developed to meet the most stringent time correlated instrumentation requirements; and extends to the GTG-3000, designed for applications requiring a reliable, low-cost time signal source of ±1 second accuracy.

REMOTE DISPLAYS

Digital display indicators are available individually, or as companions to GSS time code generators. Simple time-of-year, time-of-day, and elapsed time indicators are featured, as well as models which incorporate selected time of event output. They are available in individual cabinets finished to customer specifications, or as rack mounted units.

AIRBORNE TIME CODE GENERATOR

Model 8156, qualified for airborne use, is 5.6 x 6.6 x 3.5 inches and weighs only 3.2 pounds. It generates modified IRIG B time code with frequency stability of 1 x 10^{-6} and drift rate parts of 10^{8} per week provided by an internal temperature-compensated crystal oscillator. Time is preset by a 20-bit parallel BCD time-of-day input and an external switch or relay closure. An internal nickel-cadmium battery provides backup power during input power dropouts.

ELAPSED TIME CLOCKS & COUNT-DOWN GENERATORS

Capable of countdown and countup, with controls for hold count and count adjust, these units can be started automatically at a preset time-of-year, by an external start pulse, or manually by a front panel pushbutton. Preset time-of-year and preset initial elapsed time value (plus or minus) are set in by convenient front panel thumbwheel switches.

RANGE TIME CODE TRANSLATOR/GENERATOR

This RTC T/G is capable of functioning either as a subcentral timing system or an independent timing generator. Using dual-in-line integrated logic, the Model 8174 generates all the necessary timing signals and pulse rates for use in radar systems and computers. This includes NASA BCD and serial codes as well as binary time-of-year in tenths of seconds. Solid state components and technology are used throughout.

TIME CODE READER SCANNER

The GSS Time Code Reader/Scanner, Model 8108, provides reliable phase-coherent serial and parallel outputs when reading noisy time code signals with non-coherent carriers. An acquisition/lock feature assures coherent time outputs for up to 32 frames of signal dropout once sync is initially acquired. The standard unit handles the NASA 36-bit time code at the standard 1 kHz rate and four non-coherent carrier rates. Other codes and rates are optionally available.

Followng the introduction of silicon integrated circuit micrologic modules, Geo Space Systems, Inc. redesigned its line of standard building block module cards and incorporated them into a new family of timing system equipments. The company meets the needs of government and industry from a simple clock to a dual or triple-redundant, highly sophisticated digital system.

In the data display field, a team of engineering specialists is available to analyze customer needs and custom tailor our standard system configurations to their specific needs.

HYBRID SYSTEMS CORP. 97 Terrace Hall Ave., Burlington, Mass. 01803 • Tel: 617-272-1524 TWX: 710-332-7584

'eries 8602 (3") and 8622 (5") have vertical bandwidth to 2½MHz (4HMz ptional), TTL compatible Z axis control, and 12-step multirange sweep that lso provides DC-1MHz horizontal channel for X-Y operation. Fixed sweep nodels also available (Series 8601 and 8621).

Series 8610, 8611, 8612 offers the same capabilities as the 8600, 8601, 8602, with 5" circular CRT.

CRT DISPLAY

Basically, Infodex offers three series of scopes — 3" rec-angular, 5" rectangular, and 5" round. Each series em-braces 22 standard models, ranging from X-Y indicators with AC coupled Z axis for gray scale modulation, through a choice of 18 triggered sweep ranges, to three models with 12-step multi-range sweep. All sweep models have TTL compatible Z axis controls. 66 models in toto, whose gen-eral specifications include:

Vertical bandwidth — 2½ MHz
Horizontal bandwidth — 1 MHz
Sensitivity — 100μV/div
Sweep rates — 1μs/div to 500 ms/div

Plus many options.

However — many customers need something a little differ-ent. Infodex circuit design and packaging gives outstand-ing manufacturing flexibility so that we can provide specials with reasonable lead times and price tags.

Therefore — if you need special capabilities and/or con-figurations, in prototype or production quantities — give us a call!

Note: Deflection amplifiers also available as individual components.

INFODEX
INCORPORATED
7 Cherry Avenue, Waterbury, Conn. 06702 • 203-757-9291

Some special assem-blies, delivered ready for user installation in custom applications.

Series 8600 (3") and 8620 (5") are X-Y indicators with bandwidths 2½MHz ver-tical and 1MHz horizontal (4 and 2MHz, respectively, available as options). AC coupled Z axis for gray scale modulation.

NUMERIC READOUTS • ANNUNCIATORS • LIGHTED INDICATORS

SPECIAL ANNUNCIATOR UNIT

NOW, a new modular approach to Lighted Information Displays that provides the design flexibility and attractive appearance usually associated with expensive custom units. INFO–LITE allows you to choose the Size, Shape, Color, Legend and Intensity combination that will meet your requirements • All INFO–LITE units are made from four basic light modules which have lighted area sizes of 3/8 x 3/8, 3/8 x 3/4, 3/8 x 1-1/8 and 3/8 x 1-1/2 • Colored filters, special legends and masks are added as required • Light sources are standard, flange based T 1-3/4 lamps • INFO–LITE assemblies are easily panel mounted and may be removed from the front for rapid servicing.

SEVEN SEGMENT NUMERIC READOUT

INFO–LITE seven bar numerics are available with .7", 1", 2" and 3" characters. They are supplied complete and ready to mount with the number of digits that you require. Decimal points, colons, + or – indicators, unit indicators, and a wide variety of other readouts may be integrated into the assembly. Mating decoder-drivers compatible with TTL logic can be supplied with the units.

TYPICAL NUMERIC READOUT UNIT

FEATURES: MODULAR CONSTRUCTION • MANY COMBINATIONS AVAILABLE FOR SPECIAL DISPLAYS ATTRACTIVE CUSTOM BUILT APPEARANCE • STANDARD LAMPS USED • SERVICED FROM FRONT SIMPLE, CLIP MOUNTING • LOW COST

MATRIX PROGRAM BOARDS

FEATURES:
- RELIABLE CLOSED ENTRY CONTACTS
- RUGGED PROGRAMMING PINS THAT WILL NOT BEND
- RAPID & CONVENIENT PROGRAMMING/SWITCHING
- COMPONENTS INSERTION INTO NETWORK WITHOUT SOLDERING
- ATTRACTIVE AND COMPACT/PACKAGE
- LOW CAPACITANCE FOR HIGH FREQUENCY APPLICATIONS

INFO–LITE Matrix Program Boards are a convenient and economical way to switch and program multiple terminal inputs and outputs without the panel clutter of older patching arrangements • The two-level matrix board is made of two planes of contact busses on .250" centers • Busses on one deck are perpendicular to the busses in the other deck so that switching crosspoints are obtained • Connecting an input buss to an output buss is done by simply inserting a programming pin at the desired crosspoint • Two types of program pins are available: Shorting Pins, and Diode Pins which are used for inserting a component (diode, resistor, lamp, etc.) into the contact matrix • Standard units are available in 10 x 10, 10 x 15, 10 x 20, 10 x 25, 10 x 50, 15 x 20, 15 x 25, 20 x 20 and 25 x 25 arrangements • Special matrices with up to 100 x 100 crosspoints and six levels of contacts are available.

TYPICAL APPLICATIONS: NUMERIC CONTROLLED EQUIPMENT • CIRCUIT/COMPONENT TEST PROGRAMMERS LOGIC MEMORIES • CODE GENERATORS • PROGRAMABLE DIODE MATRICES • FUNCTION GENERATORS COMMUNICATIONS DISTRIBUTORS • THERMO-COUPLE SELECTORS • SEQUENCE PROGRAMMERS.

Patent Pending

INTER-COMPUTER ELECTRONICS

High Speed A-D Converters/Fast Settling D-A Converters/Computer Interface Systems

OUTSTANDING FEATURES OF A-D CONVERTER

- Data conversion rates up to 320 megabits.
- Aperture time on the order of tenths of nanoseconds.
- Word sizes ranging from 4 to 10 bits.

MODEL	MAXIMUM WORD CONVERSION SPEED	RESOLUTION	APERTURE TIME	% OF FULL SCALE ACCURACY (± ½ LSB) @ 25 C
SERIES A				
IAD-1104	80 MHz	4 bits	0.2 nsec	± 3%
IAD-2104	60 MHz	4 bits	0.2 nsec	± 3%
IAD-3105	30 MHz	5 bits	0.6 nsec	± 1.6%
IAD-5105	20 MHz	5 bits	0.7 nsec	± 1.6%
IAD-1206	12 MHz	6 bits	1.0 nsec	± 1%
SERIES B				
IAD-1208	10 MHz	7 bits	0.2 nsec	± 0.2%
IAD-0280*	5 MHz	8 bits	0.6 nsec	± 0.2%
IAD-2208	6 MHz	8 bits	0.5 nsec	± 0.2%
IAD-3210	3 MHz	10 bits	0.3 nsec	± 0.05%
IAD-1850*	1 MHz	8 bits	1 nsec	± 0.2%
IAD-1309	1 MHz	9 bits	0.8 nsec	± 0.1%

VARIABLE SAMPLE RATE SERIES

MODEL	RANGE OF CONVERSION SPEED	APERTURE TIME	RESOLUTION	FULL SCALE ACCURACY (± ½ LSB)
IAD 1104V	2 MHz to 80 MHz	0.4 nsec	4 bits	± 3%
IAD 3104V	500 KHz to 30 MHz	1.0 nsec	4 to 8 bits	± 3%
IAD 1206V	160 KHz to 10 MHz	0.5 nsec	6 to 8 bits	± 1%
IAD 3108V	100 KHz to 3 MHz	0.7 nsec	8 to 10 bits	± 0.1%

The Variable sample rate series offers models with sampling rates from 156 KHz to 80 MHz. All conversion systems are complete, providing sample and hold circuitry in both internal and external triggering modes, and includes power supplies and display. Designed to enable the systems designer to empirically identify an optimum sampling frequency for a particular sensor input.

SERIES 550 Electronic Keyboard

COMPLETELY SOLID STATE

Model 550 ASCII Keyboard Arrays

SERIES 550 FEATURING:

- Magnetic Core Switching
- ASCII, EBCDIC, BCD or Special Encoding
- Simple Construction
- Unlimited Configurations— Design your own Keyboard layout
- Compatibility with 5 volt IC Logic
- Negative or Positive Logic Output
- Minimum Power Consumption (3.5 watts)
- Keys Bottom on Housing — Not P.C. Card

SERIES 550 ELIMINATES:

- Mechanical Linkage
- Delicate Chips
- Contact Bounce

SERIES 550 OPTIONS:

Strobe Output • Odd or Even Parity • Multi-Key Interlock • Two Key Rollover • Shift • Repeat Function • Shift Lock • Cabinet • Control Function Keys.

SERIES 550 Specifications

INPUT POWER

+5 VDC, ±5% regulation
700 milliamps maximum

OUTPUT LEVELS

Logic "0": +2.4 VDC nominal @ 1.5 ma drive

Logic "1": +0.4 VDC maximum @ 16 ma minimum sinking current

WEIGHT

Without cabinet: 3.7 lbs. (approx.)
With cabinet: 11.5 lbs. (approx.)

Patents Pending

AMBIENT TEMPERATURE

Operating: 0°C to +75°C
Non-operating: −55°C to +85°C

MODES OF OPERATION*

Mono-mode: no shift
Dual-mode: unshifted, shifted
Tri-mode: unshifted, shifted, control

CONNECTOR INTERFACE

Edge card accepts standard Cinch Jones connector or equivalent.

KEYSET CONFIGURATION

Keys mounted on ¾ inch centers with standard 3/8 - 3/16 - 3/8 inch typewriter offset between rows.

innovations for 1970

unique mercutronic coding keyboard . . . design your own configuration

Mechanical Enterprises, Inc. can supply custom keyboard configurations immediately. Keyboards have no printed circuit boards or soldered connections. The plastic key module contains all encoding diodes and mercury switching element to provide reliable no-bounce output. Positive contact is ensured by use of non-oxidizing components under constant spring tension. A five-channel aluminum extrusion of any desired length holds the individual switch modules and the continuous flat, 11-wire cable that carries the signals.

Key modules are simply snapped into the channels and permanent contact is established.

Special features and options expand its versatility to meet your needs.

features:

Simple reliable circuitry
No-bounce output
No mechanical linkages
No soldered connections
No circuit boards
Custom coding
Custom keyboard configuration
Low profile
Stepped key rows
Quiet operation
Not temperature sensitive
Low cost

available options:

Shift and Shift-Lock—Allows upper and lower case operation, similar to mechanical typewriters.
Strobe Signal—Signals input device to read keyboard output.
Strobe Signal Inhibit—Prevents strobe signal if more than one key is depressed.

Write for our keyboard brochure. Let us quote on your keyboard requirements.

type any symbol instantly with Typit

With a minor modification to your typewriter you can use Typit I to incorporate symbols into your report copy. Select the symbol you need (over 1,000 symbols available) and insert it in the typewriter. Strike any key and you've got it perfectly . . . quickly. Print quality is equal to that of your typewriter. Symbols can be custom designed to suit your requirements.

Note: Typit II is also available for IBM Selectric Typewriters with the same features and range of symbols as Typit I.

Send for catalogues of adapters and symbols available.

molded plastic key tops off-the-shelf availability

A complete line of custom designed, molded key tops for any type of keyboard. Keytops with integrally molded contrasting inscriptions are available from stock—standard alphanumeric as well as many special inscriptions. Plain keytops that can be custom engraved to meet customers' special requirements are also available. Write for descriptive literature and prices.

mercutron switch . . . fast response no bounce

Provides electrical properties of a mercury switch in a subminiature configuration. Unique design relies on mercury movement in a flexible sealed tube for fast response with no bounce.

Switching Capacity ..... 60 ma @ 24 VDC
Contact Rise Time ..... $<1 \times 10^{-9}$ seconds
AC Contact Noise ..... 10 Microvolts
Bounce Time ..... Zero
Operating Temperature Limits ..... -30°C to 60°C

machine lettering for draftsmen

The Gritzner Lettering Typewriter gives you uniform lettering in a fraction of the time it takes to do it by hand.

This small, compact device makes machine lettering available to the individual draftsman. Operation requires no special skills or training.

Features include:

Standard keyboard with 26 letters, 10 numerals, and 20 miscellaneous punctuation marks and symbols. (Special symbols and keyboards available.) Easy adjustment is provided to obtain required impression. Inking is accomplished without messy, hard-to-replace ribbon. Indexing rail provides exact letter positioning. Priced at $300. Write for more detailed information.

For further information on the 1970 Innovations from Mechanical Enterprises call or write us at 5249 Duke St., Alexandria, Va. 22304 (703) 751-3030

MONILOGIC*

INTEGRATED-CIRCUIT LOGIC CARDS

MONILOGIC is a complete line of high-performance functional circuit cards, power supplies, and associated packaging hardware, designed for system integration with a minimum number of cards.
Reflecting MONITOR's extensive experience in data systems, MONILOGIC provides:

easy-access top-mounted test points for .080" scope probe tips

1/16" glass-epoxy board with 2-oz. copper on both sides

Size: 3.3" high x 4.65" wide

40 pin Elco Varicon connector

card keyed according to power supply voltage

A full complement of digital logic, analog, and interface card types.

Compatible TTL, DTL, and **HIGH-LEVEL** integrated circuits in dual in-line form, supplemented by discrete components where necessary.

High quality construction featuring test points and Elco Varicon connectors.

System orientation in the functional design of approximately 100 different standard card types.

Special order cards of over 200 different types for a variety of special applications.

Custom-designed cards for greatest economy in specific high-use requirements.

Hardware for card mounting in efficient assemblies, along with power supplies.

CARD TYPES

- Counters
- Registers
- Flip-Flops
- Expanders
- Matrix Gates
- NAND Gates
- Line Drivers
- Line Receivers
- Relay/Lamp Drivers
- A/D Converters
- D/A Converters
- Amplifiers

DTL – TTL – HIGH-LEVEL LOGIC

		DTL	TTL	HIGH-LEVEL
VOLTAGE LEVELS				
	Power Supply (V_{CC})	+4.5v to +5.5v	+4.75v to +5.25v	15v ± 1 volt
	Logic "1"	V_{CC} typical	2.6v typical	V_{CC} typical
	Logic "0"	0.3v typical	0.3v typical	1.0v typical
	Threshold	1.2v typical	1.3 typical	7v typical
PERFORMANCE:				
	Fan-out (to DTL or TTL)	8 typical	10 typical	10 typical
	Device Rate	Up to 8 MHz	Up to 20 MHz	Up to 2 MHz
	System Clock Rate	Up to 5 MHz	Up to 10 MHz	Up to .5 MHz

HARDWARE

Series 90 Drawer Assemblies, accommodate up to 128 **MONILOGIC** cards in a manner which permits top loading when the drawer is withdrawn on its latching slides.

Series 90 **MONIFILE** Assemblies are aluminum frame card files, designed to mount in a standard 19" EIA rack and occupies 5¼" of front panel space.

TIMING EQUIPMENT

AMR TIMING SYSTEM

Model 8379

Timing System Model 8379 provides Atlantic Missile Range Time Codes B1, B2, C1, D1, and D5. The system features automatic or manual WWV synchronization, a WWV receiver, a synchronization oscilloscope, a waveform monitoring oscilloscope, a test point selector switch, and a versatile output patch panel. Models designed for ground station, airborne, or shipborne operation are available.

IRIG TIMING SYSTEM

Model 8020

Timing System Model 8020 generates IRIG Codes A, B, C, and D. The system contains receivers for automatic or manual synchronization to WWV, VLF or LORAN "C". Other features are: a Decimal Time Display in Hours, Minutes, and Seconds, an oscillator stability of 1 part in 10^{10} per day, an oscilloscope for waveform monitoring and fine synchronization, and an output panel for patching time codes and pulse rates to any one of 10AC and 12DC line driver amplifiers.

CENTRAL TIMING SYSTEM

Model 8259

Model 8259 Central Timing System contains a Model 8259-1 Time Code Generator, an oscilloscope, a WWV receiver, a VLF receiver, and a precision frequency standard. The Model 8259 Central Timing System provides an IRIG "B" output with built-in provisions for synchronization to WWV. Stability of the internal frequency standard is 5×10^{-9} per day. A VLF receiver is included for calibrating the frequency standard.

AMR TIME CODE GENERATOR

Model 8379-1

Time Code Generator Model 8379-1 is designed for mobile operation and is suitable for either airborne or shipborne use. Relay and neon output amplifiers are provided. The unit generates AMR Time Codes, Numbers B1, B2, C1, D1, and D5. Solid-state modularized construction permits expanding to additional codes by adding appropriate code generator modules.

IRIG TIME CODE GENERATOR

Model 8020-1

Model 8020-1 Time Code Generator simultaneously generates IRIG Codes A, B, C, and D synchronized to within 1 microsecond. Additional features include: Solid-state printed circuit card construction, taper-pin wiring, propagation delay correction to better than 1 microsecond, digital time retard and advance, parallel binary coded decimal Time-of-Day, and parallel straight binary Time-of-Day in millisecond increments. Other output formats and pulse rates are available on special order.

TIME CODE GENERATOR

Model 8259-1

Model 8259-1 Time Code Generator provides both serial and parallel IRIG "B" outputs. The unit features a decimal display of days, hours, minutes, and seconds, semi-automatic WWV tick synchronization, propagation delay correction, 1×10^{-8} per day oscillator stability, and an optional two hour battery for continuous operation during power failures.

TIME CODE GENERATOR

Model 8134

Model 8134 Time Code Generator is available in options capable of simultaneously generating up to five serial IRIG modulated time codes. Digital advance/retard allows manual fine synchronization. A front serviced projection display provides a decimal indicator of days, hours, minutes, and seconds. The unit contains an unusual self-check feature for operating 1000 times faster than normal. A lamp test feature is also provided.

TIME CODE GENERATOR

Model 8258

Model 8258 Time Code Generator provides four separate, isolated serial IRIG "B" outputs having individually adjustable levels. Parallel BCD outputs representing days, hours, minutes, seconds, and milliseconds, are also provided. The unit features a panel mounted days, hours, minutes, and seconds display plus digital advance/retard for fine synchronization.

CAMERA TIMING UNITS

Models 8021 & 8024

ASKANIA 8021

BOWEN 8024

The Askania and Bowen Camera Demodulators extract remote camera control and timing signals from the IRIG Time Code "B" signal. The units provide relay closures initiating shutter operation and high level neon outputs for film track timing. Three cameras may be started or stopped, remotely and independently, using three camera demodulators with channel selector switches set for three different IRIG "B" control function bit channels.

TIMING TERMINAL UNIT

Model 8205

Timing Terminal Unit, Model 8205, accepts serial IRIG "B" and produces a decimal display of hours, minutes, and seconds. The unit is capable of driving as many as six remote time displays. Optional remote time displays are available in standard and miniature sizes.

TRANSLATOR GENERATOR

Model 8165

Model 8165 Time Code Translator accepts either IRIG "A" or "B" as an input and produces IRIG "A", "B", "C", "D", and "E" outputs. A typical application of the Model 8165 is the distribution of IRIG "A" by radio link to a number of remote sites each having an 8165 translator. A precision internal oscillator provides continuous output time codes even during loss of input signal. Re-synchronization occurs automatically when the input signal returns.

TAPE SEARCH

Model 8193

The Model 8193 is capable of reading either IRIG "A" or "B" serial time codes. It may be used either for Tape Search or as a general purpose display for serial IRIG "A" or "B". A contact closure is provided when the accumulated time matches the value preset by the operator on panel mounted decade thumb-wheel switches. The unit is capable of driving as many as six remote displays.

Metric Systems Corporation produces an assortment of digital equipment ranging in scope from simple logic modules to complex digital instrumentation systems. Digital Systems designed and fabricated by Metric Systems are now in operation on both the Atlantic and Pacific Missile Ranges and most other Aerospace Instrumentation installations. Metric Systems invites your inquiries for solutions to problems involving special applications.

CUSTOM DIGITAL SYSTEMS FROM STANDARD SUBASSEMBLIES

DATA ACQUISITION SYSTEMS

DATA ACQUISITION SYSTEM

Model 8126

Model 8126 Data Acquisition System accepts analog data, digitizes this data, and records the digital data on ½ inch magnetic tape in an IBM compatible format. Front panel controls provide selection of tape speeds and tape packing density. An internal clock is provided for time tagging each frame of data. The maximum sampling rate of the Model 8126 Data Acquisition System is 45,000 samples per second.

SUB-MULTIPLEXING SYSTEM

Model 8144

Model 8144 Sub-Multiplexing System scans 320 low-level input channels at a maximum rate of 200 steps per second. An internal IRIG "B" time code reader is provided for displaying the digitized input voltage of any selected input channel. The multiplexer is designed for low-level input signals in the range of 5 millivolts full scale and features a temperature drift of only 2 microvolts over a 25°C operating range.

DATA ACQUISITION PERIPHERAL

Model 8226

Model 8226 is a computer controlled data acquisition system. The computer performs data analysis, converts to engineering units, and prints out operator instructions. Data is analyzed in real time and recorded for future analysis. The system processes 40 analog channels to .01% accuracy.

AUTOMATIC DIGITAL DATA LOGGER MODEL 8054

The Automatic Digital Data Logger, Model 8054, performs storage, conversion, parity generation, and logging of binary coded decimal (BCD) data generated by the AN/GJQ-9(V)2 Checkout Sequence Programming Set. The input data to this system is recorded on magnetic tape in an IBM compatible format.

The record length is variable and in the case of manual data, is controlled by manual operation of an "end of record" switch. Record length is limited only by the computer or the interface equipment.

MAGNETIC TAPE DIGITAL RECORDING SYSTEM

Model 8266

Model 8266 is basically a digital data formatter and recorder. The unit receives digital data words from several external devices at various data rates. The digital data is stored in a magnetic core memory and recorded on magnetic tape in IBM computer compatible format. The system contains a precision Time-of-Day clock for time tagging recorded data.

DATA ACQUISITION SYSTEM

Model 8176

System Components Include:
- Irig Time Code Generator
- Tape Search System
- Sample and Hold Amplifiers
- Analog Multiplexer
- Analog/Digital Converter
- Magnetic Core Memory
- Magnetic Tape Recorder

System Capabilities Include:
- Accept analog input signals
- Accept digital input words
- High speed A/D conversion
- Prepare tape in IBM format
- Time tag all input data
- Patch panel selects operating modes

TEST EQUIPMENT

DIGITAL MOVING TARGET SIMULATOR

Model 8007M

Simulator Model 8007M is designed for use with "multiple time around" tracking radars. Late model radars, such as the AN/FPS-16 (V) radiate a number of transmitter pulses before the first distant echo is received. To simulate a distant target, the simulator must be capable of receiving several input pulses before producing the first delayed echo pulse. Conventional simulators are not capable of responding to an input pulse before the delay interval is completed. In Metric's Model 8007M Simulator, as many as eighteen (18) pulses may be propagating through the delay section simultaneously.

RADAR MOVING TARGET SIMULATOR/ CALIBRATOR

Model 8220

Series 8220 Radar Target Simulator has been designed for use either as a moving target video simulator or as a precise fixed range calibrator. The simulator is completely digital in operation, controlled by an internal precision VHF frequency standard. Range is preset by decimal thumbwheel switches. The instantaneous range value is available as a parallel binary output word and as an optional numerical display. Overall accuracy is ±3 feet in the internal PRF operating mode. The unit provides precise delay settings corresponding to radar ranges of 100 to 1,000,000 feet. Velocity may be varied from 0 to ±10,000 feet/second. The unit is designed to meet military specifications and has been designated SG903/APM-336V for government procurement purposes.

PROGRAMMABLE WAVEFORM GENERATOR Model 8272

Model 8272 Programmable Waveform Generator output consists of sixteen individually controlled voltage segments which may be individually adjusted to produce any desired pattern. Stepping rate for the segments may be varied from 10 steps per second to one million steps per second or controlled by a pushbutton. The pattern may be reflected to produce a symmetrical 32-segment waveform.

BINARY/DECIMAL & DECIMAL/BINARY CONVERTERS

BINARY/DECIMAL CONVERTER

Model 8025

Model 8025 Binary-to-Decimal Converter is a high speed device for conversion of straight binary words up to 19-bits to their decimal equivalent and displaying the result. A typical application of the Model 8025 would be as a degrees, minutes, and seconds display for a straight binary shaft angle encoder. Any specified multiplication constant can be permanently wired into the converter making it possible to display the input binary word in any convenient unit such as hours, minutes, seconds, miles per hour, radians, degrees, minutes, seconds, etc.

DECIMAL-TO-BINARY CONVERTER CARD

Model Z-253

Model Z253 accepts three binary coded decimal digits on 12 lines and delivers a straight binary word on ten output lines. Decimal-to-Binary conversion is accomplished by a parallel logic matrix providing continuous output information. No external gating or control circuitry is required. The card operates from a single 5 volt power source and uses standard 0 and 5 volt integrated circuit logic levels.

Metric Systems Corporation produces an assortment of digital equipment ranging in scope from simple logic modules to complex digital instrumentation systems. Digital Systems designed and fabricated by Metric Systems are now in operation on both the Atlantic and Pacific Missile Ranges and most other Aerospace Instrumentation installations. DIGITAL DATA COMMUNICATIONS EQUIPMENT

COMPUTER TO COMPUTER

The Model 8114 Data Transmitter (Output Buffer) and the Model 8114 Data Receiver (Input Buffer) form a complete two-way data transmission link between two digital computers. Data is transmitted at a rate of 2400 bits/second on Class 4B telephone lines. A single Model 8114 Transmitter/Receiver provides 4 separate channels each having a capability of transmitting 2400 bits per second. Two separate error detecting codes are employed to verify the quality of the data transfer.

POINT TO POINT

Model 8033 Data Distribution System transmits up to 80 channels of digital data from a centrally located transmitting station to any number of remotely located receiving stations. A complete Data Distribution System consists of a single 8033-1 Transmitter Unit located at the central transmitting station and an 8033-2 Receiving Unit located at each receiving station. The Transmitting Unit accepts up to 80 separate parallel input data lines and converts to a single serial output line suitable for transmission by a radio link. The Receiving Unit accepts the single line serial information and reconstructs the original 80 channel input data. Each of the 80 data channels may be operated at bit rates as high as 1000 bits per second producing a serial bit rate as high as 80,000 bits per second.

REMOTE LOCATION TO COMPUTER

HIGH DENSITY DATA TRANSMITTER

MODEL 8062

Model 8062 High Density Data Transmitter will accept serial Azimuth, Elevation and Range data words from a radar set. Timing pulses and a parallel time word are obtained from a time code generator.

The transmitter will accept 17 serial bits of Azimuth and Elevation data, a 20-bit Range word and two 36-bit auxiliary words which may be manually set in through the use of front panel switches.

LOW DENSITY DATA TRANSMITTER

MODEL 8031

Model 8031 (CASY II) receives digital Radar Acquisition Data from a 7094 computer in the form of three 13-bit data words, 6 auxiliary bits and one sub-synch. The words are parallel dumped into a 45-bit input buffer register, transferred to a shift register and shifted out serially at 480-bits/10 frames per second rate.

The output bits modulate a 1920 CPS carrier to drive a standard 600 ohm telephone line. An internal test generator is provided which is capable of simulating computer commands.

MULTIPLE RADAR DATA TRANSMITTER

MODEL 8023

Model 8023

Real Time Data System, Model 8023, is the entire digital data link between 4 AN/FPS-16 radars and a Univac 1218 computer. Interrogate and Shift commands generated by the system are transmitted to the 4 radars. Incoming digital radar coordinate words are tagged with 9-bit identification and 23-bit time information, converted to Univac format, stored, and fed into the computer upon command.

Metric Systems Corporation produces an assortment of digital equipment ranging in scope from simple logic modules to complex digital instrumentation systems. Digital Systems designed and fabricated by Metric Systems are now in operation on both the Atlantic and Pacific Missile Ranges and most other Aerospace Instrumentation installations. NATEL

PHASE SENSITIVE DEMODULATORS & AMPLIFIER DEMODULATORS

Natel's miniature solid state AC to DC Converters (amp-demods or carrier-demods) convert low level phase sensitive suppressed carrier AC input signals to a linearly proportional high level bi-polar DC voltage or current. The amp-demod provides a high input impedance and low output impedance with greater than 50 megohms isolation between input, output, and reference.

Amp-demods are designed for airborne and ground instrumentation and control applications—to operate subcarrier oscillators, meters, galvanometers, recorders, valves and servos.

SINGLE & MULTI-RANGE AMPLIFIER DEMODULATORS & DEMODULATORS

DEMODULATORS	D500	D600	—
AMP DEMODS	D6006	D7006	D8006
Linearity	±.5% E_o or ±5 MV	±.1% E_o or ±2 MV	±.05% E_o or ±1 MV
E_{out}	C*, F, G, J, K		
Z_{out}	1KΩ to ±5VDC E_o, 2KΩ ±10VDC E_o (3KΩ Demod Only)		
Freq. Response	20% of carrier	10% of carrier	5% of carrier
Ripple P-P	.5% or 3 MV	.1% or 1 MV	.05% or. 5MV
Null Offset	Adj. to zero ±1 MV		
Threshold	.01% of FS		

SINGLE RANGE MODEL					MULTI-RANGE

Dimensions (inches)	1.53x1.53 x3.03	1.03x1.03x1.53, Connector P 1.34x .79x1.72, Connector V			2.53x2.53x2.53	
Connector	(P) — Min. Plug-in,(S) — Solder Hook, (V) — DE9P Connector					

FEATURES:

- Isolation 50 megohms between input, output, and reference.
- Short circuit polarity protection
- Input over-voltage protection — 100 E_1 115 vrms max
- Quadrature rejection 60 db
- CMR: 60 db min DC to ref frequency — 30 v p-p max CMR signal

GENERAL SPECIFICATIONS:

- Frequency: 400 — 1000 Hz std
- Input Impedance: 500K (above 350 cps)
- Output Voltage: (F) ±2.5, (G) 0 — 5.0, (J) ±5 vdc, (K) ±10 vdc, (C)* $E_o = E_{in}$ (Demod Only)
- Ref. Amplitude: 5, 6.3, 10, 26, 115 vrms, @ 50 mw, Fixed (specify) w/ref amp 1 mw (Amp Demod Only)
- DC Power: 25-31 v, or ±15 @ 10-25 ma (depending on model) (Amp/Demod Only)
- Null Stability: 20 uv/°C referred to output
- Gain Stability: ±0.0025%/°C of full scale
- Range to Range Calibration: .1% F.S.

OPTIONS:

- Non Phase Sensitive Models available with comparable Input Levels.

ENVIRONMENTAL SPECS:

PRINTED CIRCUIT MODULE

HAS ACTIVE FILTER OUTPUT

Flatpack Model 6106 amplifier demodulator incorporates a standard two-pole active filter output with up to a six-pole Butterworth filter optionally available.

The unit provides outputs up of ±10 vdc or an alternate output of ±10 ma into a 200-ohm load. The input-to-output transformation ratio is 50 (for example, 200 mv rms input = 10 vdc output). Linearity is better than ±0.25% of reading or ±2.5 mv d-c. Null offset with internal adjustment is specified as 1 mv or 0.5% of full scale. Designed specifically for printed-circuit board installation. Contact factory for complete Data Sheet.

NATEL

TRANSDUCER - AMPLIFIER SYSTEMS or INDICATORS

Transducer Amplifiers are available as multiple channels (6-8) per system, single channel indicators or airborne modules. Designed for static/dynamic measurements and/or control, the amplifiers condition low level AC signal inputs from LVDT, RVDT and strain gages and interface with strip chart recorders, galvanometers, servo controls, VCO's and data processing equipment.

Extremely versatile, the amplifiers operate with a wide variety of transducers without requiring special tailoring or auxiliary modules. Greater freedom in transducer selection eliminates interface problems. Incorporating a unique concept for balancing, "UNIVECTOR" 360 degree phase shift can be achieved which enables operation with cable lengths exceeding one mile.

The accuracy, sensitivity, dynamic response, and stability offered generally exceed the geometry of the physical measurement such as dimensional stability mechanical hysteresis, and thermal expansion.

STANDARD PERFORMANCE CHARACTERISTICS ARE:

Input:	0.5 mv — 1.0 vrms (100 micro inch F.S. typical)
Gain Ranges:	12 positions, binary or 1, 2, 5 decade
Accuracy:	±0.1, ±0.25, ±0.5% of reading
Frequency Response:	−3db @ 10%, 20%, 40% of carrier, 40 K Hz max.
Overshoot:	10% max.
Ripple:	0.1% or 0.5% F.S. (p-p)
Threshold:	.01% F.S. (.01 micro inches, 10 micro strain/inch)
Carrier Frequency (Isolation Exc. Amplifier/Channel)	
Amplitude:	5 or 10 vrms C.T.
Frequency:	2 - 100 Kc
Power:	0.5 watt
Reference Phase Adj.:	±90° std., 1° resolution
Balance Controls:	"R" and "C" balance of UNIVECTOR balance
± Shunt Calibration	
Meter*:	6" single channel indicator, ½% accuracy 2" multi channel system, 2% accuracy calibrated % full or engr. units
Limit/Overload Detector*:	Limits adjustable
Expanded Range*	
Power Output*:	1 watt, 10 v @ 100 ma
Power Required*:	115 vrms, 60-440 Hz, 24-32 vdc or 11-15 vdc

* Optional

APPLICATIONS:

- Weighing - Mixing
- Stress/Strain
- Displacement
- Pressure
- Force - Thrust
- Servo Controls
- Torque
- Flow - Velocity
- Vibration Analysis
- Biomedical

Consult factory referencing System Series #2085

PHASE SENSITIVE MODULATORS

Natel's miniature solid state sinewave modulators convert DC input signals to linearly proportional AC output signals. Phasing of the output signal is determined by the polarity of the input signal.

Input, output, reference and DC supply signals are completely isolated from each other. Typical applications include:

- Algebraic summing of multiple input signals
- Summing the output signals with other AC signals in closed loop control systems
- Drive servo motor directly using high power modulator

FEATURES:

- Null — .1% of full output
- Phase shift — 2° max. between reference and output
- Input overvoltage — 150 vdc max.
- Modulation intelligence — 20% of carrier
- Gain stability — .005%/°C (−55°C to +71°C)
- Isolation — Input, Output, Reference and DC supply isolated from each other by 50 megohms
- Distortion — 2% max.

NATEL

SYNCHRO CONVERTERS
SOLID STATE

ANALOG - DIGITAL or BOTH. Natel has a synchro converter fitting the requirement!

All models incorporate the nonvariant features required when using synchros or resolvers as transducers.

Model 431 is used in radar display systems by converting input signals to DC sine and DC cosine voltages, compatible with deflection coil circuitry of radar PPI's. The non-variant characteristics compensate for varying line voltage conditions typical in radar systems. Solid-state techniques prevent the hunting and spoking problems of electro-mechanical converters. Units are available as encapsulated plug-ins or open-frame printed circuit boards.

The Model 406 provides one linear (±6 min) DC voltage directly proportional to the angle input. Its reliability and accuracy have found applications in all environments from sub-surface to space! Incorporating one or several available options as needed, provides an extremely versatile sub-system. The 4060 and 4061 add digital capability to the conversion techniques of the 406. These synchro to digital converters are compatible with existing digital systems, and readily adaptable to special requirements. Outputs of all units can be factory scaled to reflect any required engineering unit.

PRECISION DIGITAL-TO-RESOLVER SYNCHRO AND RESOLVER/SYNCHRO

NORTH ATLANTIC *industries, inc.*

Digital To Resolver/Synchro Converters

These units provide a complete high-speed interface from digital to analog systems, enabling precise simulation of resolver/synchro data. All converters feature semi-conductors, integrated circuits, and precision trigonometric transformers. Basic models use 400 Hz as the signal data frequency, with optional operation at other frequencies from 50 Hz to 10 KHz. A variety of system-oriented options are available in each model, and multi-speed or multi-channel systems can be provided.

Series 538

Model 660

Model 508/10

Model 480/31

Series 538—Digital-To-Resolver/Synchro Converters

The Series 538 D/R-S Converters offer 9- to 17-bit single speed resolution with digital input as binary angle. The input register is strobed and the digital data is then held until the next strobe. The internal logic selects the appropriate trigonometric transformer taps, thus simulating actual 4-wire resolver or 3-wire synchro data at the selected line-line voltage. Built-in protection circuits are provided for power-line voltage and frequency transients, overload and short-circuit. The Model 538/30 "shoebox" unit provides 9- to 13-bit resolution with 6-minute accuracy and the Models 538/10 (full-rack) and 538/20 (half-rack) converters provide 14- to 17-bit resolution with better than 1-minute accuracy. Options include 50 Hz to 10 KHz signal data frequencies, special input logic and multi-speed outputs. Series 536 D/R Converters and Series 537 D/S Converters are also available as single-mode units.

Model 660—Digital Angle Generator

The Model 660 Digital Angle Generator provides digital angle input data and data strobe signals to the Series 538 D/R-S Converters. Useful in semi-automatic test system applications, static data angles and angular data rates from 1 arc-minute/second to 2000°/second can be generated from an internal or an external clock. Typical optional features include 2-speed digital data output and start/stop angle.

Model 537/31—MIL-T-21200 D/S Converter

Designed and qualified to MIL-T-21200, the Model 537/31 Digital-To-Synchro Converter accepts binary inputs, provides solid-state-switched, precision trigonometric transformer conversion to 90 V and 11.8 V line-line synchro signals to an accuracy better than 50 arc-seconds with built-in short-circuit protection. Computer-related functions include "acknowledge" pulse, "busy" pulse, and 1 MHz clocked input serial data. Design MTBF of 13,000 hours.

Digital-To-AC-Converters

Model 508/10—Digital-To-AC Converter

In automatic test systems, this solid-state-switched, a-c ratiometric converter can be directly programmed from a punched card reader, a paper tape reader, or a digital computer. Featuring BCD digital data input with 10-microsecond data acceptance, the Model 508/10 400 Hz D/AC Converter has a ratio of zero to unity with 5-decade (BCD) resolution and is accurate to .005% (50 ppm). Also available is the Model 508/11, which accepts a pulse train input and provides an a-c ramp output. Higher accuracies, different resolution, and inversion mode are available as specific options.

A/D-D/A Converters

Model 480/31—A/D-D/A Converter

Designed and qualified to MIL-T-21200, the Model 480/31 A/D-D/A Converter is a state-of-art device incorporating 16 multiplexed A/D conversion channels and 11 D/A channels. The A/D Converter has bipolar ranges up to 32 vdc with measurement accuracy to 0.02% full scale. The D/A Converter provides non-inverted and inverted ratio conversion with 25 vdc output and a maximum conversion time of 600 msec, with accuracy to 0.01%. Computer-related functions include channel selection and read command. Featured are a self-test mode and module fault isolation. Design MTBF of 14,000 hours.

TO-DIGITAL COMPUTER-INTERFACE, AND ATE EQUIPMENT.

Resolver/Synchro To Digital Converters

These converters provide a complete high-speed interface from analog to digital systems through continuous conversion of analog resolver and synchro data into digital data at angular velocities up to 20,000°/sec. High-speed continuous tracking is achieved through use of a unique electronic servo technique which provides velocity constants to 200,000 sec^{-1} and eliminates any data staleness errors. These 400 Hz converters feature semiconductors, integrated circuits, and precision trigonometric transformers. A wide selection of application-oriented options including operation at other frequencies from 50 Hz to 10 KHz are available in specific models. Multi-speed and multi-channel systems are also available.

Model 545—Automatic Angle Position Indicator

This instrument is offered with .01° resolution and accuracy or with .001° resolution and 10-second accuracy for all line-to-line voltages from 11.8 to 90 V at 400 Hz. The digital angle is both displayed and available in BCD format at the rear connectors. Remote or front-panel selection of resolver or synchro input, line-line voltage range and operating mode. Operating modes selected as Track (the instrument continuously follows the input data), Update (the instrument tracks for 200 msec, then holds until receipt of another command), and Auto-Update (repetitive track/hold sequences) with a Variable Display Time of .5 to 3 seconds. Optional remote readout, analog d-c null output, data freeze command, signal frequencies 50 Hz to 4.8 KHz, multiplexed and multi-speed units.

Model 546/31—Synchro-To-Digital Converter

Designed and qualified to MIL-T-21200, this model converts 11.8 V line-line 400 Hz synchro signals to 16-bit binary angle data on 10-multiplexed channels. The accuracy is .01° with tracking speed to 20,000°/second and velocity constant of 200,000 sec^{-1} with input channels programmed by logic level address signals. System-related functions include self-test at 60° increments, and module fault isolation. Computer-related functions include "read command," 1 MHz clocked output serial data, "data ready" and "acknowledge" signals. Design MTBF of 10,000 hours.

Building Block 54

A special version of the Model 545 designed as a part of the GPATS (General Purpose Automatic Test System) system. It operates from 50 Hz to 5 KHz, includes module fault isolation, and provides digital output without display.

Angle Position Indicators

High-speed performance 400 Hz servos for field test and production test measurement of synchro and resolver transmitters. The half-rack API-8025 provides accuracy of 6 arc minutes, repeatability of 30 arc seconds, and slew speed of 25°/second with a digital readout display. Optional retransmit components, dual-mode, and two-speed operation. Also available for operational use, 2" and 3" diameter units.

PACIFIC RADIONICS

FEATURES LP1000

- COMPUTER CONTROL OF TEST INSTRUMENTS
- AUTOMATIC DATA ACQUISITION
- PRINTED DATA
- ANALYTICAL & COMPUTATIONAL ABILITY

PLUS

- Unlimited adaptability through hardware input-output options: BCD, binary or analog—10 or 15 bit conversion.
- Multiple channel in or out by time multiplex.
- High speed sample and hold data acquisition.
- Utilizes the memory and computational power of the time-shared computer.
- Eliminates the need to buy and program a computer.
- Completely compatible with most network analyzers.
- One step data acquisition and computation— no time wasted loading separate taped programs . . . no dead time.
- Interaction with any existing program easily accomplished by "building block" subroutine programs which are provided.
- A complete built-in test routine, involving 100 test readings and 1000 computations, accomplished in less than one minute.
- Extra data channels can be used to monitor crystal outputs or any other desired parameter.
- All equipment compatible with dedicated computer by minor alterations, if required.
- The LP 1000 will never be obsolete . . . . if you can justify your own computer, you make the LP 1000 a part of your total system.

OPTIONS

ANALOG TO DIGITAL CONVERTER

Input: 0 to + 5V or -2.5 to +2.5V or 0 to +10V or -5 to +5V

Input Impedance: 1.0 megohm

Resolution: 10 bits ± ½ LSB

DIGITAL TO ANALOG CONVERTER

Output: 0 to +5V or -2.5 to +2.5V or 0 to +10V or -5 to + 5V

Output Current: 25 ma (max)

Resolution: 10 bits ± ½ LSB

16 CHANNEL ANALOG MULTIPLEXER

Commutating Rate: 200 K Hz

Channel Identification: Binary, 4 bits

Digital or Analog Input

SPECIFICATIONS

Computer Interface: Standard E.I.A. levels, ASCII code

Primary Output: 16 bits binary

Parallel Input: up to 40 bits binary information

Auxiliary Output: 4 bits of binary data are available for relay closures (one of 16) for commanding the environment

Power Requirement: 115 Vac ± 10%, 50-500 Hz

Size: 19-¾ in. W x 18 in. Dp x 9-½ in. H

DIGITAL CLOCKS

SOLID STATE—ELECTROMECHANICAL

For computers, data logging, missile launch count-down display and control. Multi-channel digital time programming for control of automatic processing and radio/TV broadcasts. Variety of logic outputs compatible with most data readout devices. Single or multiple remote glow-tube or projection-type time displays.

SOLID STATE CLOCKS

For countdown and/or elapsed time, time-of-day. Combined calendars provide day-of-year or month-day. Various time bases, time data output formats and displays available.

features:

- Integrated circuits used for basic logic.
- Front panel display Seven Bar Nixie or projection type.
- Logic output compatible with standard recording devices.
- Options: Battery operation, variety of time bases, variety of time ranges, multiple display.

Write for Tech. Bulletin No. 470-33

ELECTROMECHANICAL DIGITAL CLOCKS

Time resolution down to one second. Single or multiple isolated contact closure outputs in 10-line decimal, teletype code, and/or any BCD format. Wide choice of number and type of time displays.

features:

- Time Synchronized to line frequency or external pulse input.
- Countdown/elapsed time or real time.
- Outputs interface readily with digital systems.
- Special time-controlled pulse closures available.

Write for Tech. Bulletin No. 1066-27

AUTOMATIC RACE TRACK TIMING SYSTEMS

Automatically measures and displays the precise quarter mile times and finish time for all types of races and for all race distances. Designed for operation by non-technical personnel.

features:

- All solid state electronics.
- For track, turf, and harness races.
- Output drives two tote board display units.
- Automatically programs photocells for selected race distances.

WRITE FOR DESCRIPTIVE LITERATURE

DIGITAL TIME PROGRAMMERS

Standard units accept time data inputs from solid state or electromechanical digital clocks and provide any number of precisely timed signal outputs as pre-selected by the wiring of one or more program plugs.

features:

- Programmed time interval accuracy well within the clock resolution.
- Display of output channel numbers and status available.
- Complete program changed in seconds by replacing program plugs.

Write for Tech Bulletin No. 566-24

COUNT/DOWN, COUNT/UP DIGITAL CLOCKS

Used in missile launch, testing, radio-television — anywhere time is counted down, then afterward elapsed time is observed.

features:

- Available with digital logic output or for programming and recording.
- Plus minus count in most time ranges and resolutions.
- Projection type or Nixie displays.
- Standard system operates up to 40 displays.

Write for Tech. Bulletin No. 162-16A

DIGITAL CALENDARS

Provide nonambiguous contact closures in parallel form corresponding to date in Month-Days (months from 01 to 12, days from 01 to 31) or Day-of-the-Year (from 001 to 365). Used in data logging, process control or other date of time oriented systems.

features:

- May be ordered in Month-Day or Day-of-Year Models.
- Outputs in decimal or various codes of binary coded decimal.
- Projection type or Nixie displays.
- Switch for leap year correction.

Write for Tech. Bulletin No. 1066-29

RAYTHEON Analog-to-Digital Conversion Equipment

Raytheon Computer builds an extensive line of analog-to-digital conversion equipment, including basic ADC's, multiplexing ADC's, simultaneous sample-and-hold equipment, and multiplexing equipment. This equipment is available in single or multiple channels and in a variety of physical configurations *completely wired, tested, and documented.* Resolution is available in 10-bit, 12-bit, and 15-bit binary, and in 3-digit BCD.

Multiplexing ADC Raytheon Computer multiplexing ADC's (Miniverters™) feature a MOS-FET multiplexer, a sample-and-hold amplifier, and an A/D converter in a single chassis. A variety of options in packaging, speed and performance is available. The units are supplied fully wired and tested in connector block assemblies or case-mounted.

The 15-bit unit, referred to as the Multiverter III®, features 100KHz throughput and low power consumption. The high-performance ADC has an accuracy of 0.01%. It's all contained in less than 200 cubic inches. The unit is available in a connector block or case-mounted with front panel controls and indicators.

Basic ADC For convenience and versatility, Raytheon Computer offers basic A/D converters supplied fully wired and tested in connector blocks or case-mounted. The low-cost converters feature high packing density and are extremely flexible when used as building blocks in conversion systems.

Simultaneous Sample-and-Hold This equipment is available with up to 8 channels of medium or high performance sample-and-hold amplifiers in a single connector block. Standard input range is ±10 volts full scale.

Multiplexing Up to 48 channels of multiplexing and control is available in a fully wired and tested single connector block. This unit is ideally suited for expansion of your conversion equipment.

RAYTHEON

RAYTHEON Digital-to-Analog Conversion Equipment

Digital-to-Analog Converters. Digital-to-analog conversion equipment is available from Raytheon Computer in a wide range of configurations and types. Resolution of 10 and 12-bits binary is provided. (Consult the factory for availability of 14 and 15-bit resolution.) Capacities range from single channel DAC's contained on 2 printed circuit cards to up to 48 channels rack mounted with front panel controls and indicators. The units are all high speed, low cost DAC's with high packing density.

The rack mounted configurations (standard 19-inch Retma) are fully assembled, *wired and tested,* and contain the necessary drive and storage electronics. They also offer several options such as front panel controls, computer interface and power supplies. Up to four channels of D/A conversion can be provided fully wired and tested in a connector block assembly. These units include input storage register, output operational amplifiers, reference supplies and data and address drivers.

Analog Data Distributor. Raytheon Computer offers a low-cost Analog Data Distributor consisting of a 12-bit DAC, a high current driving amplifier, up to 64 analog output sample-and-hold amplifiers and all the necessary power supplies and controls. The system accepts digital information from a computer, along with address information, converts the data into equivalent analog form and distributes it to the selected output holding amplifier. The overall system is comprised of an analog data distributor master drawer and additional distributor slave drawers.

Typical DAC Performance Characteristics

Output Voltage	±10 volts full scale
Output Current	5 ma at 10 volts
Output Impedance	0.1 ohm at dc
Accuracy at 25°C	
10 bit	±10 mv
12 bit	±5 mv
Settling Time	
10 bit	25 μs to rated accuracy
12 bit	10 μs to rated accuracy

Analog Data Distributor Performance Characteristics

Channel Capacity	
Master Drawer	64 channels
Slave Drawer	96 channels (2 slaves max)
Resolution	12 bits including sign
Analog Output	±10 volts at 5 ma
Refresh Rate	40 KHz max
Droop Rate at 25°C	0.1% full scale in 100 ms 0.05% typical
System Accuracy	0.05% full scale ±½ LSB
Linearity	0.03% full scale ±½ LSB

Analog Cards

Accessory analog cards are offered by Raytheon Computer to assist you in designing your system. M-Series integrated circuit analog cards are high-performance functional circuit cards designed for system integration. These cards allow the system designer to expand basic A/D and D/A conversion equipment at a very reasonable cost.

The following analog cards are offered:

MAM1 — 8-channel multiplexer
MSH1 — Sample-and-hold amplifiers
MSH2 — High-performance sample-and-hold amplifiers (0.01%)
MDA2 — 10-bit D/A converter. Output = ±10V full scale at 5 ma
MDA6 — 12-bit D/A converter
MDS2 — 10-bit data storage
MDS8 — 12-bit data storage

The M-Series analog cards have many outstanding design features. The cards are compact, measuring only three by 3.65 inches. The one-sixteenth inch thick glass epoxy card is made of flame retardant FR4 material per MIL-P-13949. Convenient features are designed into the cards, such as: eight signal and one ground test points, plainly marked components and connectors, color-coded functions, and polarized key slots to prevent incorrect insertion. Power supply decoupling is provided on each card. Connections are provided through a 40-pin etched connector.

Hardware and Accessories

A complete line of hardware and accessories is offered by Raytheon Computer for conveniently implementing your system. The hardware features rugged construction and is mechanically compatible to simplify and reduce assembly and checkout time.

A wide choice of connector blocks, case configurations, and accessory items are offered. The line includes power supplies and indicator assemblies and assorted extender cards, cable cards, and card extractors. Raytheon Computer also offers automatic wire wrapping and a selection of design aids for documenting your system.

Here are just a few examples of the items which are offered:

- Standard 19-inch Retma rigid and hinged frames for compact organization of your digital equipment accommodating from 40 to 200 cards plus power.
- Modular power supplies for indicator lamp assemblies and logic power.
- Laminated bus bars for power and ground bussing.
- Sub-miniature connector blocks for mounting logic cards; fully compatible with automatic wire wrap.
- Wire wrapping guns and accessories.

RAYTHEON COMPUTER • 2700 SO. FAIRVIEW ST., SANTA ANA, CALIFORNIA, 92704, (714) 546-7160 TWX 910-595-1570 **RAYTHEON**

Raytheon Computer 700 Series 16-Bit General Purpose Computers

The Raytheon Computer 700 Series provides you with a complete range of 16-bit, general-purpose computers for on-line, real-time applications. All the processors in the 700 Series are identical except for cycle times. So you can choose from a range of 900ns, 1.5μs or 1.75μs cycle times. Then if your requirements change, you can change the CPU without any software penalties. Programs written for one machine will run on any other machine with no changes. Because of this compatibility, whichever 700 Series computer you select, you have a library of over 400 programs and subroutines to choose from.

Raytheon 703

The Raytheon 703 Computer is designed for real-time, multi-programming applications where its interrupt system and real-time instructions can be exploited. Hardware-software architecture allows easy expansion from a 4K word processor with ASR 33/35 terminal to a 32K word system with disc and other major peripherals. The 703 has a 1.75μs cycle time and 74 powerful instructions. The basic configuration includes a 4K memory with ASR 33 terminal and a software package with ASA real-time FORTRAN IV, a real-time monitor, an integrated executive system and the SENSOR hardware diagnostic program.

Raytheon 704

The new Raytheon 704 Computer provides large computer capability and compatibility at a reasonable price. The 704 is instantly useable with more than 400 proven programs and subroutines available off-the-shelf. The basic 704 includes 74 instructions, word and byte manipulation, 1.5μs full cycle time, a real-time automatic priority interrupt system, direct I/O to the CPU and four addressable hardware registers. The 704 becomes even more powerful by adding a real-time clock, hardware multiply/divide, high-speed direct memory access and other available options. The 704 is expandable from 4K to 16K words of memory. A very useable software package is included with the basic hardware.

Raytheon 706

The Raytheon 706 Computer is a 16-bit systems computer developed for multi-programming applications. The 706 features a 900ns cycle time word memory, expandable from 4K to 32K in 4K increments. Special features include memory protect, hardware bootstrap and parity check. The 706 is systems oriented with both byte and word addressing and manipulation, direct memory access, direct input/output to the central processor and a 16-level priority interrupt scheme. The standard software package includes real-time ASA FORTRAN IV, real-time monitor, X-Ray EXEC operating system, and the SENSOR hardware diagnostic program. The 706 has four addressable registers with one hardware index register. A total of 74 instructions are available.

PRESTON SCIENTIFIC also manufactures Instrumentation Amplifiers and Oscillators. See EEM Section 1100 Page 1348 . . . Digital Voltmeters, Panel Meters and Multimeters. See EEM Section 2900 Page 769. For the location of your nearest PRESTON representative refer to the Yellow Section.

REMEX Photocell Punched Tape Readers and Spoolers

"The Standard of the Industry"

Complete range of speeds to 1000 character/second ■ Automatic adjustment for 5, 7 or 8 level punched tapes ■ omplete with integrated circuit amplifiers and control circuits ■ Unidirectional or bidirectional ■ Rugged, precision mechanical construction ■ Regulated power supply ■ No contacts to wear out or cause errors due to bounce ■ Ultra soft take-up feature in all spoolers ■ No extra charge for rack mount units ■ Self-adjusting brakes on all reader models ■ Fiber-optics ■ 15,000 hour quartz light source

Standard Readers

REMEX tape readers are available with operating speeds to 1000 characters per second. Some of the operating features are:

- Fused Quartz Iodine light source.
- Fibre optic light conduction system.
- TTL/DTL integrated interface logic.
- Automatic tape transparency compensation.
- Pluggable options and rugged construction.

Standard Spoolers

REMEX tape spoolers are high performance bidirectional units ideally suited to the corresponding REMEX photocell readers as well as general use with other peripheral products. Some of the operating features are:

- State of the art servo system.
- Provision for 8" and 10½" diameter reels.
- Broken tape sensing.
- Remote low level rewind.

Combination Reader/Spoolers

REMEX tape reader/spoolers which operate at speeds to 500 character/second are available with the following additional features.

- Reel sizes from 4⅝" to 10½".
- Compact size relative to the functions performed.
- Minimum required system interface.

Punched Tape Duplicator-Verifiers

REMEX RDV-225 tape systems provide a family of nine tape duplicators, verifiers and duplicator verifiers with the following features:

- High speed duplication at 175 or 225 character/second.
- High speed verification at 175 or 500 character/second.
- Read after punch verification at the punching station.
- Automatic tape allignment to a selectable code.
- Odd or even parity error check.
- Skip block and/or delete codes.
- Auxiliary input for keyboard or equivalent.
- Manual inputs for switch selectable data.
- Reel types — 7½", 8" and 10½".
- Computer interface compatible.

Typical applications include tape processing for users of numerical controls, special purpose computer, test equipment and related industries.

SEALECTRO

SEALECTROCARD™ CARD, BADGE AND TAB READERS

10x10-10x12 BADGE READERS

Completely automatic Badge Readers that accept standard IBM and Friden Type Badge cards in 10x10 or 10x12 formats. Ideal for personnel identification, production control and process control operations.

Go/no-go lights immediately indicate if the card is inserted correctly. No contacts actuate until the card is properly inserted. Remote solenoid-operated contacts sense hole patterns and read. Reaa function is automatically held until feedback from system releases contacts and card is automatically ejected. Flexible output wiring allows bussed or discrete contact interface connections.

12x80 CARD READER

The Sealectrocard card reader is designed to be completely compatible with all standard 12 x 80 TAB type punched-cards. This unit combines features which provide maximum reliability, convenience and economy in programming. The 12 x 80 Sealectrocard is ideally suited as peripheral equipment for a wide range of computers or as a programming device. Programs consisting of up to 960 bits of information can be read instantly from conventional punched-card formats. Features include:

- Remote contacts with double contact wiping surfaces.
- Positive mechanical lockout if a card is mis-orientated.
- Wide choice of terminations.
- Simple, fast operation even by unskilled personnel.

12x51 TAB READER

Accepts and reads standard 80 column TAB card, but limits read area to 51 columns, providing 612 bits of information. Ideal for data acquisition in production control and other terminal operations of data processing systems not requiring full 960 point readout.

Completely foolproof. Correct orientation and positioning of card electrically interlocks operating handle eliminating faulty readouts. Card is inserted in insertion slot, handle pulled down to read position, and unit is in operation.

Utilizes same electrical contact assembly as 12 x 80 Reader. Can be bussed vertically or horizontally. It may be used with completely discrete circuitry for each of the 612 points.

D-A and A-D Converters

MULTIPLEXED SYNCHRO TO DIGITAL

SERIES 1601
All solid state converters convert up to 8 mixed synchros or resolvers to binary digital output. A three line address selects the input to be converted. Upon receipt of a start conversion pulse, conversion of the addressed input begins. The output appears in a storage register and is retained until the next conversion command. Over 300 conversions per second may be made.

SYNCHRO/RESOLVER INPUTS: 400 Hz, 11.8V or 90 VRMS line-to-line.
AC REFERENCE: 26V or 115V RMS
DIGITAL OUTPUT: 12 bit binary MSB 180°
DATA LEVELS: TTL-DTL
STATIC ACCURACY: six minutes
CONVERSION TIME: 3.6 milliseconds max.
OPERATING TEMP.: 0 to 70°C
PACKAGE: 10 x 6 x 5" metal case plus connectors. Converter is mounted on plug-in P.C. boards
OPTIONS: Up to 64 channels input, 60 Hz Synchro or Resolvers, one millisecond conversion time, 19" rack mounting, −55 to +85°C operation

DIGITAL TO ANALOG CONVERTERS

SERIES 1800
Converts up to 13 bit digital input to DC output. These miniature low cost converters contain their own reference.

DIGITAL INPUT: 8, 10, 12, or 13 Parallel, DTL-TTL compatible.
OUTPUT VOLTAGE: 0 to +10V, Output impedance: 1 Ohm max.
LINEARITY: ½ LSB
SETTLING TIME: 10 μs max (to 1 LSB)
OPERATING TEMPERATURE: 0 to 70°C or −55 to +85°C.
TEMP. COEFFICIENT: ± 20 ppm of FS/°C.
DC POWER: ± 15V ± 3% at 30 MA
PACKAGE: Metal case 1.53 x 2.03 x 0.75"H plus P.C. terminals and studs on base.
OPTIONS: 300 nanoseconds settling time, bipolar DC or AC output

ANALOG TO DIGITAL CONVERTERS

SERIES 1500
Are miniaturized analog to digital converters which, on command convert a D.C. input, to 8 or 10 bit digital output

DC INPUT: 0 to +10V into 10K ohms min.
DIGITAL OUTPUT: 8 or 10 bits parallel, DTL-TTL compatible.
CONVERSION TIME: 25 microseconds max.
RELATIVE ACCURACY: ½ LSB
TEMP. COEFFICIENT: ± 20 ppm of FS/°C.
OPERATING TEMPERATURE: 0 to 70°C or −55 to +85°C
DC POWER: ± 15V ± 1% at 70 MA each and 5.2V ± 0.3V at 300 MA max.
PACKAGE: 0.75" H. x 2.03 x 4.03 metal case with P.C. terminals and 4 mounting studs.

SYNCHRO TO DIGITAL CONVERTER

SERIES 1623
Synchro/Resolver to Digital Converters convert all standard synchros or resolvers to binary or BCD output. Three modes of self or slave operation enable easy interfacing with computers and data processes.

INPUT: Synchro or Resolver or both, 60 or 400 Hz, 11.8 or 90V line-to-line, 26 or 115V RMS line.
DIGITAL OUTPUT: 12 bit parallel binary register, DTL-TTL compatible, MSB 180°, or 4 decade BCD.
CONTROL MODES: (a) Internal Convert and update; (b) External Command Convert and Update; (c) External Command Convert, Internal Update
CONVERSION TIME: 2.4 ms Max. In internal mode, conversion time adjustable down to one conversion in 3 seconds.
CONTROL OUTPUT: Data ready pulse of 100 ns nominal width appears when conversion is complete
STATIC ACCURACY: ± 1 LSB
OPERATING TEMPERATURE: 0 to 70°C
DC POWER: ± 15V ± 2V at 50 MA max and + 5V ± 10% at 350 MA max.
PACKAGE: Furnished on 4½ x 12 P.C. plug-in board

TRANSMAGNETICS INC.

134-25 Northern Boulevard • Flushing, New York 11354 Phone: 212-539-2750

Solid State Synchro Drivers

Transmagnetics solid state synchro drivers will drive torque receivers, control transformers and differentials. Torque receivers, in particular, are difficult loads, drawing large surges on turn-on or with step changes. Years of design effort have resulted in the Transmagnetics line of drivers with protection against short circuit and synchro load malfunction but with the required surge current drive capability for synchro operation without "hang-up"

SINE-COSINE TO SYNCHRO OUTPUT

76 SERIES
ccepts DC Sine and Co-
ine inputs and generates
hree-wire synchro output

STANDARD MODELS AVAILABLE:

Model No.	Nom. V Line to Line	Ref VRMS	HZ Frequency	Plug-In P.C. Card	Synchro Load Capability TR=torque receivers CT=control transformer CDX=control differential
650-31	11.8	26±5%	400±5%	4½x8	to 3 size 11 TR's
A676-10	11.8	26±5%	400±5%	4½x8	to 3 size 11TR's, CT's, CDX
A676-10HP	11.8	26±5%	400±5%	4½x12	to 2 size 15TR's, CT's, CDX
A676-90	90	115±5%	400±5%	4½x8	1 size 11TR, CT's & CDX
A676-90HP	90	115±5%	400±5%	4½x12	size 23TR, CT's & CDX
A676-60	90	115±5%	60±5%	4½x8	CT's & CDX
A676-60HP	90	115±5%	60±5%	4½x12	Size 23TR, CT's & CDX's

OTHER SPECIFICATIONS:

INPUTS: Two DC inputs from—10 to +10V into 100K ohms min. representing sine and cosine of the angle.

ACCURACY: 10 minutes of arc

DC POWER: Three wire + and —25V for 11.8V L.L outputs. Three wire + and —150V for 90V L.L outputs.

DC CURRENT: The DC current drawn is approximately ½ the AC current drawn by the load. TR's are extremely heavy loads. Consult Transmagnetics application engineering for specific requirements.

TO ORDER: Add "C" to model number for 0-70°C operation. Add "M" for —55 to +85°C operation.

LINEAR DC TO SYNCHRO OUTPUT

612 SERIES
ccepts a linear DC input
roportional to angle and
enerates a three-wire
ynchro output.

The 1612 Series consists of:

- C670 sin-cos generator. (Specifications will be found in Computing Resolver Section of Transmagnetics EEM pages.
- 676 Synchro Driver. Select model from listing above.

SYNCHRO BUFFER AMPLIFIER

620 SERIES
e synchro buffer ampli-
ers to drive up to three
ze 11 11.8V L.L torque
ceivers.

SYNCHRO INPUT: 90V or 11.8V L.L 400 Hz into 100K ohm min. impedance. Input is transformer isolated.

SYNCHRO OUTPUT: 3 wire synchro 11.8V nominal L.L. 52 output is common to DC supply common.

ACCURACY: 6 minutes of arc.

DC POWER: Plus and minus 25V ± 5%. Torque receivers draw heavy surges. Consult Transmagnetics application engineering for current requirements on supply.

OPERATING TEMPERATURE: 0 to 70°C or —55 to +85°C

PACKAGE: 1.78"H X 3.19 X 3.44

DIGITAL TO SYNCHRO/RESOLVERS CONVERTERS

670 SERIES
onverts 13 bit binary
igital input to 3 wire
ynchro or 4 wire resolver
utput.

DIGITAL INPUT: 13 parallel lines, DTL-TTL compatible, MSB is 180°.

SYNCHRO/RESOLVER OUTPUT: 3 wire synchro or 4 wire resolver output, isolated. 11.8V L.L for loads of 100 ohms min or 90V L.L at 6000 ohms min, 400 Hz.

REFERENCE INPUT: 26V or 115V RMS ± 10%, 400 Hz ± 5%.

ACCURACY: ± 4 minutes

DC POWER:
+ 15V ± 5% at 120 MA no load
— 15V ± 5% at 120 MA no load
+ 5V ± 5% at 150 MA

CONVERSION TIME: 50 microseconds max.

PACKAGE: P.C. card 4.5X6X1.5" above board.

TRANSMAGNETICS INC.

134-25 Northern Boulevard • Flushing, New York 11354 Phone: 212-539-2750

Solid State Synchro/Resolver Converters

Transmagnetics' unique compact solid state series converts all standard synchro or resolver formats to sine-cosine DC, linear DC with angle or digital angle outputs, replacing cumbersome mechanical servos and interfacing with digital computers and data processors.

SYNCHRO/RESOLVER TO SINE-COSINE DC

SERIES 655
are miniature modules which generate sine and cosine DC outputs proportional to the synchro or resolver input angle

SYNCHRO OR RESOLVER INPUT: 60 or 400 Hz, 90V or 11.8 VRMS line to line, 26 or 115 VRMS line
OUTPUTS: 10 sine and 10 cosine θ nominal. Outputs vary proportional to line. Also see 655-NVR series below.
ACCURACY: ± 5 minutes of arc.
DC POWER: Required for A655 models (buffered output) only, ± 15 VDC ± 3% at 20 MA
OPERATING TEMPERATURE: 0 to 70°C or —55 to +85°C
PACKAGES: for 400 Hz 11.8V L.L. — 0.58"H x 2.03 x 2.28
for 400 Hz 90V L.L. — 0.78"H x 2.53 x 3.22
for 60 Hz 90V L.L. — 1.28"H x 2.53 x 3.22

NON-VARIANT SYNCHRO TO SINE-COSINE DC

SERIES 655-NVR
modules maintain the sine-cosine outputs constant when the line and frequency vary and are independent of synchro non-linear characteristics. Synchro transformation ratios vary with line amplitude and frequency. In the 655 NVR series, these variations are computed and corrected for.

SYNCHRO OR RESOLVER INPUT: 60 or 400 Hz, 90V or 11.8V L.L. 26V or 115V RMS line
OUTPUTS: 10 sine and 10 cosine
CONFORMITY: Each output within ± ½% FS includes ± 10% line and ± 5% frequency variation, measured with actual synchro input.
ANGULAR ACCURACY: ± 15 minutes of arc.
DC POWER: ± 15V ± 1% at 50 MA
OPERATING TEMPERATURE: 0 to 70°C or —55 to +85°C
PACKAGE: 1.78"H. x 3.19 x 3.44

SYNCHRO TO LINEAR DC

SERIES 678
convert synchro or resolver inputs to a linear DC output proportional to the angle. The output rejects changes in line amplitude and frequency.

SYNCHRO OR RESOLVER INPUT: 60 or 400 Hz, 90 or 11.8V L.L. 26 or 115 VRMS line.
OUTPUT: —10 to +10V DC linear with angles from —180 to +180°.
ACCURACY: 6 or 15 minutes of arc. Effect of ± 10% amplitude and ± 5% frequency less than 3 minutes of arc.
DC POWER: +15V ± 3% at 125 MA max, —15V ± 3% at 60 MA max
OPERATING TEMPERATURE: 0 to 70°C or —55 to +85°C
PACKAGE: 1.80"H x 3.06 x 4.56

SYNCHRO/RESOLVER TO DIGITAL

SERIES 1623

See Transmagnetics page on D/A and A/D converters for characteristics of Series 1623 converters.

TRANSMAGNETICS INC.

134-25 Northern Boulevard • Flushing, New York 11354 Phone: 212-539-2750

Solid State Computing Resolvers

Coordinate rotation, polar to rectangular or rectangular to polar conversion, sine-cosine generation and similar trigonometric computing functions which in the past have been implemented with mechanical resolver servo-systems, are now performed with Transmagnetics compact modules.

LINEAR DC TO SINE-COSINE OUT

C670 SERIES
accepts a DC input proportional to angle and provides two DC outputs proportional to sine and cosine of the angle.

INPUT: —10 to +10VDC representing angles from +180 to —180° into 75K ohms min input impedance.
OUTPUTS: K sine A and K cosine A where K = 10 ± 1%, outputs impedance less than 1 ohm, short circuit protected, 2000 ohms min. res. load.
ACCURACY: ± 15 minutes of arc as defined by ratio of outputs.
DYNAMIC RESPONSE: For a — 90 to + 90° step input, 25 milliseconds to reach rated accuracy.
DC POWER: + 15V ± 3% at 50 MA
— 15V ± 3% at 50 MA
+ 5V ± 5% at 200 MA
OPERATING TEMPERATURE:
0 to 70°C or — 55 to + 85°C
PACKAGE: 1.78"H X 3.19 X 3.44

COORDINATE ROTATOR

689 SERIES
accepts rectangular input (X and Y) and rotates the input through an angle proportional to a linear DC input

INPUT A: X = R cos A and Y = R sin A, each — 10 to + 10 VDC where R may vary from 20 mv to 10V, into 100K ohms nom.
INPUT B: — 10 to + 10VDC linear with angles from 0 to 360° into 100K ohms nominal.
OUTPUTS: R sin (A + B) and R cos (A + B)
ACCURACY: Angle ± 15 minutes at R = 10.
R: ± 0.15% FS
DYNAMIC RESPONSE: 450 conversions per second min.
DC POWER: + 15V ± 1% at 60 MA max
— 15V ± 1% at 60 MA max
5V ± 10% at 85 MA max
OPERATING TEMPERATURE:
0 to 70°C or — 55 to + 85°C
PACKAGE: 1.78"H X 3.19 X 3.44

POLAR TO RECTANGULAR CONVERTER

1618 SERIES
converts input in polar form R, A to rectangular R Sin A and R Cos A

INPUTS: R: 20 MV to 10V into 100K ohms nom.
A: — 10 to + 10V into 100K ohms nom., linear with angles from 0 to 360°.
OUTPUTS: R Sin A and R Cos A into 2K ohms min. res. load
ACCURACY: Angle: ± 15 minutes at R = 10
R: ± 0.15% FS
DYNAMIC RESPONSE: 450 conversions per second min.
DC POWER: + 15V ± 1% at 60 MA max
— 15V ± 1% at 60 MA max
5V ± 10% at 85 MA max
OPERATING TEMPERATURE:
0 to 70°C or — 55 to 85°C
PACKAGE: 1.78"H X 3.19 X 3.44

RECTANGULAR TO POLAR CONVERTER

695 SERIES
converts input in rectangular form X, Y to polar R, A

INPUTS: R Cos A and R Sin A into 100K ohms min. impedance. R may vary from 50MV to 10V.
OUTPUTS: R and A from less than 10 ohms to 2K ohms min. load.
ACCURACY: Angle: ± 15 minutes at R = 10
R: ± 0.1% FS
DYNAMIC RESPONSE: 450 conversions per second min.
DC POWER: + 15V ± 1% at 75MA max.
— 15V ± 1% at 75MA max.
+ 5V ± 5% at 50MA max.
OPERATING TEMPERATURE:
0 to 70°C or — 55 to + 85°C
PACKAGE: 1.78"H X 3.19 X 3.44

Solid State Computing Modules

COMPUTING SINE WAVE MODULATORS

FOR DC TO AC
Proportional phase-reversing conversion. Models 152 and 191 are fully isolated

These modulators offer high performance, small size and off the shelf delivery in radar, fire control, auto-pilots and similar applications where high accuracy is required. The output of these models remains constant for a 10% change in line. For "multiplying" modulators see Model 365 below. Models listed have 26V 400 Hz reference. 115V and 60 Hz units are available.

Model	DCV in	AC out VRMS	Lin % FS	Oper. Temp.	Phase °	Size
1102	−10 to +10	0 to 6	0.1	−55 to +85°C	±1	.58"H X 2.03X2.28
152	−7 to +7	0 to 1	0.1	−55 to +85°C	±3	1.87"H X 1.13X1.25
191	−5 to +5	0 to 5	0.1	−55 to +85°C	±5	1.87"H X 1.13X1.25

COMPUTING DEMODULATORS

FOR AC TO DC
Proportional phase-sensitive bipolar output. All models are fully isolated.

SPECIFICATIONS
Demodulators are required in similar systems to modulators. They are also used to condition AC signals from strain gauges, pressure and similar transducers to DC for telemetry and data processing. 697 Models contain two demodulators in a very small size and may be used for resolver demodulation. All models shown are for 400 Hz operation. 60 Hz also available.

Model	AC Sig. In VRMS	DCV Out	ACV Ref	Lin % FS	Oper. Temp.	Size
840	0 to 5	0±4.3	26	0.1	−55 to +85°C	1.63"H X 1 X 1
854	0 to 20	0±10	26	0.1	−55 to +85°C	1.63"H X 1 X 1
697MP4	0 to 11.8	0±10	26	0.1	−55 to +85°C	0.58"H X 2.03X2.28
697-115MP2	0 to 90	0±10	115	0.1	−55 to +85°C	0.78"H X 2.53X3.22

ANALOG MULTIPLIERS—COMPUTING GRADE

NARROW BANDWIDTH*
These pulse modulator multipliers are accurate, stable and repeatable. They represent the best buy in servo and trigonometric computing requiring only limited bandwidth.

QUARTER-SQUARE**
Quarter-square multipliers with diode-shaping networks are the most repeatable and stable wide-band multipliers.

Model	350RP2*	350MP4*	380MP4**	380CP5**

MULTIPLYING MODULATOR—VARIABLE GAIN AMPLIFIER

MODEL 365
A miniature solid-state multiplying modulator without hysteresis produces an AC gain proportional to a DC input.

This device finds applications in flight control systems in varying loop gain or as a sine-wave modulator.

DC INPUT: 0 to ±10V into 50 ohms min.
AC INPUT: 0 to 7V RMS into 50K ohms min.
AC OUTPUT: Proportional to product of inputs. Output is 2V RMS when inputs are at maximum above.
PHASE: Constant to ±1° over 380 to 420 Hz.
3 DB BANDWIDTH: 200 Hz to 100 KHz
AC LINEARITY: 1% FS
DC LINEARITY: 1% FS
NULL: 10 MV RMS, 200 Hz to 10 KHz
DC POWER: ±15V
SIZE: .4H x 1.27 x 1.77
OPERATING TEMPERATURE: 0 to 70°C (available for −55 to +85°C)

TAURUS

World Leaders in Card Readers

FEATURING HIGH RELIABILITY

A Complete Line of Punched Card Readers for Static and Serial Programming

APPLICATIONS

MILITARY USES: Ground checkout equipment, programming, testing, component testing, simulators, etc.

COMMERCIAL USES: Batching of concrete, food, chemicals, etc.; automatic crane operation, automated manufacturing processes, data processing, process control, etc.

STANDARD SPECIFICATIONS

Cards—IBM, Rem. Rand or others.

No. of Switches—10 to 960—(Form A, B or C).

Electrical—Dry Circuit to 3 AMPS.

M-3
FULL IBM CARD STATIC READER

Reads up to 80 columns, or 960 switches, (complete IBM card). Most compact switching array available. Reads indirectly for maximum reliability. After insertion, punched hole has a closed switch, no hole an open switch. Switch reliability 100,000 cycles. Mechanical reliability 500,000 cycles.

JM-3
STATIC READER FOR ONE HALF OF AN IBM CARD

Reads up to 40 columns, or 480 switches, of an IBM card. After insertion, punched hole has a closed switch, no hole an open switch. Switch reliability 100,000 cycles. Mechanical reliability 500,000 cycles.

S SERIES
S-60, S-120, S-180

For simple functions. Practical. Economical. Reads an entire card or part of one. Choice of 60, 120, or 180 replaceable switches. Each switch can be removed or replaced separately. Cards can be hand punched.

MODEL 600
SERIAL READER

Relatively Slow But Inexpensive.
Feed and Read . . . Less than $1,000.

Reads standard 80-column, 12-row cards, serially, column by column, 10 columns per second or less. Alpha-numeric or other symbols accepted. For on line computer, remote transmission, interfaced with other machines, numerical control, card duplication or correction. Sizes 6¼″ High x 9¾″ Wide x 6½″ Deep. Automatic card feed available for sequential feeding of up to 200 cards.

Also Teflon Terminals and Printed Circuit Board Guides

CUSTOM BUILT UNITS ARE OUR SPECIALTY. We will fill your requirements in spacing, switch action, number of switches and any other special needs, and will determine the most economical size and type for your operations. **Send for 1970 Catalog.**

DIGITAL SYSTEM COMPONENTS

UNICO, INC.

thumbwheel switches

A wide variety of thumbwheel switch units with functionally related electronic components mounted as an integral part of the switch assembly reduces and simplifies interconnecting wiring to a fraction of that used with conventional methods. These combinations also simplify system test and troubleshooting. The thumbwheel switch functions include:

- coincidence detection
- magnitude comparison
- BCD, binary and decimal setting
- multi-station multiplexing
- frequency division
- frequency addition/subtraction
- frequency multiplication

A complete line of functional and logic modules that include both digital and analog types are designed for convenient interface with pulse generators, encoders, switch closures, dc drives and other control equipment. All modules are compatible with the readout and thumbwheel units to ease system design and application. Functional and logic modules include:

- input/output convertors
- analog switches
- relays and relay drivers
- DC amplifiers
- cyclic-to-binary convertors
- frequency and D-to-A convertors
- variable time delays
- gates, flip-flops and counters

functional and logic modules

readout units

Readout units with a variety of digital functions mounted as an integral part of the module simplify digital system design and implementation. Most units are available with optional storage and/or buffer amplifiers. Both the seven segment and ± readouts operate at logic levels and view easily at a distance of 20 feet. Readout module functions include:

- BCD decoders
- binary (0-15) decoders
- 9's complement decoders
- XS3 decoders
- XS14 decoders
- binary up or down counters
- decimal up or down counters
- BCD bidirectional counters

Complete hardware and compatible hardware modules make new system design and fabrication easy and fast. All units mount on identical centers of the same mounting racks. Application information, design assistance, standard functional units and special systems designed and built with standard parts, are available when required. Hardware parts and modules include:

- spacer and end modules
- cable and component cards
- mounting racks
- face plates and covers
- pushbutton cards
- IC mounting modules
- extender cards
- indicator modules

hardware and functional systems

rotary transducers

Rotary transducers available in both ruggidized and conventional enclosures are compatible with, and complementary to the line of digital system components. Heavy-duty units can be flange or foot mounted and are designed to withstand high shaft load and hostile environments. Integral amplifiers are included on most units for pulse wave shaping and line driving. Rotary transducers include:

- bidirectional pulse generators (10-5000 pulses/revolution)
- tachometers
- absolute encoders (360-10,000 parts/turn)
- potentiometers

manufacturers of digital system components, digital servos, dc drive systems, and scr amplifiers

Wang time machines give you greater design freedom

300 Series – (right) for Low-Cost Flexibility in Design Calculations. Choose the model that best meets your design requirements: Model 320 with instantaneous $\sqrt{x}$, x^2, $\log_e x$ and e^x plus two storage registers; Model 360 with six storage registers; Model 362 with up to 26 storage registers; or six more keyboards providing trig functions by single keystrokes. Peripherals include the CP-1 and CP-2 Card Programmers and the 301 Column Printer. Four keyboards can operate simultaneously from a briefcase-size electronic package for optimum cost advantage.

WANG 3300 BASIC – (below) The First Low Cost Time-Sharing Mini-Computer with BASIC. The WANG 3300 BASIC is the first in-house, time-sharing system designed to give large system time-sharing performance at only ¼ the cost of subscription services or other in-house time-sharing systems. The 3300 BASIC is an integrated hardware/software system utilizing typewriter terminals, with compact magnetic tape cassettes, or standard teletypes. Software features BASIC the most popular, proven conversational time-sharing language – with a flexible calculator mode.

370 Series – (above) for your More Complex Design Problems. Our 370 Model provides increased storage with random access from the keyboard or under program control with up to 480 steps. This system will branch, loop, perform subroutines, make decisions and manipulate arrays. Peripherals include a 301 Column Printer and 379-5/7a numeric Output Writer.

Model 700 – (left) the Ultimate Programmable Calculator. The 700 is a fully self-contained IC calculator which programs and executes up to 960 program steps in core, stored on tape cassettes. It has 120 data registers, for manipulating numbers throughout the dynamic range, dual Nixie®-type displays, special keys for trig functions, commands for loops, branches and subroutines, plus basic arithmetic and log keys. Execution speeds range from 300 μ sec for + and – to 250 m sec for trig functions. Model 701 Output Writer and other peripherals add increased design flexibility.

Comprehensive library programs are available for all Models.

Environmental Test Chambers

MOST COMPLETE, MOST RELIABLE LINE IN THE INDUSTRY! DELIVERED FROM STOCK AT PRODUCTION-LINE PRICES!

Associated Testing Laboratories, Inc., one of the country's largest independent environmental testing facilities serving the aerospace and electronics industry, offers through its Manufacturing Division a complete line of environmental test chambers for research, production, reliability testing and quality control.

Originally designed for use in Associated's own testing laboratories, these chambers have been time-tested and use-proven in industry after industry, as well as in thousands of hours of on-the-line operations at our own laboratories, performing tests to the most rigorous government specifications. Associated's environmental chambers are a standard line of equipment, manufactured in production quantities and delivered from stock. Detailed specifications, technical data and price information are available directly from our plant or from your regional Associated representative.

LOW-HIGH TEMPERATURE CHAMBERS

A complete line of chambers for military and commercial testing offering a choice of mechanical refrigeration or CO_2 cooling • Rack, bench and stacking types • Sizes from 0.5 to 27 cubic feet • Low Temperatures to −120°F, high temperatures to +500°F • Solid state controllers, choice of ±½°F or ±¼°F control stability • Adjustable high temperature fail-safe • Wide range of options • Prices for CO_2 chambers start at $335., prices for mechanically refrigerated chambers start at $875. • **Delivery From Stock.**

TEMPERATURE-HUMIDITY CHAMBERS

Performance features normally found only in custom-built chambers, built in production quantities and at production prices • Sizes 4, 8, and 27 cubic feet • Choice of single stage or cascade refrigeration • Optional CO_2 capability • Temperature ranges from −100°F to +350°F • Humidity ranges from 10% to 98% • Forced air circulation • 2-Pen 2-Cam programming recording controllers • Adjustable high temperature fail-safe • Integral demineralizer • **Delivery From Stock.**

BURN-IN TEST CHAMBERS

Designed specifically for life and burn-in testing of semi-conductors, integrated circuits, and axial lead devices • Test temperatures from ambient to +300°F, with choice of ±½°F or ±¼°F temperature control stability • Rise time ambient to upper limit in 30 minutes • Printed circuit board trays offer maximum burn-in capacity on axial lead devices of up to 3,300 units per chamber • Low temperature CO_2 capability optional • Prices for standard printed circuit boards and chambers available upon request.

BLUE M TEMPERATURE CONTROLLED EQUIPMENT FOR ELECTRONICS RESEARCH AND PRODUCTION

FULL-RANGE TEMPERATURE/HUMIDITY CHAMBERS

Maximum capability cabinets to perform all current MIL humidity tests. Dual wet and dry bulb POWER-O-MATIC 60® Saturable Reactor Control Systems assure absolute stability and reliability. High speed stabilization and the finest control tolerances available insure accurate reproduction of today's test requirements plus the capability of meeting future requirements when existing standards are tightened. These mechanical convection, horizontal air-flow units feature programming and separate monitoring recorder. Temperature range: −18°C. to +93°C. (±½°C.). Meets MIL-202D, Method 160-C, Step 7A; automatically performs −10°C. dip without changing cams. Maintains R. H. ±½%. Chamber sizes: 5.8, 11, 27, and 64 cu. ft.

Similar units for single steady state tests available. Also new, compact top loading cabinets with similar operating characteristics.

NEW AIR-COOLED TEMPERATURE/HUMIDITY CABINETS

HUMIDAIRE Combination Temperature/Humidity Cabinets with independent wet and dry bulb POWER-O-MATIC 60 Saturable Reactor Control Systems provide extreme accuracy from +12°C. above ambient to +93°C. (±½°C.). Use air for cooling, not costly conditioned water. Saves 30,000—100,000 gallons a year. The most reliable and economical chamber ever developed for long-term high temperature/humidity testing. Ideal for such steady state tests as MIL-202D, Method 103B—continuous operation for 56 days. Four sizes. 1.47, 3.24, 5.5 and 10 cu. ft.

NEW VERSA-RANGE® REFRIGERATED TEST CHAMBERS

Incomparable control accuracy, reliability and dependability—plus a choice of two versatile ranges: −100°F. to +400°F. and −40°F. to +200°F. Five chamber sizes—3 to 64 cu. ft.—for each range. POWER-O-MATIC 60 control carefully matched with heating system and exclusive quality non-cycling mechanical refrigeration system for maximum efficiency and economy. Rapid pull-down. Also chest type cold chambers with ranges to −40°F. and −120°F.

THESE ARE ONLY EXAMPLES OF OUR COMPLETE TEMPERATURE/HUMIDITY AND REFRIGERATION CONTROL CAPABILITY

BLUE M THERMAL SHOCK TEST CHAMBERS DESIGNED FOR MIL-STD-202D AND 883

Ask about our complete line of thermal cycling chambers, LN_2 chambers, and new Versa-Whirl baths for MIL-STD-883, Method 1011, Conditions A to F.

DUAL THERMAL SHOCK TEST CABINETS

2.3 cu. ft. work chamber moves vertically from lower cold chamber to upper heat chamber as required by spec. Cold chamber uses LN_2 to reduce incoming load to −55°C or −65°C. Has solid-state instrumentation. Heat chamber, with range of +204°C (+400°F), regulated by POWER-O-MATIC 60 Control for reliable, straight-line performance. Also available: 3-stage Thermal Cycling Test Cabinets to meet MIL-STD-202D, Method 102A, Preferred Conditions C & D. Test accomplished in one unit instead of two as is customary. Operation of both models is fully automatic—with reliability and accuracy to meet spec. easily.

BLUE M FURNACES

A wide variety of research and production models to suit the strictest needs. Box type muffle furnaces, Globar units — in bench and floor models — new tube furnace. Most have solid-state instrumentation for extremely accurate temperature control and unmatched reliability. Temperatures to +3000°F. Quality materials and workmanship throughout.

BLUE M OVENS

All types. Mechanical and gravity . . . batch, aging, vacuum, life-test, hazard-safe, gas forming, annealing. Simple lab models to units for Mil Specs. Sizes to 96 cu. ft. . . . temperatures to +1200°F. Most have patented POWER-O-MATIC 60 Control, others feature patented POWER-O-MATIC 70(TM) Solid-State Proportioning Control. All accessories, including programming, available.

DYTRONICS

VIBRATION ANALYSIS DYNAMIC BALANCER

Vibration is a major problem for industry! It affects quality, safety and maintenance costs for metal working manufacturers, power and process industries, construction and mining industries, aircraft and missile industries and transportation. Stop vibration trouble before it starts. Use Dytronic's vibration instrumentation to:

- **Detect Vibration**
- **Correct Vibration**
- **Analyze Vibration**
- **Monitor Vibration**

Solve vibration porblems with Dytronics vibration analysis instrumentation.

BALANCE ROTATING ASSEMBLIES DYNAMICALLY

- **WITHOUT DISASSEMBLY**
- **USING SEMI-SKILLED OPERATORS**
- **AT PRODUCTION RATES**
- **WITH SINGLE RUN CORRECTION**

The Model 4501 Dynamic Balancer corrects vibration in fans, blowers, motors, hand tools, appliances, without taking the assembly apart. Life of operation is increased up to three times by balancing the complete assembly. An exclusive memory system remembers the exact amount of material the operator must remove or add. Never before has such an advanced technique been offered the balancing industry.

AUSTRON

time / frequency instruments / data logging instruments / Sulzer crystal oscillators / TCXO crystal oscillators

model 2000C

model 2082

model 2070A

model 2060A

model 1200-1210

AUSTRON, Inc., offers a complete line of instruments for time/frequency calibration and control. Designed to maximize utilization of Loran-C, VLF, and Omega transmission, AUSTRON instruments find applications in time synchronization, timekeeping, frequency calibration, propagation studies, and ionospheric event monitors.

The Model 2000C receives and automatically phase tracks all Loran-C chains. Direct cycle identification via front panel meter and signal wave form printout. Ground or skywave tracking for micro-second timing and frequency monitoring. All-electronic servo. Loop or whip antenna system available.

The Model 2070A provides in-line, digital time-of-day display. Synchronized by Loran-C or other electrical reference. Includes Loran-C repetition period generator. Internal Crystal Frequency Standard of 2×10^{-10}/day is optional.

The Model 2082 Loran-C TRF Receiver is optimized for visual or photographic monitoring and analysis of Loran-C signals. Unit includes two adjustable notch filters. Additional filters optional.

The Model 2062A Group Repetition Period and Time of Coincidence Generator adapts skywave monitors and visual receivers for timing by odd-rate Loran-C stations. The unit also provides visual and electrical indication of TOC seconds.

The Model 2040 Loran-C Signal Simulator generates Master or Slave test signals at any repetition period for Loran-C receivers. Phase shifter for signal time adjustment. Doppler simulator and Loran-D format optional.

The Model 2010A Oscillator Control Unit permits phase-locking a crystal frequency standard to a higher stability reference such as an atomic standard or Loran-C receiver output. The unit uses a third order servo system for automatic correction of systematic oscillator aging in the event of primary reference failure.

The Model 1200 or 1210 Crystal Clock is available in portable or rack mount pack. Unit weighs twenty pounds and includes double proportional oven controlled crystal reference with stability of $\pm 1 \times 10^{-10}$/day or better. Also included is automatic synchronization to external reference with 0.4 microseconds or manual synchronization to 0.2 microseconds. Sine wave outputs of 5 MHz, 1 MHz, and 100 kHz and pulse outputs from 100 pps to 1 pps. Standby battery capability of twenty hours minimum.

Data sheets for these instruments and others are available. Also write for the following application notes:

1. A Loran-C Skywave Timing Experiment
2. A Frequency Control Experiment
3. Loran-C for Time and Frequency

data logging instruments

model 2210

The Model DL-2210 Digilogger scans up to 1000 voltage on thermocouple inputs and prints out directly in Engineering units on roll paper. Unit equipped with hi-low alarms and time print-out.

model DL-1200

The Model DL-1200 is an inexpensive logging device which scans up to 50 voltage on thermocouple inputs and prints out on roll paper directly in Engineering units. Ten voltage inputs may be logged for less than $1500.

Sulzer crystal oscillators

model 1150
2½ x 3¼ x 5″

model 1120
2¼ x 2⅛ x 4″

1150 — 2×10^{-10}/day long term stability, 2×10^{-11}/°C average for −55°C to +60°C, 5 MHz, 4.5 watts maximum 2.5 watts average power input, 2½ x 3¼ x 5″. **1120** — Long term stability to 1×10^{-9}/24 hours, −20°C to +55°C, 5×10^{-9} retrace after one hour, 1 MHz output (special frequencies available), 4 watts maximum 2 watts average power input, 2.14 x 2.27 x 4″, 9 ounces. Electrical and mechanical replacement for older Sulzer Model 1 KLM series.

TCXO-50 Temperature-Compensated Crystal Oscillator
2 x 2 x 1″

Temperature-compensated Crystal Oscillators

ACO-57
Frequency Range — 100 KHz to 50 MHz
Accuracy — $\pm 1 \times 10^{-6}$
Frequency vs. Temperature — 5×10^{-6}
Temperature Range — −5°C to +55°C
Input — 5 v dc ±1%
Output — 1-4 v pk-pk into 10 K ohms

TCXO-50
Frequency Range — 1 MHz to 10 MHz
Frequency Tolerance — $\pm 1 \times 10^{-6}$
Temperature Range — 5°C to +55°C
Frequency vs. Temperature — $\pm 1 \times 10^{-6}$
Input — 24 v dc ±10%
Output — 1-4 v pk-pk into 10 K ohms
Stabilization — <3 seconds

AUSTRON INC. • 10214 NORTH INTERREGIONAL HIGHWAY, AUSTON, TEXAS 78753 • TELEPHONE (512) 836-3523

api INDICATING & CONTROLLIN

Panel meters

API panel meters have standard 1% tracking and frictionless taut band movement in the most popular DC ranges—20 to 100 μa and 5 to 25 mv. Taut band (not 1% tracking) is standard in ranges between 3 and 10 μa. Most taut band DC meters can be calibrated for 0.5% tracking, 1% accuracy, or 0.5% accuracy. Pivot-jewel movement is standard above 100 μa.

New Series 7000 panel meters

API Series 7000 is an all-new line with forward styling and panel mounting versatility never before available in one meter design. Mounting options are front mount, bezel mount and lens mount. "Stick-on" color plates are offered for front-mounted meters. Other features: field-changeable scales, rugged phenolic cases and fronts, glass windows.

Sizes: Model 7035 (3½"), Model 7045 (4½"), and Model 7055 (5½"). ***Request Bulletin 67.***

Front Mount.

Bezel mount.

Lens mount.

Other API panel meters

Additional panel meter types include black phenolic in both front mounting and recessed mounting styles, edge-reading models, ruggedized-sealed meters, and VU meters for recording and broadcasting applications. Sizes range from 2¼" to 10" in width.

New electronic panel meters, featuring 1% accuracy and 1-second response, are also available. Specify product when requesting literature.

Indicating pyrometers

Pyrometers are thermocouple-actuated, all taut band, and both bimetal and thermistor compensated for ambient temperature changes. Standard mirrored scales read both °F and °C. They are stocked in popular ranges, with the same case styles as panel meters. Standard accuracy is 2%, with 1% available. Portable pyrometers also stocked. ***Request Bulletin 68.***

Meter-relays

Meter-relay types include the Ultimeter (potentiometric set point), contactless (optical), contacting (locking-coil), and contacting (magnetic), all of which are used with API circuit modules or other control circuitry. Adjustable single or double set points. Specify product when requesting literature.

Series 7000 scales are field-changeable without pointer damage.

Model 561 panel meter.

Model 503-E electronic panel meter.

Digital products

API digital panel instrun combine award-winning d with fine features. Digital meters may be teamed with m ing comparators for large up display plus precise limit co

Model 4304 digital panel r

Model 4304 has large 7-ba mented digits with easy-to-rea play to ±1999 with 1000-me input impedance. Standard fea include auto-polarity, 0.1% racy, BCD output, 100% over-r front or rear panel mounting. Ra are 0-199.9 mv to 0-1000 volt ***quest Bulletin DP-2.***

Model 4310 digital compa

This 4-digit comparator has input 1-2-4-8, algebraic compa logic output, 2 amp relay co polarity switch, and visual lan dicators. Logic circuitry is separ Choice of fixed limit or adjus thumbwheel limit. Remote pro ming models available. ***Re Bulletin DP-3.***

7-bar segmented displays

Digital display modules ma used for low cost counters and outs. Each module provides cou storage and decoder-driver, output, serial or parallel input, lamp, decimal point. Mou hardware available for multi-de displays. ***Request Bulletin DP***

Mode 431 digita comp arator

Digital display modules.

INSTRUMENTS

▶ Controllers

API solid-state controllers provide many different levels of sophistication for controlling temperature and other process variables. Most temperature control models are thermocouple actuated, with no recalibration necessary up to 100 ohms thermocouple resistance. Quick delivery in standard ranges.

Compack IV controller.

Compack controllers

Compack IV On-Off controllers are dimensionally and electrically interchangeable with most controllers incorporating optical meter-relays, but they provide such improvements as 1% accuracy, faster response and solid-state reliability. Other features: switching independent of meter, chopper amplifier input impedance, adjustable single or double set points, self-contained power supply. Available as a thermocouple-actuated temperature controller. ***Request Bulletin 66.***

Pyrometer models of Compacks I and II, built around optical meter-relays, offer On-Off, Time Proportioning or SCR driver control action.

Model 232 temperature controller.

Model 232 temperature controller

This low cost controller is designed for industrial and commercial ovens, laboratory environmental chambers, plastics and packaging machines. Built in the USA to DIN dimensions, it provides either relay or SCR type output for On-Off or Time Proportioning control. Standard ranges in stock (minimum span 0 to 300°F). May also be used as a limit device. ***Request Bulletin T-232-A.***

Model 226—digital set point

Two-mode temperature controllers

These instruments cover a broad range of applications in plastics, packaging, textiles, hydrocarbons, and many types of furnaces and ovens. Outputs include voltage or current, Time Proportioning zero crossing, Time Proportioning relay, phase-fired pulse.

Models 225 and 226 offer field-changeable plug-in cards for ranges, outputs and optional alarm. Other features are adjustable proportional band, adjustable automatic reset, deviation meter. Model 225 has analog set point; Model 226 is digital. ***Request Bulletin T-225/226-A.***

Model 227—analog set point

Model 227 is the smallest, lowest priced instrument among two-mode controllers with indicating meters and integral control elements. No adjustments except temperature setting. Analog set point. ***Request Bulletin T-227-A.***

Model 228 incorporates a large indicating meter, 4-digit set point, and offers choice of plug-in output cards. ***Request Bulletin T-228-A.***

Model 235 has a 4-digit set point, deviation meter, adjustable proportional band, adjustable reset, choice of output cards. ***Request Bulletin T-235-A.***

Solid-state power packs, for use with API process controllers, are available in 30, 50, 70 and 100 amperes. ***Request Bulletins T-4010-A and T-4011-A.***

INSULATION TESTING INSTRUMENTS

ASSOCIATED RESEARCH, INC.

Insulation Resistance Testers

Ranges from 100 to 10 million megohms at test potentials to 10 KV.

The MEG-CHEK® megohmmeter provides a wide selection of battery and line-powered instruments for accurate insulation resistance measurements of circuits, components, cables, motors, etc. They are direct reading and push button operated requiring no cranking or leveling.

Select from 17 models ranging from pocket-size to portable 10 KV with variable voltage. Some models combine megohm with ohm and AC-DC volt scales in one instrument. Five popular models are:

Model	DC Test Voltage	Max. Megohms	Features	Price
2000	500	100	Pocket-size	$ 95
2201	500	200	Includes 2K ohm and six AC-DC volt scales	165
2211	1000	2000	200 K ohm range	255
2850	500/50	10 Million	Constant test voltage through 6 decades	345
2955	0-2,500	50,000	Adjustable test voltage	890

Request MEG-CHEK Megohmmeter Bulletins by model number.

Portable DC HYPOTS® to 200 KV

Output of the several portable DC HYPOTS is continuously variable from 0 to maximum with the voltage metered directly in the output. Leakage current measurements are on four range meters reading down to as low as 0.05 microamps. Features: 2% metering accuracies, electronic circuit protection, by-pass and metered return terminals, grounded steel cases, silicon rectifiers, plug-in high voltage leads, etc.

Model	Output Voltage	Output Current	Price
5205	0-5 KV	2.0	$ 550
5212	0-10 KV	2.0	675
5220	0-15 KV	2.0	735
5271	0-50 KV	2.5	2250
5321	0-100 KV	5.0	3115

Request Portable DC HYPOT Bulletins

Testing Manual Available

This 60 page collection of Bulletins covers specs, prices and applications of insulation resistance testers, AC HYPOT Juniors, portable and mobile DC test sets, corona and materials test equipment, kilovoltmeters, precision ohmmeter, current transformers, phase sequence indicators.

Request Manual 2900 on company letterhead

A-C HYPOT Jrs... to 10 KV, limited current

Portable a-c dielectric strength testers providing outputs continuously variable from 0-1500 V up to 10,000 V a-c. Use of neon breakdown and leakage current indicators in conjunction with collapsing field-type high voltage transformers assures rapid and safe production testing.

The leakage current indicator is adjustable from 0.3 to 3 ma. A 4½" kilovoltmeter provides high accuracy. Short-circuit current cannot exceed 18 ma.

Three popular models are:

Model	Output Voltage	Price
411	0-2,500	$175
404	0-4,000	190
422	0-10,000	260

HYPOT Jr. Automatic "Squawker" Models

Available with output voltages from 0-1500 volts to 0-6000 volts a-c. Similar to the standard HYPOT Jr. models but include an audible signal unit and external control terminals.

DC and Combined AC/DC HYPOT Jrs.

offer same features as described above, plus test potentials to 5 KV.

Request AC & DC HYPOT Jr. Bulletins.

Insulating Materials Testers

A full range of testers for solid and liquid insulating materials to 100 KV and higher is available. Due to the rapid progress of insulating materials and testing techniques, new equipment is added whenever required to meet ASTM, MIL and Federal test specifications.

Model 4501 Materials Testing HYPOT 0-35 KV at 2 KVA

This popular model meets dielectric strength testing requirements of Specification D-149, ASTM Standards on Electrical Insulation Materials. Output continuously variable from 0-35 KV a-c at 2 KVA (intermittent rating). Magnetic breaker trips when specimen breaks down. Output termination in jacks at center of the lucite cabinet top accepts the interchangeable ARI materials testing fixtures. Optional features: interlocked clear lucite test cage and selection of ARI plug-in materials testing fixtures, automatic rate of rise, dual sensitivity circuit breaker, etc.

Request Insulation Materials Tester Bulletin

High Voltage Test Equipment to 500 KV AC and 1,000 KV DC

A full range of instruments for extra high voltage dielectric strength testing. AC or DC potentials at capacities of up to 150 KVA or more. Control and measurement features include: automatic rate of voltage rise, memory circuit to record breakdown voltage, output current metering, separate low voltage control and high voltage test cabinets and many others.

ARI has over 30 years experience in the design and manufacture of heavy duty very high voltage test equipment. All instruments are ruggedly constructed and fully tested in our own high voltage laboratory.

Corona Testing Equipment

New instruments detect, display and measure corona caused by voids, surface or other conditions in the insulation sample or the equipment under test.

Instruments include: specially constructed corona-free HYPOT test set, a pickup network to extract the true corona signal and the corona detection display module. Detector also incorporates a calibrator to make quantitative corona measurements down to 0.1 picocoulombs.

These modules are available as individual units or as a complete integrated instrument. Standard models with test potentials of 10 to 100 KV AC include these two popular models:

Model	Output KV	KVA Capacity	Cabinet Style	Price
4074	10	0.25	Bench	$2250
4309	35	1.0	Console	3950

Request Bulletin 4-1.9.

Mobile HYPOTS . . . to 150 KV DC

Heavy-duty mobile test sets for determining insulation leakage and dielectric strength of cables, bushings, switch-gear, transformers, motors and generators.

Outputs continuously variable from 0 to 45 KV and on up to 150 KV, with ratings of 2.5, 5, 10 ma. at full voltage.

Features include: 4½" kilovoltmeter connected directly across the high voltage output; three-range 4½" microammeter electronically protected against overload; zero return interlock; connector for remote safety interlock; fast-acting magnetic circuit breaker in output to protect high voltage circuits and external load; thermal overload breaker to protect input circuits; long-life silicon high voltage rectifiers; metered return and bypass return terminals for measurement of load (leakage) or bypass (guard) currents.

Request Mobile DC HYPOT Bulletin 5-1.16.

INSULATION TESTING INSTRUMENTS

ASSOCIATED RESEARCH, INC.

HYPOT® Junior BREAKDOWN TESTERS

Model 411
(illustrated)
0-2500 volts A.C. output

only $175

make faster, safer AC dielectric strength tests of electronic parts and components, small tools, appliances, motors, transformers, etc.

Simple to operate. Make breakdown, leakage and short tests to UL, CSA, ASTM, NEMA, IEEE, MIL and EASA standards. 115 vac, 50/60 cycle input. Continuously adjustable output. Included are: complete metering, controls, safety features, case with removable cover, test leads, line cord, instructions.

Visual Indicator Models . . . have neon "breakdown" light for breakdown, corona or arcing indication . . . and separate neon "leakage" light for leakage indication adjustable 0.3-3.0 Ma. 5 Models from 0-1500 to 0-10,000 volts output, priced from . . . . . **$165 to $260.**

Automatic "Squawker" models provide audible and visual test indications. 4 models from 0-1500 to 0-6000 volts output, priced from . . . . . **$265 to $290.**

Request Bulletin 4-1.3.

HYPOT® Juniors

with leakage current metering

Two new models incorporate three range micro-ammeters and guard circuits. Both feature:

- low AC leakage current measurement
- external guard circuit to eliminate stray leakage current
- accuracy of ± 3% F.S. on voltage and current ranges

Model No.	Output Voltage	Leakage Current Ranges	Price
4006	0-0.75/1.5 KV	0-50/500/5000 microamps	$415.00
4030	0-2/4 KV	0-50/500/5000 microamps	$495.00

Request Bulletin 4-1.10.

MEGOHMMETER Model 2850

measures insulation resistance to 10 million megohms

only $345

Advanced features:

- **constant test voltage over full range**
- **no overload damage**
- **positive line-voltage control**
- **maximum guarding flexibility**
- **latest tube-miniaturization techniques**

Versatile, accurate, reliable. Dual test voltage . . . 500 vdc and 50 vdc. 24" total scale length . . . 1 to 10,000,000 megohms in 6 decades. 115 vac, 50/60 cycle input. Measures resistance on printed circuits, transistor and miniaturized circuit components, cables, motors, etc. Measures leakage resistance of capacitors. Measures grounded and ungrounded sections of three-terminal resistors.

Also available: Model 2851 with 100 vdc and 500 vdc dual test ranges . . . . . only **$355.**

Request Bulletin 2-1.4.

Automatic Test Instrumentation

Synchro/Resolver Test Stands

Astrosystems designs and produces standard and custom synchro and resolver testers. These devices measure synchro/resolver parameters such as accuracy, phase shift and transformation ratio. Indexing tables are also supplied as part of complete synchro/resolver and servo test systems. Options include error printout and computer control. Write for Data File No. 107.

Automatic Test Building Blocks

Building blocks are available for use in general purpose and special purpose automatic test systems. Devices include stimuli equipment such as synchro simulators, programmable AC voltage generators, programmable power supplies and automatic servo inputs. Measurement devices include voltage measuring blocks, response monitors and phase indicators. Write for Data File No. 107.

Automatic Synchro/Resolver Bridge

The Automatic Synchro Resolver Bridge reads out synchro or resolver inputs on a direct in-line decimal display to an accuracy of 0.01°, completely automatically. This solid state readout eliminates the necessity for complex manual setting of synchro bridges and error detectors. BCD or binary electrical digital outputs are provided. Write for Data File No. 110.

Automatic Synchro/Resolver Converters

Automatic Synchro/Resolver Converters provide for programmed synchro/resolver outputs and measurement of synchro/resolver inputs in the same unit. These solid state devices are available with resolutions and accuracies to 16 binary bits (20 seconds of arc). Standards units cover the frequency range from 200Hz to 10K Hz without deterioration in accuracy. Write for Data File No. 107.

Automatic Test Instrumentation

Automatic Converter Tester

Automatic Converter Testers are completely self contained devices for laboratory or production testing of all types of synchro, resolver and voltage digital conversion equipment. The units feature push button selection of tests such as accuracy, phase shift and transformation ratio, with an in-line decimal display of error in actual measurement parameters. Write for Data File No. 107.

Automatic Test Systems

Astrosystems designs and manufactures complete general purpose and special purpose automatic test systems. These units are constructed from standard building blocks and provide programming, stimuli, measurement and recording functions. Programming and data readout can be tape or computer controlled. Simple programming allows tests to be accomplished by relatively unskilled personnel. Data File No. 107.

Computer Controlled Circuit Test Systems

Astrosystems designs and produces automatic circuit test systems controlled by general purpose computers. These systems can be operated, controlled and programmed by test engineers and technicians unfamiliar with computers and computer terminology. A unique interactive communication system is employed which uses only English language and is completely unit-under-test oriented. The economical way to automate production testing, the systems perform go/no-go as well as diagnostic tests. Send for Data File #123.

Advanced Test Instrumentation

Decade Synchro/Resolver Standards and Bridges

These devices are completely passive instruments for testing and simulating synchro/resolver systems to absolute accuracies of 2 seconds of arc. Units are available with 1° to .0001° resolution and feature direct angular readout. The units employ a unique toroidal ratio transformer technique to generate synchro and resolver voltages or discern synchro angle errors. Uses cover a wide range of applications for both laboratory and in-the-field use. Write for Data File No. 105.

Synchro and Resolver Standards and Bridges

Synchro and Resolver Standards and Bridges test and simulate synchros, resolvers and servo systems quickly and economically. All units are accurate to 2 arc seconds, traceable to the National Bureau of Standards. Units are available with 5°, 10° and 15° resolution to cover a wide range of applications for both laboratory and system use. Write for Data File No. 105.

Instrumentation Transformers

Astrosystems high precision toroidal transformers are produced to accuracies of better than 0.5 parts per million. Available are matched high precision isolation transformers, bridging transformers, high precision voltage scaling transformers and Scott "T" transformers. Write for Data File No. 117.

Transducer Indicators

Astrosystems Transducer Indicators are random access converters capable of direct readout from thermocouples, strain gages, flow meters or other transducers, the outputs of which are in the form of voltages or frequencies.

The multi-channel units can be both manually and computer controlled in a time-shared mode, providing concurrent visual readouts and BCD formats of the different channels. For non-linear inputs, Digital Linearization format for over 100 sequences can be provided.

Resolution and accuracy ±0.1% of full scale. Measurement time is 75 millisecond. Write for Data File No. 122.

AVTEL FULLY QUALIFIED SUBCARRIER OSCILLATORS

AVTEL

AVTEL SERIES 150 AND 160 SUBCARRIER OSCILLATORS OFFER THESE OUTSTANDING ADVANTAGES

FULLY MIL-QUALIFIED. Series 150 and 160 oscillators have been fully qualified to all applicable military specifications.

INCREASED OPERATING TEMPERATURE. Series 150 operates at temperatures from −55°C to +125°C. Series 160 operates from −20°C to +85°C.

HIGHER OUTPUT LEVEL. Avtel's oscillators can produce 3 volts rms into 3000 ohms, permitting low-impedance mixing networks, eliminating the need for a mixing amplifier, improving system signal-to-noise ratio, and reducing system size, weight, and power consumption.

WIDE STORAGE TEMPERATURE RANGE. Avtel's oscillators can be stored indefinitely at temperatures of −75°C to +150°C.

SMALL SIZE. The unit has a total volume of only 1.6 cubic inches and weighs 1.5 ounces.

PIN PROTECTION. The connector is recessed into the bottom of the case to protect pins from damage during handling.

EXTREME ACCURACY. Maximum zero drift is less than ±1% of design bandwidth over the entire operating temperature range. Deviation sensitivity remains constant within 0.5% of design bandwidth over the temperature range.

MAXIMUM RELIABILITY. Avtel's subcarrier oscillators are designed so that each component operates well within its maximum stress ratings. No adjustable components are used, and shift problems resulting from severe environmental conditions are eliminated.

HIGH STABILITY. Frequency and sensitivity remain constant to 0.1% of the design bandwidth voltage. Frequency deviation is less than 0.25% of design bandwidth when subjected to shock and acceleration of 200 g's and vibration of 5 to 5000 cps.

LOW INPUT POWER. The Series 160 requires an input of 15 ma, at 28 vdc. The Series 150, 11 ma at 28 vdc.

NOTE: Avtel specializes in solid state power conversion equipment. See Section 4000.

SPECIFICATIONS

AVAILABLE BANDS

For Channels 1 through 18 and Channels A through E.

INPUT

SIGNAL: Any 5-volt segment between −5 and +5 volts.

IMPEDANCE: 500K ohms ±5% resistive, Channels 1 through 18; 250K ohms ±5% resistive, Channels A through E.

INPUT INTELLIGENCE FREQUENCY RESPONSE: 0 db at a deviation ratio of 5.0. Modulation frequencies higher than recommended by IRIG may be used for a deviation ratio of 2.0 at an attenuation of 3 db.

SOURCE IMPEDANCE VARIATION: Oscillator frequency change is less than ±1% of the design bandwidth with a variation in source impedance over the range from short to open circuit at any temperature between −55°C and +125°C. For 150's −20°C and +85°C for 160's.

INPUT OVERLOAD CAPABILITY: The oscillator will withstand signal inputs of ±50 volts without damage.

THERMAL SHOCK EFFECT: Rapid changes in environmental temperature will not cause a permanent change in characteristics. A change of 10°C per minute will cause less than 3% peak error. An instantaneous shock of 180°C in either direction between −55°C and +125°C for Series 150 of 105°C between −20°C and +85°C for Series 160 will cause less than 10% peak error. In either case, the oscillator will recover to well within specification tolerances in not more than 10 minutes following the thermal shock.

OUTPUT

LEVEL: −3 volts rms ±0.1 volt into a 3000 ohm resistive load.

AMPLITUDE MODULATION: The maximum change in output level is ±0.5 db over the band.

BANDWIDTH: The design bandwidth is 98% of the total bandwidth specified in MIL-T-26985.

SENSE: With an increase in input voltage, there is a linear increase in frequency.

LINEARITY: Better than ±0.1% of the design bandwidth from best straight line.

ZERO INPUT DRIFT: ±1% maximum of the design bandwidth between −55°C and +125°C reference frequency for Series 150 and between −20°C and +85°C for Series 160.

SENSITIVITY SHIFT: ±1% at either end of the band over the temperature range.

HARMONIC DISTORTION: 1% THD maximum.

POWER REQUIREMENTS

28V dc ±10%, 11 ma nominal, 150; 15 ma nominal, 160.

STABILITY: Frequency and sensitivity will remain constant to ±0.1% with a variation in the supply voltage of ±10%.

SOURCE POWER OVER-VOLTAGE PROTECTION: Meets and exceeds all requirements of MIL-E-7894A for power transients when installed in the Avtel Series 150 Subcarrier Chassis.

ENVIRONMENTAL

THERMAL SHOCK: Exceeds the requirements of MIL-E-5272C.

OPERATING TEMPERATURE RANGE: −55°C to +125°C for Series 150, −20°C to +85°C for Series 160.

STORAGE TEMPERATURE RANGE: −75°C to +150°C.

SHOCK: Frequency deviation is less than ±0.25% of design bandwidth when tested to 200 g's shock in accordance with MIL-E-5272C.

ACCELERATION: Frequency deviation is less than 0.25% of design bandwidth when tested to 200 g's acceleration in accordance with MIL-E-5272C, Procedure II.

HUMIDITY: The unit is hermetically sealed and meets all requirements of MIL-E-5272C, Procedure I.

VIBRATION: Frequency deviation (momentary or fixed) is less than 0.25% of design bandwidth when vibrated from 5 cps to 2000 cps in accordance with MIL-E-5272C, Procedure I.

ALTITUDE: Meets all requirements of MIL-E-5272C when tested at zero to 10 atmospheres.

INSTALLATION DATA

HEIGHT: 1.510 maximum.

WIDTH: 1.335 maximum.

DEPTH: 0.810 maximum.

TOTAL VOLUME: 1.6 cubic inches nominal.

WEIGHT: 1.5 ounces nominal.

MOUNTING: Attaches to subcarrier chassis with two 4-40 machine screws.

CASE: Cast aluminum.

CONNECTORS: Cannon MDI-9S recessed into bottom of case.

ASSOCIATED EQUIPMENT

SERIES 150 SUBCARRIER CHASSIS: Standard 4, 6, 8, 10, 12, 14, 16, and 18-channel Subcarrier Chassis are available. The chassis will accommodate 4 to 18 oscillators in 2-unit steps. A 12-channel chassis with 12 oscillators attached displaces less than 28 cubic inches.

Beckman®

ELECTRICAL TEST EQUIPMENT & POWER SUPPLIES

WHEATSTONE BRIDGE — Model RN Series

Universally use for the measurement of all types of resistance devices and circuits where high accuracy is required. Models available for performing Murray and Varley Loop tests.

Model	Total Resistance of Decade	Ration Dial Settings	Circuits
RN-1	9 × (1 + 10 + 100 + 1000)	.001, .01, .1, 1.0, 10, 100, 1000	—
RN-2	9 × (1 + 10 + 100 + 1000)	.001, .01, .1, 1.0, 10, 100, 1000, M10, M100, M1000	Murray & Varley
RN-3	10 × (1 + 10 +100) + 9 × (1000)	1/1000, 1/100, 1/10, 1.9, ¼, 1/1, 10/1, 100/1, 1000/1, M10, M100, M1000	Murray & Varley

LOW RESISTANCE OHMMETER — Model LRO-1

For measuring resistance of sensitive relay contacts, fuses, bus-bars and connections, rail joints, pipe or conduit, switch contacts, transformer windings, motor windings, bonding, grounding and similar applications. Current through the unknown resistance never exceeds 110 ma. Extreme accuracy. Self-contained, including 1½ V flashlight battery. Ranges: 0.1 ohm, 1 ohm and 10 ohms. 100 meter scale divisions. One scale division on 0.1 ohm range is 0.001 ohm. Accuracy ±½% based on full scale values.

TEMPERATURE RISE BRIDGE — Model TRB-1

Used in measuring temperature rise in applications where the change-in-resistance method is used (transformers, chokes, motors, generators, solenoids). Covers transformer temperature rise to beyond Class B rating. In-line digital readout indicates temperature rise directly in degrees C. Winding resistance read at anytime without disturbing initial ambient bridge balance. Doubles as standard resistance bridge. Operates on 120/240 volts, 50/60 Hz, single phase.

RESISTANCE DEVIATION BRIDGE — Model DB-1

FEATURES direct reading of percentage of deviation from internal resistance standard. Accurate to 0.1%. Low bridge voltage (1 volt nominal across test piece). Deviation scales of 20, 5, 2, and 1%. **Model DB-1** can be operated as a balanced or unbalanced Wheatstone Bridge for rapid resistance comparisons. It can be used to indicate percentage deviation from an internal standard; comparison of resistors to sample resistor; matching pairs of resistors; and for general resistance measurements by the null method. Provisions are made for external standards, when required, and for using built-in decade steps as a resistance standard for other measurement. Provides the incoming Inspection Departments and Engineering Laboratories with a rapid, accurate method of sorting resistors into percentage classifications.

PORTABLE HIGH VOLTAGE DC POWER SUPPLIES

These general purpose supplies are particularly suited for laboratory or production line use to provide a convenient source of high voltage, low current dc power. Widely used for such applications as powering photomultiplier tubes, image intensifiers, condenser chargng, and routine insulation breakdown testing.

Voltage readings are indicated by a 6" precision mirror scale kilovoltmeter of 1% accuracy. Polarity is reversible from the front panel (patent applied for). An ac input protection fuse is included as well as a built-in limiting ballast lamp restricting maximum current output levels. These levels may be adjusted by changing ballast. A single control allows continuous adjustment of output voltage from zero to maximum rated voltage.

The output is unregulated (regulation is 20% for 10 to 100% loading). Current rating is 5 milliamperes. The ripple is 5% (rms) at full voltage and current load.

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT	DIMENSIONS H x W x D	NET WGT. (Pounds)	INPUT POWER REQUIREMENTS
6000-1MA-MS	0-1000	5 MA	11" x 9" x 13"	17	115 V, 60 Hz, 100 watts
6000-5MA-MS	0-2500	5 MA	11" x 9" x 13"	17	115 V, 60 Hz, 100 watts
6005-5MA-MS	0-5KV	5 MA	11" x 9" x 13"	17	115 V, 60 Hz, 100 watts
6010-5MA-MS	0-10 KV	5 MA	11" x 9" x 13"	23	115 V, 60 Hz, 100 watts
6015-5MA-MS	0-15 KV	5 MA	11" x 9" x 13"	23	115 V, 60 Hz, 150 watts

INSULATION TEST EQUIPMENT

WIDE RANGE MEGOHMMETERS Model L Series

Including Digital Readout. Designed for laboratory and high speed testing of motor and transformer winding insulation, cable insulation, high value resistors, capacitor insulation, and for the measurement of surface and volume leakage of insulating materials. Meets requirements for testing insulation resistance in accordance with ASTM D-257, and Federal Spec. LP-406B, Method 4041.

*Continuously variable, built-in voltmeter for accurate setting.
**Continuously variable, selectable by switch.
†Features digital readout, automatic or manual range selection.

Model	Test Voltage	Resistance Range Low	Resistance Range High	Power Cons.
L-4B	200 or 500 fixed	1 meg. 2.5 meg.	100,000 meg. 250,000 meg.	50 w.
L-6C	100 to 600*	1 meg.	100,000 meg.	80 w.
L-7	100 to 600*	1 meg.	5×10^{13} ohms	75 w.
L-8	10 to 1000**	10^5	10^{16}	35 w.
L-9†	10 to 1000*	10^6	10^{14}	145 w.

AC BREAKDOWN TESTERS Model PA Series

Type PA variable high voltage AC breakdown testers are designed to meet the requirements of ASTM specification D-149, and Federal specification LP-406, Method 4031, as well as all general purpose breakdown testing. Provided with motor-driven control of output voltage with any desired rise of secondary voltage. Available with wide variety of testing jigs.

PA-5-152	15,000 V. rms. 2KVA
PA-5-155	15,000 V. rms. 5KVA

PA-5-505	50,000 V. rms. 5KVA
PA-50-1005	100,000 V. rms. 5KVA

For even greater versatility, dual range units using multiple winding transformers are available on order. These provide two meters and a total of six scales. Typical dual-range models as follows:

PA-5-252/052	25 kv or 5 kv rms. 2KVA
PA-5-502/102	50 kv or 10 kv rms. 2KVA
PA-50-5010/1510/510	50 kv or 15 kv or 5 kv rms. 10KVA

PORTABLE OIL FILTER — MODEL P-8

Provides three methods for determining dielectric strength and breakdown voltage of insulating liquids. All HV components housed within cabinet. Interlock system protects personnel. Meets requirements of ASTM specifications D-149 and D-877. Maximum test voltage: 50,000 volts. Accuracy: ±10% of voltmeter reading. Operates on 120 volts, 50/60 Hz, single phase.

JE ELECTRODE

Oil test electrode permits dielectric breakdown acceptance and evaluation tests on liquid dielectrics using the ASTM-1816 (VDE) method. Features adjustable, spherically-capped electrodes capable of testing with 0.080" spacing. The cell body is constructed from a solid block of lucite, eliminating mechanical or bonded fabrication and assuring virtual leak-proof operation. A motor driven stirrer provides constant mixing. When used in connection with Beckman's Model P-8 Portable Oil Tester, the new electrode provides a compact, portable, reliable 50KV oil test set capable of laboratory, production and in-field testing.

DIELECTRIC BREAKDOWN TESTER Model PDA-1

Designed to provide simple, safe, accurate means of determining dielectric strength and breakdown voltage in the laboratory or factory (conforms to requirements of ASTM specifications D-149 and Federal specification L-P-406 method 4031).

Push button selection — four different leakage current meter ranges (six operating modes) — enclosed test cubicle, fail-safe circuitry, interlocked doors and oil immersed gravity-drop shorting switch allows safe use by unskilled personnel.

- Continuously adjustable (automatic or manual) test output voltage control uses full 100% rotation to allow fine control for critical testing (choice of AC or DC).
- Provides for transient suppression and introduction of non-linear resistance into transformer.
- Maximum versatility of test jig set-up using plug-in jigs or high voltage cable to external "hi-pot" testing circuits.
- Self contained unit — portable yet provides easy access to all parts for maintenance.

TRACKING and EROSION RESISTANCE TEST -- TERT-1

Evaluates relative track and erosion resistance of various materials using Liquid Contamination Inclined Plane method described in ASTM and IEEE specifications. Test represents service exposure evaluation of wide range of insulated material subject to AC surface current. Test conditions simulate water film on insulation surface in which ionizable and other contaminants may dissolve. Contaminant rate easily controlled to simulate different service stresses and outside conditions. Tests conducted on 2" x 5" specimen; actual test covers 1" x 2" track area. Test criteria is either "time to track a fixed distance at a fixed voltage," or "voltage to initiate tracking" — depending on specific service requirement evaluation.

VOLTAGE BREAKDOWN TESTER — Model P-2B

Furnishes adjustable ac or dc test voltage for determining capability or in flashtesting capacitors and insulating materials. Completely solid-state, no relays or circuit breakers. Continuously adjustable, metered output. Breakdown indication provided.

SPECIFICATIONS

Model	Voltage Range* ac (rms)	Voltage Range* dc	Input Power Required
P-2B	0-3000	0-4000	120/240 V, 50/60 Hz

* Metering Accuracy ±5% Full-scale.

INSULATION TEST SETS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output. Includes kilovoltmeter, current meter and automatic overload limiter circuits. Metering accuracies are ±3%. The basic model number covers AC types. Add the prefix AC/DC to the basic model number for the dual output type.

Model	Type	Voltages	Current Meter
3000	AC or AC/DC	0 to 3,000	10 MA
1000	AC or AC/DC	0 to 10,000	10 MA
2500-DC	DC only	0 to 25,000	100 μA
4000-DC	DC only	0 to 40,000	50 μA

HIGH VOLTAGE SCHERING BRIDGE — Model PS-1GP

Used to measure dissipation and capacitance of electric insulating material while subjected to high-voltage stress. From these two measured values and the dimensions of the sample and test electrodes, dielectric constant, loss factor, and other values may be calculated.

Exceptionally wide capacitance range from 0.0000025 to 1.0 mfd. Built-in shunts for testing large capacitances without additional equipment. Materials can be tested at operating value. Easy-to-operate, all controls located on front panel. High accuracy, plus or minus 0.2% capacitance accuracy and 2.0% or better tangent accuracy.

BEEDE . . . Value by Design

DIGITAL PANEL METERS

The Beede Digital Panel Meter is a precision measuring instrument that displays an analog input signal as a digital readout. It is a single, complete unit (including power supply), requiring only signal and power connections for immediate use. It is designed to meet the needs of the manufacturer who plans to install the DPM as a component in the equipment he produces.

Beede's DPM is packaged in a rugged, dust-sealed, die-cast aluminum case with a completely enclosed wiring compartment. The case size is compatible with most known panel cutouts. The unit is equipped with screw terminals to permit connection by production personnel, the calibration adjustments are hidden from curious operators, and the meter is easily and securely installed or removed from the front of the panel to which it mounts.

The front panel appearance may be stylishly and conveniently customized to complement the appearance of your panel. The bezel color, and the company logo and scale identification printed on the decorative mask mounted behind the glass front will be tailored to provide your own proprietary appearance.

The standard models have been deliberately designed to fit into existing instrument circuits designed for pointer type panel meters, *without requiring modifications* to the existing circuit, simplifying the job of the design engineer changing over from pointer type panel meters to digital panel meters. Engineers will also appreciate the flexibility of being able to design a piece of equipment with one circuit, and the option of providing either a pointer type, or digital panel meter readout to their customers.

Beede supplies panel meters designed to customer specifications. Each unit shipped has been produced for a specific customer order, and the electrical range, readout and appearance have been engineered to meet the customer's requirements. A standard BCD (Binary Coded Decimal) Output option is available, and for special volume requirements, a wide choice of electrical and mechanical design options is also available.

SPECIFICATIONS:

Accuracy ±0.1% of reading ± one digit. This accuracy will be maintained over a temperature range of 20°F for 60 days without adjustment. Temperature coefficient: 0.004%/°F.

Temperature Range 14°F to 140°F operating. −20°F to 185° storage.

Input — Differential input isolated to ±300 VDC or AC (Peak). ±3.5 VDC or AC (Peak) when BCD utilized.

Optional Input Arrangements — Current Source for Resistance Measurement. Ratiometric Input.

Speed — 2 conversions/second (Standard). Other speeds available.

Resolution and Display — Three digits plus "1" over-range. Unit accurate to full 100% over-range. Automatic polarity indication. Three least significant digits extinguish for reading above 100% over-range. NIXIE™ display; ½ inch nominal character height. Three decimal point positions selected by grounding connector pins. Hold and/or blanking capability furnished as standard.

BCD Output Option — Three BCD 8-4-2-1 digits plus "1" over-range digit totaling 13 lines. Logic Levels: Standard TTL/DTL practice. End of Conversion, polarity signals and Trigger Input available.

Power Requirements — 105 to 125VAC, 57 to 63Hz, 3.5 watts nominal. Contact Beede for other input voltages and frequencies.

Termination — Standard unit without BCD Output option has nine, No. 6 screw terminals, and movable connector to select decimal point position. Units with BCD Output option have two, solder type, 30 pin edge connectors. Terminal Board cover supplied, providing a completely enclosed wiring compartment.

Mechanical Specifications — Die-cast aluminum, dust-sealed case. Die-cast aluminum front bezel with glass window and aluminum decorative mask. Amber polarizing filter. Captive front pulls out and swings to side for access to zero and span adjustments, and panel clamping arrangement. Front may be completely removed. Steel terminal board cover, screw fastened. Space available in case for customer specified accessory components.

Also available as options: Plastic window; Red or neutral polarizing filter; Sealed case for JIC type applications; Shorter depth behind panel dimension.

Mounting — Panel mounting is standard. Installable and removable from the front of the panel with leads connected. Rugged clamping arrangement designed for panels up to ⅜ inch thick. Mounting arrangement for heavier panels, conduit mount and yoke mount with stand available as options.

NON-CONTACTING CONTROL METER RELAYS

The Beede Control Meter Relay is an instrument that combines a permanent magnet-moving coil meter with an adjustable photoelectric sensor, switching circuit and output switch. As the indicated variable being monitored passes the adjustable set point, an output relay is either energized or de-energized. Units are available with either one or two adjustable set points.
Beede has greatly simplified the design of the conventional non-contacting meter relay, significantly reducing the number of parts incorporated in the unit, resulting in price savings of up to 50% without a loss of quality features.

FEATURES

- **Optical, non-contacting control-continuous indication**
- **Wide variety of options available for easy, inexpensive customizing**
- **Inherently Fail Safe**
- **AC or DC power input**
- **Directive Drive Set Pointers**
- **Bulb Life in excess of 10 yrs.**
- **Meter movement and dial custom designed to your specifications if required**
- **Meter permanently free of static influence**
- **Attractive modern "Centurion" style case**
- **Large easy-to-read dial**

SPECIAL PYROMETER FEATURES

- **Models available from 0-300° F**
- **Electrical ambient temperature compensation**
- **Thermocouple break protection**
- **Internal potentiometer to compensate for external lead resistance**
- **Deadband externally adjustable**

SPECIFICATIONS

Accuracy ±2% or ±1%
ON-OFF operation or latching with manual reset
Output: 10 amp (resistive load) DPDT relay for each set point. Solid State Output available
Standard Deadband is 0.5%
Power Requirements 105 to 130 Volts AC.
Other AC and DC power inputs available
Ambient Temperature 40° F to 165° F is standard

MOVEMENTS

MAG-BAND TAUT BAND
0-10 μA DC minimum range
MAG-B PIVOT AND JEWEL
0-50 μA DC minimum range
Size: 3" and 4"

PANEL METERS

CENTURION LINE — A fine line of meters of modern clean design constructed of durable molded phenolic permitting rugged handling. Front of panel mounting models available in 4″ and 3″ cases, behind-the-panel model available in 4″ case only. Illuminated models available in 4″ size.

UNIVERSAL LINE — Large 6″ and 8″ clear plastic cases with flat fronts suitable for front of panel mounting or flush mounting behind panel. Back lighting possible with these models; available clear or painted at the bottom. Beede high torque movements are especially suited for these larger cases.

TRADITIONAL LINE — The Traditional meter look is available in various rectangular and round phenolic cases.

DESIGNER LINE — Featuring a clear picture frame design, this line offers a wide selection of sizes. 2″, 3″, 4″ and 6″ in both front and behind-the-panel mounting. The front-of-panel models are available with a painted front or clear front featuring the floating oval escutcheon name plate. Illumination is available in behind panel mounting models.

PANORAMA LINE — This "Wider Than Higher" look design is popular for applications requiring curved lines and soft corners to match instruments having similar features. Available in 3″, 4″ and 7″ cases.

CLEAR FRONT LINE — The Clear Front Styling is designed for general purpose meter applications. Available in 1″, 2″, 3″ and 4″ cases.

EDGEWISE — Designed for applications requiring minimum panel space. Available as a single unit or as a stacked double unit in one case.

250° LINE — Beede's famous 250° movement is available in a switchboard style presentation in brass, chrome or black lacquer case with glass front.

MAG-B Taut-Band Movement

MAG-B Pivot and Jewel Movement

Illustrated here are a few of Beede's high torque meter movements. A broad line of standard Beede meter movements is available in a complete range of sensitivities and electrical characteristics including ½% accuracy taut band movements with individually calibrated scales. These meter movements are used in the panel meter case models described above, or are installed in special customer cases, or are supplied separately for customer installation.

METER MOVEMENTS
MAG-BAND TAUT BAND . . . Self-shielded, high-torque, excellent balance and no drift. Maximum sensitivities: 0-5 μA DC; 0-5 MV DC ± 1% OR ±2% accuracy.
MAG-B . . . Rugged, high-torque, self-shielded pivot and jewel movement. Maximum sensitivities: 0-50 uA DC; 0-20 MV DC ± 1% or ± 2% accuracy.
250°MOVEMENT — A fine tracking, sturdy, self-shielded 250° movement.

CUSTOM METER DESIGN

Beede specializes in custom designed meters to meet exacting customer requirements.

Beede has application experience and an in-depth knowledge of the technology of most meter-using industries.

B & K Instruments, Inc. specializes in the application and marketing of Bruel & Kjaer instruments and complete systems for measurement, analysis, control, and recording of AC voltages from 2 Hz to 200,000 Hz. To provide customers with immediate access to men familiar with their problems and with application experience in their area, the B & K staff is divided into specific market groups:

EDUCATIONAL — Teaching dynamic measurements; sound, vibration, strain, and shock.

HUMAN ACOUSTICS — Speech and hearing, hearing aids, psycho-acoustics, neuro-physiological research, heart sound.

AEROSPACE ENVIRONMENT — Data acquision, data processing, vibration environmental testing, instrument and transducer calibration, and bio-acoustics testing.

PRODUCT NOISE AND VIBRATION — Product noise and vibration analysis, control, or reduction; materials testing, architectural acoustics, traffic, airport noise, and similar fields.

COMMUNICATIONS — Recording, reproduction, broadcasting, and dictating equipment; telephone equipment, hydrophones, and related equipment.

GENERAL INSTRUMENTS — Measurement of voltages, resistance, impedance, phase angles, and other values.

Within each market group is a pool of practical experience and know-how, available through the B & K field representatives, or by direct contact to Cleveland.

Individual Bruel & Kjaer instruments are unique and unmatched for accurate, professional measurements. A separate staff is maintained in Cleveland to assist customers in integrating instruments into reliable systems — or to design and manufacture custom systems to solve specific measurement, control, or analysis problems.

B & K instruments and systems are available for sale, lease, or rental. Factory-trained field representatives are located in most major cities.

Each B & K instrument is described in an individual Specification Sheet. The entire line is presented in condensed form in an annual Condensed Catalog. A quarterly journal, the B & K Technical Review, reports new developments in the field and from Bruel & Kjaer research. For the B & K instrument user, a Service Note program keeps him up-to-date on new servicing and calibration techniques, accessories, and ideas for assuring effective use of his instruments. An Application Note series discusses new solutions to difficult or unusual problems. All publications are available free, on request.

INSTRUMENTS

GOLD SEAL GUARANTEE
All ceramic-encapsulated transverse probes guaranteed one year against breakage

GAUSSMETERS

MODEL 620

MODEL 640

- *0.5% Accuracy to 10 kG* • *1.0% Accuracy to 30 kG*
- *0.3% Built-in Calibration Accuracy*
- *1000 X Scale Expansion (with automatic zero center readout)*
- *Temperature Compensated Probes*
- *100 kG Probe Capability*
- *1 Volt and 5 Volt FS Calibrated Output*
- *AC and DC Magnetic fields*

Bell Gaussmeters, in a wide range of standard, in-stock models are suited for use in a broad spectrum of both industrial and laboratory applications. Industrial applications include: magnet processing, charging, stabilizing, testing, sorting, classifying magnets; evaluation of magnetic structures, tachometers, pm motors, TV focusing yokes, tape heads and all types of magnetic materials.

In Laboratory: mass spectrometer field monitoring; electron beam focusing magnets; field monitoring and control of large electromagnets; and magnetic ink paper and tape, evaluation and test.

Special Modifications:
If your specific application for a magnetic field sensing instrument cannot be met with a standard BELL Gaussmeter our engineers will be glad to study your needs and recommend an instrument with necessary modifications.

MODEL 660
• Digital and Analog Readout • 2 Parts in 10^5 Resolution FS

MODEL 610
• Low Cost • General Purpose • 1.5% FS Accuracy to 10 kG

MODEL 811
• Digital Readout • Modular Construction • 100 PPM/°C Stability • 0.25% Accuracy to 100 kG • 1.0 Volt FS output with 2X overranging capability • B C D Output Computer Compatible

Suitable Probes for all purposes*

Bell probes are available in a wide range of types: transverse types in thicknesses from 0.006 and widths from 0.040; axial types in outside diameters from 0.062; for industrial use in ruggedized design, encapsulated in brass or aluminum; in hand held models and for fixture mounting.

Self-contained Modular Components

MODEL 821

BELL'S new modular instrument design makes it now possible to improve many process control functions with the noncontacting detection capabilities of magnetics. Application flexibility is added to recognized high field measuring performance. By varying the combination of modules instruments can be tailored — and at a later date expanded — for such applications as: Magnetic Field Measurement; Electromagnet Field Control; Permanent Magnet Inspection and Classification; Automatic Magnet Processing; Noncontact Position Sensing; Material Thickness Monitoring; Material Hardness Testing; Weld and Sheet Edge Tracking; and many others.

Hardness Tester
A system composed of BELL Modules for making a nondestructive test by the residual flux technique. Composed of a field detector, magnetizer, classifier and power supply modules mounted in a rack bin.

TERMALINE® RF ABSORPTION WATTMETERS

TERMALINE® RF ABSORPTION WATTMETERS

Are direct reading instruments for absorbing and measuring RF power in 50-ohm coaxial line systems through the frequencies of 2 to 1000 MHz. The load section of the TERMALINE Wattmeter serves as a dummy load. The indicating meter is calibrated to read RF power directly in watts with ±5% of full scale accuracy. TERMALINE Wattmeters are available from milliwatts to kilowatts.

Maximum Power	Calibrated Frequency Range	Power Scales Available	Connector	Model	U.S. Price

*Special calibration 500-1000 MHz available at time of order.
**25-500 MHz ±5%, 500-1000 MHz ±10% Accuracy.

COAXIAL RF FILTERS

Custom engineered or field-proven designs. High rejection attenuation filters available with Low-pass cut-off from 16 to 2700 MHz (about fifty designs at 400 MHz), Hi-pass cut-off frequencies from 30 to 1000 MHz, Band-pass as narrow as 5% of center frequency. Sizes from ½ cubic inches, with subminiature connectors, to 3⅛" line.

TERMALINE® RF COAXIAL LOAD RESISTORS TENULINE® POWER ATTENUATORS

TERMALINE® RF COAXIAL LOAD RESISTORS

For accurate, non-radiating termination of 50-ohm RF coaxial transmission lines are designed for use in permanent installations, development testing and trouble shooting of transmitters, intermediate components, power tubes, and accessories.

TENULINE® POWER ATTENUATORS

In addition to terminating a 50-ohm system, deliver an output signal 30 dB below the input, for RFI measurements, for extending the range of low-power wattmeters, for isolation of system components, etc.

THRULINE®
RF DIRECTIONAL WATTMETERS

Insertion instruments for measuring and monitoring incident and reflected power in coaxial transmission lines with ± 5% of full scale accuracy. Insertion VSWR is less than 1.05. Net power under any load condition is the difference between incident and reflected power readings, which also yield load VSWR from a nomograph.

4311 THRULINE Peak **and** CW Wattmeter **also** measures power of **pulsed RF** systems such as air navigational aids, telemetry, radar, etc. from 0.4 microsecond pulse width (± 8% accuracy).

Models 4111-12-13-14 are new palm-sized CW Wattmeters with one forward and one reflected power scale for servicing transmitters in the 2-30 MHz, 25-175 MHz or the 450-470 MHz frequency range.

Line Sections with single or double element sockets for all THRULINE Wattmeters, as well as ⅞" diameter instruments available.

QC-TYPE CONNECTORS (Quick Change) Adaptable to particular TERMALINE, THRULINE, and TENULINE units, these connectors may be quickly changed in the field. Connector types available are: Female or male BNC, TNC, N, C, SC, HN, LC, UHF, LT, ⅞" and 1⅝" EIA Flanged.

Normally supplied: (1) Female N, (2) Female LC, (3) Male N.

Prices are subject to change without notice. F.O.B. Cleveland, Ohio.

OTHER BIRD INSTRUMENTS THRULINE® RF DIRECTIONAL POWER SENSORS • TERMALINE® CALORIMETERS • BIRD WATTCHER® RF POWER MONITOR/ALARM • SENTRILINE® FILTER-COUPLERS • COAXWITCH® COAXIAL SELECTOR SWITCHES.

BOONTON ELECTRONICS CORPORATION

Boonton Electronics Corporation, engaged exclusively in developing and producing precision electronic laboratory instrumentation and high speed automated production testing equipment, is represented world-wide by skilled independent sales engineering representatives, who are thoroughly qualified to offer guidance and consultation on your electronic instrumentation problems. Check the yellow pages of this directory under Boonton Electronics for our representative in your area.

IMPEDANCE INSTRUMENTATION

Model 33A/1

RF Admittance Bridge

Measures 2-terminal shunt capacitance and conductance at high frequencies. Specified capacitance resolution obtains with 10 times lower test level than earlier Model 33A with accuracy improved to ±0.3%. Inductance, resistance, dissipation factor, and Q may readily be determined. Internal and external dc bias. Major applications in diode, transistor, and IC measurements.

Capacitance Measurement: 0 to 150 pF from 1 MHz to 50 MHz; to 30 pF at 100 MHz; accuracy, ±0.3%; 10-150 pF; resolution, 0.02 pF

Conductance Measurement: 0 to 25,000 μmhos; accuracy, ±2%; resolution, 0.5 μmho

Test Signal: 7 internally supplied crystal controlled frequencies of 1, 5, 10, 20, 30, 50, and 100 MHz; level continuously adjustable from 0.1 V down to as low as 1 mV

DC Bias: Internal, continuously adjustable from —6 to +100 V; external, to ±250 V

Price: $2950.00

Model 33B/1

Ultra High Conductance Resolution RF Admittance Bridge

Conductance range, 0 to 5000 μmhos with resolution of 0.1 μmho. Otherwise similar to Model 33A/1

Price: $3500.00

Model 33C/1

Ultra High Capacitance Resolution RF Admittance Bridge

Capacitance range, 0 to 15 pF with resolution of 0.002 pF; basic accuracy, ± 1%. Otherwise similar to Model 33A/1

Price: $3150.00

Model 33D/1

Ultra High Capacitance and Conductance Resolution RF Admittance Bridge

Capacitance range 0 to 15 pF with resolution of 0.002 pF. Conductance range 0 to 5000 μmhos with resolution of 0.1 μmho. Basic accuracy, ± 1%. Otherwise similar to Model 33A/1. **Price:** $3700.00

Capacitance Range Extensions

Accessories available for measuring higher values of capacitance at frequencies up to 30 MHz for Model 33A/1 and to 20 MHz for Model 33B/1

Model 35A

Q Bridge—100 kHz to 50 MHz

Dramatically new, non-resonant 3-terminal bridge. Provides direct reading measurements of capacitance up to large values and Q over a wide range with continuously adjustable test frequency. Low test signal levels. No external work coils. Internal or external dc bias.

Capacitance Measurement: 20 to 1,000 pF (100 kHz to 50 MHz); 2 to 10,000 pF (100 kHz to 10 MHz); indirectly 0.005 to 20 pF; basic accuracy, 0.5%

Q Measurement: 5 to 10,000; basic accuracy, 5% for Q's up to 100, (10 + Q/500)% for Q's 100 to 10,000

Test Signal: Frequency continuously adjustable from 100 kHz to 50 MHz; levels <50 mV; continuously adjustable

Dual External DC Bias: HI to GND and/or LO to GND; differential ±200V

Internal DC Bias: HI to LO; 0 to 150V

Price: On request

Delivery: Consult factory

Model 71A

Capacitance/Inductance Meter—1 MHz

Quick, convenient, direct reading, 3-terminal measurements of capacitance or 2-terminal measurements of inductance. Internally supplied 1 MHz test signal. Operates with low test signal level, permitting semi-conductor tests. Linear meter scales. Provision for dc bias. Linear dc output proportional to capacitance or inductance reading for display on dvm, x-y plotter, for data logging, or, with suitable voltage comparator, for go/no go testing.

Capacitance Measurement: 0 to 1000 pF in 7 ranges; accuracy, ±1%; resolution, 0.01 pF

Inductance Measurement: 0 to 1000 μH in 7 ranges; accuracy, ±1%; resolution, 0.01 μH

Test Signal: Frequency 1 MHz; level, 15 mV rms for capacitance measurements, < 1 mV for inductance measurements

Q Range: Specified accuracies apply for test specimens having Q's of 3 or more; lower with readjustment

DC Bias: Externally supplied up to ±200 V

DC Analog Output: 0 to 100 mV or 300 mV fs depending on range numerics; also > 1 V fs for loads > 10 MΩ; linearity, 0.1% of reading; response time, 10 ms

Price: $975.00; rack-mounting version with built-in standard, Model 71AR, $1050.00

Model 71CR

Capacitance/Inductance Meter—100 kHz

Quick, convenient, direct reading, 3-terminal measurements of capacitance or 2-terminal measurements of inductance. Internally supplied 100 kHz test signal. Operates with low test signal level, permitting semi-conductor tests. Linear meter scales. Provision for dc bias. Linear dc output proportional to capacitance or inductance reading for display on dvm, x-y plotter, for data logging, or with suitable voltage comparator, for go/no go testing.

Capacitance Measurement: 0 to .01 μF in 7 ranges; accuracy, ± 1%; resolution, 0.1 pF

Inductance Measurement: 0 to 10 mH in 7 ranges; accuracy, ± 1%; resolution, 0.1 μH

Test Signal: Frequency, 100 kHz; level, 15 mV for capacitance measurements, <1 mV for inductance measurements

Q Range: Specified accuracies apply for test specimens having Q's of 3 or more; lower with readjustment

DC Bias: Externally supplied up to ±200V

DC Analog Output: 0 to 100 mV or 300 mV fs depending on range numerics; also >1 V fs for loads > 10 MΩ; linearity, 0.1% of reading; response time, 20 ms

Price: rack-mounting with built-in standard, Model 71CR, $1125.00

Model 700C

Digital Capacitance/Inductance Meter—1 MHz

Continuous digital readout of 3-terminal capacitance or 2-terminal inductance at 1 MHz. Provisions for remote capacitance measurements and dc bias of capacitance specimen. Internal capacitance standard for both high Q and low Q (Q=3) calibration check. BCD output 8, 4 2, 1 coded sequence.

Capacitance Measurement: 0 to 1000 pF in 3 ranges; lowest range, 10 pF, fs: 4 digit resolution and over-range (5th digit); basic accuracy, ±0.3%

Inductance Measurement: 0 to 100 μH in 3 ranges; lowest range, 1 μH, fs; 4 digit resolution and over-range (5th digit); basic accuracy, ±1%

Test Signal: 1 MHz, crystal controlled; level, 15 mV for capacitance, <1 mV for inductance

Q Range: Specified accuracy applies for Q's down to 3; lower with readjustment

DC Bias: Monitored internal and external; ± 140V internal ± 200V external

Response Time: 200 ms

Price: $2,500.00

Model 74D

Capacitance Bridge—100 kHz

Precision measurements of capacitance and conductance over very broad ranges at 100 kHz. Excellent stability with negligible warm-up drift. Test signal level adjustable to low values for semiconductor testing. 3-terminal arrangement permits use of remote test jig without errors owing to cable capacitance to ground. 2-terminal operation also provided. "Linear" mode for limit operation permits go/no go testing. Provision for differential or comparison measurements. Balancing simple and convenient, with no false or sliding nulls. All zeroing controls vernier driven. Internally supplied or external dc bias.

Capacitance Measurement: 0 to 110,000 pF; accuracy, ±0.1%; resolution, 0.0002pF

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.001 μmho

Test Signal: Internally supplied, 100 kHz; level continuously adjustable from 1 mV to 4 V

DC Bias: Internal, —6 V to +100 V; External, up to ±400 V

Price: $2250.00

Model 75C

Capacitance Bridge—5 kHz to 500 kHz

Versatile 3-terminal bridge with adjustable test frequency. Permits determination of effects of frequency upon test. Includes built-in dc bias supply. Convenient operation; eliminating false and sliding nulls. Completely self-contained including bridge circuit, tunable oscillator and detector.

Capacitance Measurement: 0 to 1000 pF; accuracy, ±0.25%; resolution, 0.0002 pF

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.001 μmho

Test Signal: Internally supplied; continuously adjustable in frequency from 5 kHz to 500 kHz; level adjustable from 1 mV to 3 V

DC Bias: Internal only; continuously adjustable from —5 V to +110 V

Price: $2600.00

Model 75D

Capacitance Bridge—1 MHz

This bridge provides 3-terminal measurements of capacitance and conductance allowing remote connection without errors due to stray capacitance to ground. Makes 2-terminal measurements using Ground Plane Adapter Model 75-6A. Inductance is read by conversion from equivalent capacitance measurement. The detector is needle sharp yet shows balance direction from the most extreme off-range setting and an additional differential detector mode allows capacitance or inductance sorting of components. Internal and external dc bias.

Capacitance Measurement: 0 to 1000 pF; accuracy, ±0.25%; resolution, 0.00005 pF with phase sensitive detector; 0.0005 pF with amplitude sensitive detector

Conductance Measurement: 0 to 1000 μmhos; accuracy, ±5%; resolution, 0.01 μmho

Inductance Measurement: 25 μH to 25 mH; basic accuracy, ± 0.25%

Test Signal: 1 MHz, crystal controlled; level adjustable from 1 mV to 300 mV

Dual External DC Bias: HI to GND and/or LO to GND; differential ±400 V, max.

Internal DC Bias: HI to LO; —6 V to +150 V

Price: $1950.00

Models 63H 63L and 63M

Inductance Bridges

Direct reading measurements of inductance and series resistance. Convenient operation, eliminating false balance and sliding nulls. Exceptional stability. Completely self-contained, with bridge circuit, oscillator, detector, and null indicator in single, compact bench cabinet. Particularly useful for quality assurance or production tests, as well as for laboratory studies.

Model 63H

Inductance Measurement: 0 to 110 mH; accuracy, ±0.25%; resolution, 0.0002 μH
Series Resistance Measurement: 0 to 11,000 Ω; accuracy, ±3%; resolution, 0.0002 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 5 kHz to 500 kHz; max. open-circuit level, 3 V **Price: $2750.00**

Model 63L

Inductance Measurement: 0 to 11 H; accuracy, ±0.25%; resolution, 0.02 μH
Series Resistance Measurement: 0 to 110,000 Ω; accuracy, ±3%; resolution, 0.005 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 400 Hz to 40 kHz max. open-circuit level 5.5 V **Price: $3000.00**

Model 63M

Inductance Measurement: 0 to 1.1 H; accuracy, ±0.25%; resolution, 0.002 μH
Series Resistance Measurement: 0 to 110,000 Ω; accuracy, ±3%; resolution, 0.002 Ω
Test Signal: Internal oscillator-detector continuously adjustable from 1 kHz to 100 kHz; max. open-circuit level 5.5 V **Price: $2750.00**

Model 77B

Capacitance Limit Bridge—1 MHz

Automatic, high-speed, dual or single limit tests, or conventional manual measurements of capacitance or inductance. In automatic mode, test is insensitive to specimen loss. "High," "Low," or "Go" test decisions indicated by front panel lamps as well as by continuity closures for actuation of material handling equipment. Internally supplied crystal controlled 1 MHz test signal. Operates with low test level. Built-in dc bias supply; provision for external bias. 3-terminal arrangement permits remote measurements.
Capacitance Measurement: Automatic Mode, 0 to 1000 pF with 0.001 pF resolution; Manual, 0 to 1000 pF with 0.0001 pF resolution; basic accuracy, ±0.25%
Inductance Measurement: Manual or Automatic, 25 μH to 25 mH; basic accuracy, ±0.25%
Conductance Measurement: (Manual only) 0 to 1000 μmhos; basic accuracy, ±5%; resolution, 0.01 μmho
Tolerance Limits: Programmable at front panel controls from ±0.0005 pF to ±200 pF; basic accuracy, ±1% of limit setting
Test Time: Approx. 50 ms
Test Signal: Internally supplied; 1 MHz, crystal controlled; level adjustable from 250 mV to 15 mV for Automatic Mode, to 1 mV for Manual
Decision Output: Green, red, and amber panel lamps indicating "Go," "High," and "Low," respectively; continuity contacts available at rear panel in conformance with test decisions
DC Bias: Internal, continuously adjustable from —6 V to +150 V; external, to ±400 V
Price: $2650.00

Model 77B-S1

Capacitance Limit Bridge—100 kHz

Essentially similar to Model 77B. Has basic capacitance/inductance accuracy of ±0.1%. Operates with internally supplied 100 kHz crystal controlled test signal. Capacitance range, automatic or manual, is 0.001 pF to 1000 pF. Inductance range, 2.5 mH to 250 mH. Otherwise specifications are as shown for Model 77B.
Price: $2650.00

RF POWER INSTRUMENTATION

Model 41A

RF Microwattmeter

Exceptionally stable microwave power meter providing reliable measurements over a 71dB range with one power detector. Use of full wave diode detector overcomes limitations of stability, sensitivity, and overload of thermal types. No zero balancing except for fractional microwatt measurements. Can be calibrated from low frequency rf source. Stable dc output proportional to $\sqrt{P}$.
F.S. Power Range: 0.01 μW (—50dBm) to 10mW (+10dBm)
Power Sensitivity: 0.001 μW (—60dBm)
Basic Accuracy: ±0.5 dB
Drift: Less than 0.001 μW/hr
Overload Limit: Input of 300 mW (+25dBm) will not damage power detector.
Input Connector: Type N, Precision
Price: 41A, $600.00; rack-mounting Model 41AR, $625.00

Power Detectors

	Model 41-4A	Model 41-4B
Frequency Range:	0.2 MHz to 7 GHz	0.2 MHz to 12.4 GHz
VSWR:	≤1.3 to 3 GHz ≤1.5 to 7 GHz	≤1.3 to 3 GHz ≤1.5 to 11 GHz ≤1.75 to 12.4 GHz
Price:	$160.00	$250.00

RF VOLTAGE INSTRUMENTATION

Sensitive RF Voltmeters

Model 91 DA

This series of RF Voltmeters provides reliable, reproducible voltage measurements from the low radio frequencies to the gigahertz region over a wide range of amplitude . The versatility of these instruments plus their accuracy and convenience of operation have established them as standards of performance for the industry. The primary differences among the Models 91DA, 91H, 91C, 91K and 91L are indicated in the specification table below. All five models are characterized by low noise, excellent stability, high input impedance and low input capacitance.

Model 91 H

	Model 91DA	Model 91H	Model 91C	Model 91K	Model 91L
Full Scale Voltage Range:*	1 mV to 3 V	1 mV to 3 V	3 mV to 3 V	10 mV to 30 V	1 mV to 1 V
dB Range:	81 dB**	81 dB**	71 dB**	81 dBm	71 dBm
Voltage Sensitivity:	300 μV	100 μV	1 mV	1 mV	100 μV
Basic Accuracy:	2%	3%	5%	3%	3%
Frequency Range:	20 kHz to 1.2 GHz			0.5 MHz to 600 MHz	*with 91-23A:* 0.2 MHz to 2.5 GHz *with 91-12E:* 20 kHz to 1.2 GHz
Input Resistance: (f<10 MHz)	100 kΩ (at low level) to 1 MΩ (at high level)			>4 MΩ	same as 91H
VSWR:	≤1.2 at frequencies below 1.2 GHz			≤1.2 at 600 MHz	*with 91-23A:* ≤1.2 below 2.5 GHz *with 91-12E:* ≤1.2 below 1.2 GHz
Waveform Response:	True rms below 30 mV (3 V with Model 91-7C 100:1 Voltage Divider) gradually becoming peak-to-peak (calibrated in rms) at 3 V.			Same as 91H except all voltages are 10 times greater	Same as 91H
Price:	$750.00† $900.00††	$675.00† $825.00††	$575.00† $725.00††	$705.00†	$1000.00†

*to 300 V with Model 91-7C 100:1 Voltage Divider (91L, 100V max.)
**dBm scale available; order Model nos. with suffix S4
All instruments except 91C have DC Analog; Input capacitance of all probes is approx. 2.5 pF
†Includes 91-12E RF Probe, 91-13B RF Probe Tip and 91-8B 50 ohm Adapter (also 91-23A with 91L)
†† With complete Accessory Kit. Includes 91-6C Unterminated BNC Adapter, 91-7C 100:1 Voltage Divider, 91-14A Tee Adapter, 91-15A 50 ohm Termination, all in 91-18A Accessory Storage Box with space for probe, 91-13B Probe Tip, and 91-8B 50 ohm Adapter provided as standard equipment with each instrument.

*** IMPORTANT NOTICE ***

We will offer in mid-1970, in addition to the above RF Voltmeters, a new solid state RF Voltmeter.
It will have essentially the same specifications as the above but will be in a new case configuration. In addition, features and options to be made available will include auto-ranging, programmability, digital readout, etc.
Please contact the factory for further information on this new product.

DC VOLTAGE INSTRUMENTATION

Model 95A

Sensitive DC Microvolt/Picoammeter

Unusually broad range of dc voltage and current measurements covered in 42 ranges. Front panel range and function switching uniquely simple and convenient. Zero-center meter. Fast response. Exceptionally stable amplifier output at front panel. Amplifier output gain and reference level adjustable without interaction with meter. Either floating or grounded operation for voltage; floating for current.

Voltage Range: 10 μV to 1000 V end scale; Accuracy, ±3%; sensitivity, 1 μV
Current Range: 1 pA to 1 A e.s. ; Accuracy, ±4%; sensitivity, 0.1 pA
Voltmeter Input Resistance: 10 MΩ, all ranges
Amplifier Output: ±1 V es across 1000 Ω
Amplifier Gain: 100,000 max.
Price: $625.00 (rack mounted Model 95AR, $650.00)

ROUTE 287 AT SMITH RD., PARSIPPANY, N.J. 07054 • TEL.: 201-887-5110 TWX: 710-986-8241

All prices are fob Parsippany, New Jersey, and do not include applicable federal, state, or local taxes. Prices and specifications are subject to change without notice.

BOONTON ELECTRONICS CORPORATION | AUTOMATION PRODUCTS DIVISION

PRECISION INSTRUMENTATION FOR HIGH-SPEED GO/NO-GO AND COMPLEX LIMIT TESTING

A wide selection of modular units for manufacturing test, process control, incoming inspection, sorting, batching and data logging.

Model 122D Automatic Resistance Limit Bridge

High-precision, 4-wire resistance measuring system which performs dual-limit go/no-go resistance tests at very high rates of speed for either production testing or manual operation. Nominal values programmable from 0.1 Ω to 100 M Ω. Plus and minus tolerances individually adjustable from 0 to ±29.9%. Excitation voltage adjustable from 0 to 100 V, dc. Test results indicated visually by front panel lamps and by continuity contacts. Negligible drift; no need for recalibration; unattended operation possible over extended periods. Test time, 50 milliseconds, minimum; cycle time adjustable from 2 to 20 tests/second.

Alternative versions available: Model 122D-S1 with nominal value programmable from 0.01 Ω to 10 M Ω, and tolerance limits programmable from 0% to ±9.99% in 0.01% steps. Model 122D-S2 with nominal value programmable from 0.01 Ω to 100 M Ω, and tolerance limits programmable from 0% to ±9.99% in 0.01% steps. Accuracy of all units ±0.05% from 10 Ω to 10 M Ω; ±0.15% above 10 M Ω and decreasing below 10 Ω to ±0.5% at 1.0 Ω.

Model 122CD Automatic Resistance Limit Bridge

An integral, highly compact, low-cost rack-mounting automatic 4-wire resistance limit bridge which provides an economical approach to high-speed go/no-go testing. Nominal values selectable from 0.1 Ω to 10 M Ω. Tolerance limits individually programmable from 0 to ±11%. System accuracy, ±0.05% from 10 Ω to 1 M Ω; ±0.1% from 1 M Ω to 10 M Ω, and decreasing below 10 Ω to typically ±0.75% at 1.0 Ω. Excitation continuous dc 50 milliwatt max. dissipation in test resistor. Test speed 50 milliseconds per 2 limit classification. Test decisions indicated by front panel lamps and by mercury-wetted relay contacts. Negligible drift; unattended operation possible over extended periods. Operates in manual and triggered modes. Decisions stored until completion of next test. Size: 7" x 19" panel; 6¾" x 17" x 16" chassis. Primary power, 105-125 V, 50/60 Hz, 75 W.

Model 124C Resistance Sorting Bridge

An automatic, 8-limit, 4-wire resistance bridge for high speed sorting of resistors into categories or "zones". Provision for up to 10 category sorting. Decision outputs for Go_1 through Go_8 plus "High" and "Lo" are indicated by front panel lamps as well as being issued by continuity contacts. System accuracy ±0.05%. Nominal values programmable from 0.1 Ω to 10 M Ω with 5-digit resolution. Sorting limits individually adjustable from 0 to ±11.1% in 0.01% steps. Test speed, 25 ms per test (single limit); 150 ms per final classification, max. Excitation voltage across test resistor continuously adjustable from 0 to 100 V, dc and is monitored at front-panel meter. "Normalized" position of excitation control assures specified system accuracy and limits power dissipation in test resistor to 50 mW max. Operates in manual and triggered modes. Decisions stored until completion of next test. Size: 17" h x 19½" w x 23" d, overall with cabinet. Primary power, 105-125 V, 50/60 Hz, 300 W.

Typical system for 11 category classification of capacitors

Test Systems For Axial Leaded Components

The typical equipment combination illustrated shows a highspeed, axial leaded capacitor sorting system for 11-category classification of components into eight Accept Zones, Capacitance High and Low, plus DF Reject at a 1 KHz test frequency. Parts are sorted and binned at a rate of 6,000 to 8,000 pieces per hour.

Bulk components are introduced into an integral vibratory bowl, which presents a continuous flow of parts to the hopper of the Model 850B Component Feeder. A small reservoir of parts is maintained in tracks and then transported to the test head. The electrical tests are performed, and the tested components are collected in the proper bin, ready for stock or further processing.

Programming of the test equipment consists of merely setting a nominal capacitance value and per cent tolerance limits as boundaries for the desired Capacitance Accept Zones and the DF limit.

These test systems are designed for high-volume production applications, and a virtually unattended operation is practical. Typically, a half hour reserve of parts may be maintained in the bowl, thus accommodating multiple-station testing by a single operator. All test results are displayed visually in the form of colored lamps and are transmitted to the handling equipment in the form of contact closures.

The mechanical portion of these systems has been designed to make changeovers to accommodate various parts sizes as simple as possible. Track and transport wheel spacing adjustments and hopper exchange is accomplished in only a few minutes. The vibratory bowl accommodates most sizes with only minor baffle adjustments to reject components with badly bent leads.

The axial lead test systems are modular in construction and many combinations of modules are available to suit particular requirements. Systems are available for classification of resistors, capacitors, inductors and other axial leaded components such as diodes and varactors.

The handling system is compatible with the Models 122D, 122CD, 124C, 171K-C-M and 174K-C-M.

High-Speed Test Instruments & Systems

125A

Model 125A Resistance Scanning Bridge

Primarily intended for final inspection of microcircuit resistor networks. Automatically tests up to 7 resistances on a substrate or other type of multi-resistor assembly in predetermined sequence, providing individual HI/LO/GO decisions plus an "Accept" or "Reject" decision for the total circuit at conclusion of test cycle. Number of resistances per scan selectable from 1 to 7; additional multiples of 7 can be added by slave units. Nominal resistance values are individually selectable from 0.1Ω to 10 MΩ with 3 digit resolution. Tolerances for each resistance are individually selectable from 0 to ±11.0% with 2 digit resolution. Basic system accuracy, ±0.05%. Results of individual resistance tests and final "Accept" or "Reject" decisions are indicated by panel lamps. Individual and final test results are also available as contact closures for actuation of associated materials handling equipment or for data logging. Running totals of "Accept" and "Reject" decisions are kept by front panel electro-mechanical counters. Test time is 50 mS per resistance; 350 mS per 7 resistor scan. Excitation voltage across resistor adjustable at front panel. "Normalized" position of this control guarantees specified accuracy and automatically adjusts voltage to limit power dissipation in test resistor to 50 mW. Programming can be converted from front panel selectors to static card reader by means of add-on Model 52-7A.

Models 126CD/126A/126B/126CD-S5 Resistance Trimming Bridges

The Model 126CD is an integral rack mounting, 4 wire Resistance Limit Bridge primarily intended for controlling the trimming of thick film resistors. Upon receipt of a start test signal, the bridge first compares the untrimmed resistor to the "Minimum Start" value, and if this test is acceptable, the trimming command is issued. When the resistor reaches the "Stop" value, the trim command is removed, and after an adjustable delay to make certain that the adjustment process has stopped, a final, double limit inspection is performed with a measurement accuracy of ±0.05%. Each model 126CD is an integral measuring system with its own control logic, isolated power supply and input-output connectors, making the unit suitable for combination with other units for simultaneous trimming of multiple resistor networks. Final values are programmable to 10M ohms, and final value tolerance limits are independently adjustable from 0 to ±11.1%. The power dissipation in a resistor being trimmed is limited to a maximum of 25 mW.

The Model 126A is a programmable version of the Model 126CD and may be used to sequentially trim any number of resistors with complete flexibility. Programming of minimum start value, stop value, final value and tolerance limits is done by means of external B-C-D contact closures.

The Model 126B is a special purpose resistance trimming bridge which is intended for the simultaneous processing of resistors in closed loop configurations such as bridge circuits and delta networks. This bridge provides precisely regulated excitation levels of 0.5 to 1.0VDC.

The Model 126CD-S5 is a modified model 126CD which incorporates means for use of external standard arm resistors. With this feature, a simple form of programming may be attained, "match" trimming may be accomplished and greater accuracy may be reached for very low values of resistors. An accessory programming device (Model 126-1A) is available for use with this bridge, which provides means for use of 10 plug-in external standards.

126CD

171M

Models 171K, 171C & 171M Capacitance-Inductance Test Systems

The Models 171K, 171C and 171M are a family of high-speed automatic test systems providing test frequencies of 1KHz, 100KHz and 1MHz. The systems consists of a universal, main frame, control unit plus one or more measurement modules. At 1KHz, go, high, low tests for capacitance plus an accept-reject test for dissipation factor are performed and at the 100KHz and 1MHz frequencies, HI/LO/GO inductance tests as well as the basic capacitance tests may be made. Test time is 50mS for the combined "C" and "D" decisions, which are presented in the forms of panel lamps and mercury-wetted relay contacts. Six full scales provide measurement ranges of 100pF to 10μF at 1KHz, 10pF to 10,000pF at 100KHz and 1pF to 1000pF at 1MHz. At 1KHz, dissipation factor may be checked over a range of 0.001 to 0.1 and at 100KHz and 1MHz, inductance may be tested over the respective ranges of 1μH to 10,000μH and 0.1μH to 1000μH. Several fixed excitation levels are available at 1KHz, and at 100KHz and 1MHz the excitation level is 15mV for C and less than 1mV for L. Interface accessory units are available to provide 0 to 10VDC analog outputs with sample and hold features for use with external DVMs, printers and recorders. A 3-terminal measurement permits remote tests without serious errors due to cable capacitance. Panel size is 12¼" x 19" for the Model 171K and 14" x 19" for the Models 171C or 171M.

174M

Models 174K, 174C, 174M Capacitance-Inductance Sorting Systems

The Models 174K, 174C and 174M are multi-category sorting versions of the Models 171K, 171C, 171M. In lieu of a simple High, Low, Go classification for capacitance or inductance, these systems, by virtue of a different control unit, provide (8) go categories plus high and low. The Measurement Modules for these systems are identical to their Model 171 counterparts. Maximum classification time is 125mS and all decision outputs are provided in panel lamps as well as mercury-wetted relay contacts. Panel size is 15¾" x 19" for the Model 174K and 17½" x 19" for either the Model 174C or 174M.

Model 178A Varactor Test Systems

The Model 178A is a modular and expandable test system primarily intended for rapid limit testing of varactor diodes. The system provides test functions for capacitance value, capacitance ratio, breakdown voltage (V_R), reverse current (I_R) and quality factor (Q). It is ideally suited to manufacturing test applications, incoming inspection and quality assurance.

The complete system consists of four (4) rack mounting units whose nomenclature and function are as follows:

Nomenclature	Function
Model 71AR-S5 Capacitance Meter	1 MHz Capacitance Measurements
Model 59A Control Unit	Capacitance and capacitance ratio tests
Model 150A V_R/I_R Tester	Voltage breakdown and reverse current tests
Model 135A Auto Q Tester	Q limit tests

Each unit of the system is designed as an add-on module to enhance flexibility, and subsystems such as the combination of the Models 71AR-S5 and 59A for capacitance value and ratio are available to meet specific long range test requirements or to act as "starter" equipment for an eventual complete test facility.

Precision, programmable internal DC bias sources with 4-digit setting resolution are provided for both capacitance value and ratio tests which are performed at low level 1 MHz excitation.

Programming of capacitance value, bias voltages and numerical ratio limits is performed by simple-to-set front panel knobs on the Model 59A Control Unit. A range selection for the value test is made by a panel switch; however, in the ratio test, the Model 71AR-S5 will auto-range to complete the two-test function after merely programming High and Low limits.

At the inception of a test cycle an automatic polarity test is also made to orient properly the diode under test. In addition to this function, indications of shorted or open diodes are provided.

1279 ROUTE 46, PARSIPPANY, N.J. 07054
TEL. 201-335-9550 □ TWX 710-986-8241

The products listed above are indicative of Boonton Electronics capability in the area of Automation Products. However, they should not be considered as totally inclusive of our line. Many variations of these units are available and we are always interested in knowing of new requirements for automatic test instrumentation. For complete technical details on these and other instruments and systems please contact our Sales Engineering Representatives in your area (see yellow pages of this directory) or the factory.

Biddle Instruments Preserve Accuracy For Years

PORTABLE POTENTIOMETERS **Bulletin 72-6 EEM**

72-3110

72-310

Cat. No.	Ranges	Limit of Error	Price
72-310	0-11.1 0-111 mV	0.05% + 5μV	$325.00
72-312	0-0.182 0-1.82	0.05% + 5μV	325.00
72-314	−11 to +111 mV	0.05% + 5μV	340.00
72-316	Any single Range −300° to +3000°	0.2% of span	275.00
72-318	Any two ranges	0.2% of span	365.00
72-3110	−11.1 to +111.1 mV	±0.03% + 2μV without RJC ±0.03% + 4μV with RJC	575.00
72-3112	--0.0111 to +0.1611 V	±0.03% + 2μV	
	−0.111 to +1.611V	±0.03% + 20μV	650.00

PORTABLE WHEATSTONE BRIDGES

72-430 Price: $250.00

72-432 Price: $295.00

Range: 0.1Ω to 11.1MΩ
Limit of error: ± (0.1% of reading + 0.01Ω)
Detector Sensitivity: 8μv/div. (1.6 mm)
Detector Resolution: ± 0.01% (10Ω to 1MΩ)
Bridge Resolution: ± 0.01%
Model 72-432 also has ratios of M1, M10, M100, M1000 for Murray Loop tests.

PORTABLE KELVIN BRIDGE

72-436
Price: $300.00

Range: 0.0001Ω to 110Ω
Limit of Error: 0.3% to 1%

RESISTANCE TEMPERATURE BRIDGE

72-490 Price: $700.00
Range: 0 to 1111.1Ω
Limit of Error:
± (0.03% of reading + 0.0025Ω)

STRAIN GAUGE BRIDGE

72-4010 Price: $395.00

Range: Resistance 0 to 111.1Ω
Ratio .5 to 1.111
Rheostat 0 to 211.1Ω
Limit of Error: Resistance and Rheostat ± 0.01Ω
Ratio ± 0.01%

For information on above instruments request Bulletin 72-7 EEM

LABORATORY AND CALIBRATION INSTRUMENTS

71-131

A complete line of voltage, current, and resistance measuring instruments. Available as individual modules for complete measuring systems. Ranges: Voltage—mV to 1,500 volts; Current—0.075 to 15 amperes; Resistance—0.0001 to 1 × 11^9 ohms. Accuracies from 2 ppm, depending on range and parameter selected. Request Series 71 Bulletins.

603

MENTOR RESISTANCE TRIM/TESTERS

Designed for controlling resistance trimming equipment used in adjusting thin and thick film resistors. These instruments are adaptable to all type systems including abrasive, laser and ultrasonic. Featured are extremely rapid measurement response time, multispeed control, and measurement of resistance and voltage ratio in addition to absolute resistance. Bulletin 73-9 EEM.

BIDDLE RHEOSTATS

Lubri-tact and carbon pile rheostats. Seventy-six standardized ratings available in 8″, 10″, 16″ and 20″ sizes. A variety of special non-inductive, double and graded types and Compression Carbon Rheostats also available. Write for Bulletin 41-EEM.

FRAHM® RESONANT REED FREQUENCY METERS
Bulletin 32-EEM

2½″, with metal case.

3½″, GE style case

3½″, Plastic case.

RESISTANCE STANDARDS
Resistance values 1 ohm to 1 megohm.
Accuracy: 0.001% Certified directly to N.B.S.
Bulletin 71-5.

SOLID STATE NULL DETECTOR
A 4μV per division zero center meter driven by a solid state high gain differential amplifier, powered by two mercury batteries.
Bulletin 72-8 EEM.

COMPRESSED GAS CAPACITORS
For use as reference standards of capacitance and as precision ac voltage dividers.
Bulletin 85 EEM.

CORONA MEASURING EQUIPMENT
A fully programmable Corona Test set keyed to digital print out.
Bulletin 66 EEM.

50/100/150 kv
DIELECTRIC TEST SETS
Safe, rugged equipment for supplying and measuring both ac and dc voltages from 5kv to 150kv.
Bulletin 22 EEM.

CABLEMASTER

A compact, versatile unit for rapid and efficient testing of electrical cable assemblies, harnesses, connectors, and bulk cable

■ Ease of Operation

Simplified operating procedures permit the Model 400-C to be operated by non-technical personnel. Controls are conveniently located and are arranged to provide efficient operation. Test results are displayed on a digital readout to reduce errors. When a fault is located in a cable being tested, the test sequence automatically stops and an alarm is sounded to alert the operator. Testing can be continued at the operator's discretion.

■ Mobile Carrier for Increased Versatility

The Model 400-C is designed to provide maximum convenience and versatility for in-plant or field applications. It is equipped with a mobile carrier to permit easy movement to any location. The Unit can also be removed from the carrier if desired.

■ Permanent Test Record (Optional)

The 400-C is available with an optional printer to provide a complete and permanent record of each test. The type of test, circuit tested, and test results are recorded on a continuous paper tape. Failures are printed in red for easy identification. With the printer in operation the Cablemaster will not stop when a fault is located, but will record the fault and proceed with the test.

■ Insulation Resistance Range From 1 to 5000 Megohms

The Model 400-C automatically checks each conductor against all others to determine insulation resistance under any impressed voltage between 20 and 1000 vdc. Use of plug-in resistance standards and environmental sealing of critical components eliminates acceptance level drift caused by humidity or temperature changes within normal operating conditions. Rapid change from one acceptance level to another is easily accomplished.

■ Continuity Resistance Range from 0.5 to 59 Ohms — 0.5 to 3 Amperes

Termination-to-termination continuity on a maximum of 200 simple or complex circuits is quickly accomplished in one test setup. Resistance test level is selected with convenient digital switches.

■ Simplified Testing Capability for Multiple Conductors

A unique programming circuit permits testing of multiple and simple circuits mixed in any sequence. No special programming is required and setup time is greatly reduced.

■ Dielectric Strength (Hipot) Range From 0 to 3000 Volts AC or DC

The Model 400-C automatically checks each conductor against all others for shorts and leakage. Any test voltage up to 3000 vac or vdc can be selected by the operator. The voltage range is continuously variable and is monitored on the precision meter provided on the front panel. Hipot dwell time can be set for any period up to three minutes.

Model 400-C shown with optional console

SPECIFICATIONS

Test Capacity:

Insulation Resistance: 400 circuits

Hipot: 400 circuits

Continuity: 200 circuits

Test Ranges:

Insulation Resistance: 1 to 5000 megohms

Hipot: 0 to 3000 volts ac or dc

Continuity: Resistance 0.5 to 59 ohms; Current 0.5 to 3 amperes

Dwell Time: 0.5 to 180 seconds

Max. Test Rate: 120 tests per minute

Input Power: 110 to 125 volts ac, 50 - 60 cps

Weight: 130 pounds

Dimensions (cabinet): 21 x 13½ x 18½ inches

Information on special models and multipliers available on request.

Other models include new portable units and the Model 400-S, a new concept in shipboard cable checkout.

MULTI-CHANNEL OSCILLOSCOPES

From one to seven independent oscilloscopes in a 19" rack for analog tape recorders or any multi-channel monitoring application. Only 3½" high, this system features high-intensity 1 x 3" rectangular CRT's for large viewing area. Accuracy and linearity equal to laboratory 'scopes.

FEATURES

- WIDEBAND — DC to 5 mHz within 1 dB
- WIDE SWEEP RANGE — 0.2 Hz to 1 mHz
- FRONT-PANEL AC-DC SWITCH for observing expanded portion of AC signal with DC present
- SENSITIVITY — 100 mv/in to 10 V/in
- FULLY AUTOMATIC TRIGGERING over entire bandwidth — no controls required.

MODELS

- **7000** ..... Standard Dual Selectable Channel version

- **7003** ..... Master/Slave Common Sweep
- **7004** ..... Medical Model: Slow Sweep

8361/8461 SERIES DIGITAL PANEL METER

Model 8361 provides a five-digit display including 20% over-range. It is only 2½" H x 3⅝" W x 5" D. Features are: BCD 1-2-4-8 output code; 5 readings per second; programmable decimal; read and hold; non-blinking NIXIE® display; active filter option; 10 megohm input impedance; 100 dB of CMR; and automatic polarity. Companion Model 8461 features a four-digit display, including 20% overrange. For OEM applications, cost savings can be realized by omitting metal case and bezel, overrange indication and/or polarity indication.

8300 SERIES MULTIMETERS

SEVEN FUNCTIONS

- Frequency counter
- DC & AC volts
- DC & AC current
- Ohms
- Ratio

FEATURES

- 0.1% Accuracy
- .01% Resolution
- Guarded input high CMR
- Push button range and function
- Plug-in options

Feature compact size, four full digits plus overrange into the fifth digit, read-out storage, printout, automatic polarity indication, 10 microvolt sensitivity, and damage-proof ohmmeter. The plug-in options allow expansion from a single range DC voltmeter to a complete multimeter, including printout.

8303 DIGITAL OHMMETER

- FIVE-DIGIT NIXIE DISPLAY INCLUDING OVERRANGE
- PUSHBUTTON RANGE SELECTION
- RESOLUTION .01% or 100 MICRO-OHMS
- ACCURACY .02% OF READING PLUS .01% OF RANGE
- FOUR WIRE KELVIN CLIP INPUT CABLE
- IC PLUG-IN CARD CONSTRUCTION
- 100 MICRO-OHM TO 100 MEGOHMS
- TRILLION-TO-ONE DYNAMIC RANGE

Completely protected against inadvertent inputs up to 200 VDC or peak AC, input circuits are automatically protected and, upon removal of the input voltage, will recover instantaneously.

FOR AC POWER SOURCES, REFER TO SECTION 4000, Page 1004

ADVANCED PULSE GENERATORS

Chronetics' 3-I Pulse Generators represent the most versatile and wide-range instruments in the pulse generator field. Eleven standard models, all solid state, meet most user requirements.

Repetition rates from 0.1 Hz to 100 MHz, output amplitudes from 0 to ±100 volts or ±2A, rise/fall-times of less than 2 ns, wide dynamic ranges, high duty cycles, bipolar outputs, etc. are all available on standard instruments.

3-I Pulse Generators are exceptionally flexible. Most provide single or double pulses of either polarity, single-shot, pulse bursts. Bipolar outputs and current/voltage modes are available. Usually prf, amplitude, risetime and falltime, width, delay and DC-offset are independently and continuously variable.

Price/performance engineering makes 3-I Pulse Generators best buys in the pulser field. Prices begin as low as $375 for the compact, rugged and high-performing PG-11. Sales/Service is on a world-wide basis with more than 45 field offices to respond promptly to any need.

Compare 3-I performance.

PG-11 $375.

MODEL 1012 FULLY PROGRAMMABLE $4000!

SUMMARY DATA

MODEL	CLOCK PRF	AMPLITUDE[2]	Z OUT	RISE/FALL TIME	WIDTH	DELAY	DUTY CYCLE (MAX)	DC OFFSET
PG-2	1 Hz-10 MHz 20 MHz Max.[1]	10 mV-10V + or −	50 ohms	<10 ns-20 ms[4]	< 35 ns-200 ms	0-200 ms	100%	±5V
PG-11	<10 Hz-> 20 MHz 30 MHz Max.[1]	0-15V + or −	50 ohms	5 ns	25 ns-10 ms	20 ns-10 ms	85%	
PG-13A	1 Hz-25 MHz	100 mV-100V + or −	50 ohms or 1K, min.	<10 ns-50 ms[4]	10 ns-500 ms[5]	15 ns-500 ms	10% @ 2A 50% @ 1A 100% @ < 0.5A	±5V ±100 mA
PG-14	1 Hz-50 MHz	100 mV-20V + or −	50 ohms or 10K, min.	2 ns-50 ms[4]	<5 ns-500 ms	10 ns-500 ms	100%	±5V ±100 mA
PG-32	0.1 Hz-10 MHz 20 MHz Max.[1]	20 mV-20V[3] + and − 2 Channels	50 ohms or 500 ohms	5 ns-1 sec[4]	< 30 ns-1 sec[5]	50 ns-1 sec	100%	To 10V To 400 mA
PG-32N	0.1 Hz-10 MHz 20 MHz Max.[1]	−20mV—35V dual Neg. 2 Channels	50 ohms or 500 ohms	5 ns-1 sec[4]	< 30 ns-1 sec[5]	50 ns-1 sec	100%	To 10V To 400 mA
PG-32P	0.1 Hz-10 MHz 20 MHz Max.[1]	20 mV-28V dual Pos. 2 Channels	50 ohms or 500 ohms	5 ns-1 sec[4]	< 30 ns-1 sec[5]	50 ns-1 sec	100%	To 10V To 400 mA
1012	10 Hz-9.99 MHz 20 MHz Max.[1]	0-9.9V[2] + or −	50 ohms	5 ns-9.9 ms	40 ns-9.9 ms	0-9.99 ms	85%	±9.9V

Notes:
1 Effective PRF in double pulse mode
2 Max. Range into 50-ohm loads
3 Separate or combined (bipolar) channels; same polarity on Special Order
4 Variable linearly — 100:1 dynamic range. Separate control of Rise and Fall Times
5 Independent control Pulse 1/Pulse 2 (double pulse mode)

CMC COUNTERS

ALL-SILICON SOLID-STATE SERIES 600

The 600 Series features reliable, all-silicon, solid-state instruments that offer direct frequency measurement to 20 MHz, with prescaling to 225 MHz, with heterodyning to 3.3 GHz, plus the measurement of period, multiple period, average, frequency ratio, time interval, and totalizing, with both preset functions and portability available — all at a minimum cost.

CMC's 600 series are the first counters built with all silicon semiconductors for higher reliability, superior temperature stability. Maximum frequency ranges of 2.5,15, 20 and 225 MHz. Simplified design techniques and advanced "Mother Board" circuitry reduce components by 10 per cent over competitive models. Temperature operation —20 to +65°C standard, —30 to +75°C available. All silicon memory (display storage), a standard feature, is not subject to slow response and upper temperature limitations of photoconductor memory circuits.

MODEL 608 $850

Measures frequency and period, determines frequency ratio and totalizes. Frequency, period and frequency ratio measurement ranges: 2 Hz to 15 MHz. Period average and multiple ratio: 1, 10 and 100. In-line long-life biquinary display. Five decades are standard, a sixth is optional.

MODEL 609 $1275

Measures frequency, period, multiple period average, frequency ratio, time interval, and totalizes. Frequency measurement range: 0 to 5 MHz. Period: 0 to 1 MHz. Multiple period average measurement from 0 to 20 MHz, from 10^0 to 10^7 periods in decade steps. 1 MHz crystal time base; stability ±2 parts in 10^7 per month. Six decade in-line biquinary display, automatically positioned decimal point.

MODEL 614 $1300

Preset Multi-function Counter extends applications to normalizing and multiplication by any preselected constant. Gate time presets to any interval from 10 μsec to 100 seconds. Gate time presets by remote selection. Direct displays as mph, rpm, ms, per N periods, etc. 614 also measures frequency and period and totalizes. Frequency range: 2 Hz to 2.5 MHz. Period and frequency ratio ranges: 2 Hz to 500 kHz. Preset count circuitry operates dependably at frequencies through 300 kHz–up to three times as fast as other variable gate time counters. 100 kHz crystal time base; stability ± 2 parts in 10^6 per week. Standard five decade in-line biquinary display (sixth optional) with automatically positioned decimal point.

MODEL 616 $1975

Model 616 provides low-cost direct frequency measurement from 10 Hz to 225 MHz by means of a unique prescaler built into the instrument. It can be rack-mounted. All-silicon semiconductor circuitry assures dependable operation over wide temperature ranges. 1 MHz crystal time base; stability ± 2 parts in 10^7 per month. Seven decade in-line display is standard — eighth decade optional. Standard automatic decimal and display storage.

MODEL 631 $775

Model 631, turret-type, positive switching 100 MHz to 1.3 GHz Heterodyne Converter.

MODEL 633 $300

Model 633, 1 μsec resolution Time Interval Plug-in with range from 1 μsec to 10 sec.

MODEL 635 $825

Model 635, continuous tuning, 200 MHz to 3.3 GHz Heterodyne Converter.

SOLID-STATE MILITARY COUNTERS

5-MHz COUNTER

MODEL 687 $1875

Model 687 is a 5 MHz fully militarized counter that measures frequency, period, multiple period average, frequency ratio, time interval and totalizes. Meets MIL-E-16400 including temperature, humidity and vibration specs.

100-MHz COUNTER

MODEL 880 $3750

Model 880 is the first solid-state counter fully militarized to meet Mil Specs. It measures frequency, period, multiple period average, frequency ratio, frequency ratio average, time interval with internal and external clock, and totalizes; scales input frequency in decade steps; provides standard frequency outputs. If you want the safety of a counter providing full Mil Specs reliability at a price surprisingly close to a commercial counter, then check these specs: 0 to 100 MHz frequency range; oscillator stability of 1 part in 10^9; meets or exceeds MIL-E-16400, including applicable temperature, humidity, vibration, shock, and RFI specs; built-in time interval measurement. Eight decade in-line display. Militarized plug-ins available (see below).

PLUG-INS FOR MILITARIZED 880

MODEL 884

MODEL 884 $695

Heterodyne Converter, turret-type, positive-switching, 100 MHz to 555 MHz, acceptance tested to MIL-E-16400, MIL-S-901, MIL-I-16910.

MODEL 887 $400

Video Amplifier increases gain of Model 880 thirty times.

CMC COUNTERS

IC SERIES 900

The 200-MHz Model 901 Universal Counter-Timer and the 15-MHz Model 905 Frequency Meter were the first instruments to be introduced in CMC's completely new series of integrated-circuit counters. Now four new compact instruments in the 905 Family have been added to this expanding IC series: the Model 915 TIM, the Model 925 Totalizer, the Model 912 Preset Counter, and the Model 913 Dual Preset Counter.

MODEL 901 $2475

UNIVERSAL COUNTER-TIMER

The Model 901 is a state-of-the-art instrument. It is the industry's first, true, 200-MHz, universal counter-timer capable of achieving its range without prescaling, heterodyning, or using plug-ins...while also offering as part of its main-frame capability the measurement of frequency, period, multiple period average, time interval, ratio, multiple ratio averaging, totalizing, scaling, and the measurement of time interval from an external standard...plus a heterodyning capability for gigahertz operation.

Gate times are 1 μsec to 100 seconds in decade steps. A special feature of the display control is a fast reset to 10 μsec to accommodate those requiring maximum data gathering abilities. Input sensitivity of the 901 is 10mV for both A and B amplifiers.

The readout has nine decades with automatically positioned decimal point, large readout tube with units symbols, and an overflow lamp. Printer output in the form of BCD in the 1-2-4-8 code is a standard feature. Remote programming of the entire front panel controls, except trigger levels and attenuators, is an optional feature. Time Interval mode offers resolution to 10 nanoseconds. Gate output, useful in determination of the amplifier trigger points in the Time Interval mode, is a standard feature of the 901.

FREQUENCY EXTENDER PLUG-INS

MODEL 931

MODEL 931 $825
Turret type, positive switching 100 MHz to 1.3 GHz Heterodyne Converter. Sensitivity is 50 mV across its entire range.

MODEL 935 $675
Continuous tuning 100 MHz to 3.3 GHz Heterodyne Converter. Sensitivity is 50 mV across its entire range.

MODEL 933 $225.00
Video Amplifier increases gain of Model 901 thirty times.

SERIES 900 COMPACT INSTRUMENTS

MODEL 905
15-MHz FREQUENCY METER
$395

The Model 905 Frequency Meter is a low-cost 15-MHz counter that is priced considerably lower than comparable competitive instruments. Although low-cost, it provides quality performance and is contained in a high-quality package that features a tip-up stand for easy visibility in bench work. It can also be rack mounted. Measuring only 4" x 5" x 8½", the 905 provides direct frequency measurement from DC to 15 MHz. It features a 1-MHz crystal oscillator time base with a stability of ±2 parts in 10^6 per month, and a five-decade in-line display is standard with display storage and automatically positioned decimal point. Wt. 3½ lb.

MODEL 915
TIME INTERVAL METER
$555

A low-cost instrument that features a 1-MHz temperature-compensated crystal oscillator . . . triggers on positive or negative going pulses . . . can be operated in either a 1 μs or 1 ms mode, with a range from 0 to 99,999. Starts on the A-input and stops on the B-input, and permits reset even during the measurement operation. Same dimensions as and fully compatible with CMC's Model 905 Frequency Meter.

MODEL 925
ELECTRONIC TOTALIZER
$340

Frequency range, from dc to 1-MHz, or dc to 100 Hz (internally switch selectable) with totalizing count from 0 to 99,999. Trigger level is automatic, and a pushbutton switch on the front panel resets the count to "0". Same dimensions as the 905 and fully compatible with the other compact instruments in this line.

MODEL 912 PRESET COUNTER $630

MODEL 913 DUAL PRESET COUNTER $725

Both models operate in either a "Limit Mode" or "Recycle Mode" with a frequency range (selectable by internal switch) of either 0 to 100 Hz or 0 to 10 KHz. In the "Limit Mode" "output" is held at the preset number until reset manually, while continuing to count: and in the "Recycle Mode" the counters hold the "pulse relay output" at the preset number, then reset to "0" and automatically resume counting. The Model 913 is equipped with a second bank of 5 preset switches, a second control switch so that there is independent control for each switch bank. Both units completely compatible with the other CMC compact instruments, but come in 16.8" widths for standard rack mounting.

NEW LOW-COST DIGITAL PRINTER

MODEL 415 $1295 TO $2000

LOW-COST, DATA LOGGING PRINTER FEATURES IC DESIGN AND SUPERB MECHANISM

The new Model 415 Digital Printer employs IC design and utilizes IC sockets for accurate reliable performance and easy maintenance. Its mechanical printing mechanism is good for more than 5,000,000 cycles without an adjustment, is replaceable in the field, and provides the legibility of an electric typewriter. From 7 to 21 columns of line capacity are offered, and red/black printing with color selection by numerical field is provided . . . also floating decimal point, zero suppression, "print command" control over 3-input channels, and a remote control option. Speed is 3 lines-per-second, and printing stock is paper tape or fan-fold. The 415 measures 8½"w X 7½"h X 17½"d.

MODEL 403 $1375

SOLID-STATE TAPE PERFORATOR ADAPTER

Model 403 couples counters with 1-2-4-8 BCD output to the Tally Series 420 Paper Tape Perforator. Compatible with all CMC solid-state counters having standard digital printer output plug, and modifiable to accept other manufacturer's equipment. Accessory output allows simultaneous operation of digital printer in parallel with Tally 420. Up to 6 decades provided (8 optional). Accepts 60 characters per second. Punch command —4V to —12V pulse, 50 μsec wide (min.), into 10,000 ohms.

MODEL 404 $950

$1485

SOLID-STATE GO, NO-GO COMPARATOR

Model 404 compares a binary coded decimal number, obtained from printer output receptacle of a counter with two selected preset numbers in the comparator for go, no-go operation. Provides visual display in "HI", "LO", and "IN" limit lights as well as contact closure outputs for control purposes. Half-rack size permits dual mounting. Weighs only 17 lbs. and uses just 45 watts power. Four decade preset standard, 8 optional. Remote presetting of limits optional

CMC

PULSE GENERATORS, TIME DELAY GENERATORS, AND TARGET SIMULATORS

PULSE GENERATORS

CMC's famous line of pulse generators includes both portable and laboratory instruments offering repetition rates from 20 Hz to 50 MHz... rise-and-fall rates as fast as 5 nsec at 10-volt amplitude... and a uniform high level of accuracy and performance.

MODEL 220 $1225

NEW 50 MHz PULSE GENERATOR
This new all silicon, solid-state pulse generator adds 50 MHz capability to the famous Rutherford instrument line. Other specs include: 50 MHz repetition rate; delay from less than 10 nanosec to 10 millisec; width from 10 nanosec to 10 millisec; baseline offset variable from −5 volts to +5 volts; ±10 volt amplitude polarity switched; rise and fall time from 5 nanosec to 1 millisec.

MODEL B-7B $875
MODEL B-7D $875
MODEL B-7F $950

BASIC PULSE GENERATOR
B-7B is a general purpose instrument with repetition rate to 2 MHz and 50V into 50 ohms. Variable rise/fall time control.

B-7D has all specifications of B-7B and simultaneous positive and negative output pulses; separate and independent rise/fall time controls.

B-7F has all B-7B features plus: 2 Hz repetition rate; separate rise/fall time controls; and double pulse output.

MODEL B-14 $475
MODEL B-15 $525
MODEL B-16 $850

PORTABLE PULSE GENERATORS
Model B-14 is a low cost, portable unit with repetition rate of 20 Hz to 2 MHz. Delay is 0 to 10 msec. Amplitude is 15V into 1k, 8V into 50 ohms. Pulse width of 60 nsec to 10 msec. Rise/fall time is less than 10 nsec fixed.

B-15 has same rise/fall time, delay, and pulse width. Also offers a repetition rate of 5 Hz to 5 MHz.

B-16 offers repetition rate of 20 Hz to 20 MHz. Variable rise/fall times of less than 5 nsec to greater than 200 nsec. Pulse width 15 nsec to 10 msec. Amplitude 10V. Single or pulse pair operation.

Rack mount available for B-14, -15, -16.

TIME DELAY GENERATORS

MODEL A-10 $2215
MODEL A-11 $1070
MODEL A-12 $3120

SOLID-STATE DELAY GENERATORS
A-10 has time delays 0 to 1 sec in 100 nsec increments. Accuracy 0.001% of delay. Jitter less than 1 nsec. Amplitude 10V. Rise time 15 nsec.

A-11 has same features as A-10 with exception of amplitude, 6V and rise time 10 nsec.

A-12 was designed for fail-safe operation in explosives testing or other tests where premature triggering might destroy information. Amplitude, 70V; rise time, 100 nsec.

DYNAMIC TARGET SIMULATOR

The Model 301 is a truly unique off-the-shelf instrument that aids in the design, evaluation, checking, and calibration of tracking systems. It does this by producing artificial targets which can be easily and accurately set to various ranges and which can be dynamically moved at various velocities and/or accelerations. It features all solid-state digital logic... low jitter, high accuracy, high stability... 1-foot target resolution... and is available for portability or rack mounting.

MODEL 301 $6330

DYNAMIC TARGET SIMULATOR
Model 301 is a moving target simulator. It is applicable to tracking radars, weapons control systems, or sonar for calibration, production checkout, or operator training.

The standard Model 301 has a target Range from 0 to 1,000,000 feet in one foot increments with 0.1% of setting accuracy. It has a target Velocity from 0.0 to 100,000.0 feet/second in 0.1 foot/second increments with 0.005% of setting accuracy. Target Acceleration can be set from 0.00 to 10,000.00 feet/second/second in 0.01 foot/second/second increments with 0.005% of setting accuracy.

Special versions of the Digital Target Simulator are available with increased accuracies. 301's have also been built with remote-programming capabilities and ruggedized to meet MIL specifications.

Your local CMC representative will demonstrate these products on your premises at your convenience. Call him or call CMC direct.

short form catalog

cvi COLORADO VIDEO INCORPORATED • P.O. BOX 928 • BOULDER, COLORADO 80302 • PHONE (303) 444-3972

Bar Graph 101

A device accepting 8 negative going signal inputs and converting these into a vertical "Bar" pattern as seen on the screen of a standard TV monitor. Requires external sync. Rack mount, 3½" high, solid state.

$1250.

Bar Graph 120

Accepts 30 negative going input signals and produces a horizontal bar display with better than 1% accuracy. Has individual channel markers, zero suppression, decade expansion, and other features. Requires external sync. Rack mount, 7" high, solid state.

$4200.

Video Marker 121

A unit generating 20 individually moveable vertical lines as seen on the screen of a TV monitor. May be used for the display of linear or non-linear scales, or as an electronic "grease pencil." An additional marker sets a limit position, tripping an alarm when video falls within a restricted area. Requires external sync. Rack mount, 5¼" high, solid state.

$2800.

Limit Indicator 122

A device producing 15 separate "high" and 15 separate "low" vertical markers with automatic alarm when video falls outside of predetermined limits. Requires external sync. Rack mount, 5¼" high, solid state.

$3500.

Video Converter 201

A unit which accepts a standard "real time" television input signal and uses high speed sampling to produce a "slow-scan TV" output signal for computer data reduction or other forms of video processing. Conversion accuracy is excellent, with negligible grey scale distortion. Also contains simple "Two Level" quantizing circuits giving 1 bit binary output signal. Rack mount, 3½" high, solid state.

$1950.

cvi COLORADO VIDEO INCORPORATED • P.O. BOX 928 • BOULDER, COLORADO 80302 • PHONE (303) 444-3972

Video Converter 201-A

Communications version of the model 201. Incorporates sync stripper, frame burst generator, and continuous scan circuitry, but does not have quantizer. Rack mount, 3½" high, solid state.

$1950.

Video Converter 220-A

Companion unit to the 201-A. Utilizes a magnetic disc memory together with high speed pulse circuits to convert "slow-scan" video or properly formated computer data to standard 525 line TV rates. Has automatic erase and indefinite image storage capabilities. Options include color reproduction and selective record/erase. Rack mount, 7" high, solid state circuitry.

$5000.

Video Analyser 301

An instrument displaying "vertically line-selected" TV waveforms directly on the screen of a normal TV monitor. 1/1 waveform/picture ratio simplifies identification of individual picture elements. Display also includes an electronic reference grating and H and V markers. Requires external sync. Rack mount, 3½" high, solid state.

$875.

Video Analyser 321

Laboratory version of the 301. Incorporates additional circuitry to allow chart recording of "line selected video waveforms, X-Y coordinate indication, noise analysis, computer data input, and other features. Requires external sync. Rack mount, 3½" high, solid state.

$2500.

Video Plotter 401-A

An instrument which converts low frequency data to video format with indefinite signal storage via a wide band magnetic disc memory. Features include internal time base, electronic reference grating, multimode recording, grey scale reproduction, and selective erase. Generates own sync. Rack mount, 7" high, solid state circuitry.

$4000.

cvi VIDEO INSTRUMENTS FOR DATA ACQUISITION — PROCESSING — DISPLAY — TRANSMISSION

cvi COLORADO VIDEO INCORPORATED • P.O. BOX 928 • BOULDER, COLORADO 80302 • PHONE (303) 444-3972

Video Memory 404-A

A wide band magnetic disc recorder accepting properly formatted computer output signals for conversion to standard 525 line TV rates. Incorporates four separate read/write/erase channels for generation of multiple displays or synthetic color. Also produces H and V timing pulses for synchronization of auxiliary equipment. Rack mount, 8¾" high, solid state circuitry.

$6000.

Data Camera 501

A Vidicon camera intended for laboratory use. Features both "real time" and "slow-scan" video outputs for computer data reduction. Requires external sync. Control chassis is rack mount, 3½" high, solid state.

$3500.

Sync Generator 601-B

A unit intended for laboratory use when either standard or non-standard TV scan rates are required. Uses micrologic binary counters with adjustable feedback paths. Drive and blanking pulses are variable width, but sync is not EIA format. Incorporates dot/bar generator for test purposes. Rack mount, 3½" high, solid state.

$1025.

Data Insertion Generator 603-A

Combines the functions of a 2 channel video mixer, special effects generator, and video pointer. Moveable oblong is positionable to any point in TV raster and is variable in size over a wide range. Oblong acts as the internal "key" in special effects mode, and also generates a white "box" outline or solid square for marking purposes. Requires external sync. Rack mount, 3½" high, solid state.

$1500.

Video Processor 604

An instrument which modifies the grey scale of a video input signal by selecting and amplifying a variable width "slice." Also incorporates variable brightness control, sync adding, and marker adding functions. Requires external sync. Rack mount, 3½" high, solid state.

$950.

cvi COLORADO VIDEO INCORPORATED • P.O. BOX 928 • BOULDER, COLORADO 80302 • PHONE (303) 444-3972

Video Quantizer 606

A device which allows the processing of a video input signal into 16 separate amplitude levels. Operates with tape, camera, or disc inputs and allows radical grey scale alterations or the generation of complex synthetic color signals. Rack mount, 5¼" high, solid state.

$3500.

Shading Generator 608

Generates H and V sawtooth and parabolic waveforms of variable amplitude and polarity to provide compensation of brightness errors in video input signals. May also be used to drive external dynamic correction circuitry. Requires external sync. Rack mount, 3½" high, solid state.

$950.

Video Pointer 610-C

A voltage positionable marking device producing a set of cross-hairs, solid oblong, "box" outline, or a combination of these. Rack mount, 3½" high, solid state. Requires external sync.

$1950.

Video Test Generator 615

Produces various test signals including: 16 step linear grey scale, 16 step variable grey scale, grating, dot, multiburst, and window patterns. Requires external sync. Rack mount, 5¼" high, solid state.

$1500.

X-Y Indicator 621

An instrument intended to reduce spatial data coordinates in a TV image to two variable X and Y voltage outputs. Either a dot or cross-hair marker is manually positioned to any location in the TV raster. Accuracy is better than 1%, and an internal grating generator allows convenient camera setup. Rack mount, 3½" high, solid state.

$1500.

COHU

dc voltage standards

MODEL 365 - DIFFERENTIAL DC VOLTAGE STANDARD - A multifunctional instrument which can be used as: a null indicating, potentiometric, dc voltage measuring instrument (differential voltmeter); a direct reading transistorized dc voltmeter (TVM); or a precision dc voltage source (dc voltage standard). The differential voltmeter and dc voltage standard modes provide 0.001% accuracy and voltages from zero to over 1100 volts with seven-place precision.

MODEL 355 - 10 PPM DC VOLTAGE STANDARD - Provides accuracy to within 0.001% (including all stability variations) for 90 days. Three decade ranges supply voltages from zero to over 1100 volts with seven-place precision and an output current to 50 milliamperes at any voltage setting. Complete isolation and excellent guard shielding permit full output voltage with either positive or negative terminal grounded.

MODEL 353 - 20 PPM DC VOLTAGE STANDARD - Provides accuracy to within 0.002% (including all stability variations) for 6 months. Three decade ranges supply voltages from zero to over 1200 volts with seven-place precision and an output current to 50 milliamperes at any voltage setting. Noise and hum is less than 15 μV rms on the 10V range. Features include: overcurrent protection, overvoltage protection and all solid state active circuitry.

MODEL 351 - 30 PPM DC VOLTAGE STANDARD - A completely solid-state dc voltage standard that can be operated continuously for 12 months to an accuracy within 0.003% (including all stability variations). Output voltage, 0 to ± 1111.1110V dc, with a resolution as small as 1 μV. Output current to 50 mA at any voltage setting. A rackmounting kit is included for easy and fast conversion from a bench model to a rackmount model. FSN4931-913-3062

MODEL 324AN - DIFFERENTIAL VOLTAGE CALIBRATOR - Combining a passive null indicator with the Model 324A DC Voltage Calibrator creates a system capable of measuring unknown voltages by differential comparisons. Accuracy is to within 0.01%, 100 ppm, over a voltage range of 0 to ±1111.110V dc. Output current to 25mA at any voltage setting, as a dc calibrator. As a null indicator, meter sensitivity at null point is 300 μV/mm.

Curtis

ELAPSED TIME INDICATORS

...Smallest size, lowest cost, AC or DC, any voltage

How they work — The patented Curtis Ampere Hour Meter is basically a mercury microcoulometer fabricated from precision bore, glass capillary tubing filled with two columns of mercury separated by a small electrolyte gap. Application of pure or pulsed DC signals to electrodes inserted in the mercury causes mercury at the anode to be electrochemically transferred across the gap to the cathode at a time rate proportional to the current. The gap moves along the tube length as a function of the current-time integral. A constant-current supply provides a precision timing device.

TYPICAL APPLICATIONS

Warranty — Low-cost meters for warranty of equipment based on both actual usage, and calendar period.

Reliability Engineering — Provides mean-time-to-failure or sub-system replacement time without costly, unreliable logging.

Test Equipment Utilization & Calibration — Provides calibration on actual hours of use with savings up to 50% compared to calendar-basis programs. Substantial savings in capital investments can be realized with accurate utilization data on test instruments, tools and equipment.

Curtis Instruments, Inc.
200 Kisco Avenue, Mount Kisco, N.Y. 10549
(914) 666-2971 • TWX 710-571-2163

L Series Curtis Indachron®
Used on OEM equipment as a very low-cost means of validating warranties and for P.M. scheduling. Under $2.00 each in production quantities. AC and DC Models. Various time scales and electrical ratings. Can be mounted on printed circuit cards or direct to chassis with adhesive strips.

120-PC Series
Radial leads for installation directly on printed circuit cards for "mean-time-to-failure" or preventative maintenance scheduling. Can be instrumented from available DC voltages for any time scale by use of series resistor. Full scale of .65 inches = 4.16 milliamp-hours.

150-S Series
Operates directly from DC voltage with calibrating series resistor: full scale of 1 inch in 10 divisions = 10.4 milliamp-hours. Stud mounting, plug-in or printed card configurations. Fully reversible, no threshold.

550-CP Series
Permits instant replacement of the indicator with rezeroed unit. 500 and 1000 hour scales, 115 VAC standard. Any scale, any voltage can be provided. Model with integral zener regulating circuit also available.

Curtis Autosetter
For automatic resetting of 150-S and 550-CP series indicators.

Military Units
Provides lowest power, lowest weight, smallest size and lowest cost for ground and airborne applications. Meets MIL 1-81219.

CURTIS INFINITE MEMORY INTEGRATORS

Battery "Fuel" Gauges
Meter displays % of discharge (amp-hrs. remaining in rechargeable battery systems). Typical of applications for Curtis 921 Millivolt Integrator.

Millivolt Hour Integrator Model 921
Printed circuit module using capacitive readout techniques with the Curtis microcoulometer. 0-100 MV input signal provides a 0-100 microampere output analog of the integral. Infinite memory storage, high and low limit detectors, high accuracy, and small size are other significant features. 12 to 36 VDC. 4½" x 4½" overall.

Bipolar Integrator Model 992
A portable instrument integrates positive and negative signals to 100 MV. Readout on 4½" taut band meter. Permanently stores recorded integral until reset. Accuracy: ±2%; Typical linearity: ½%. 115 VAC/60 Hz.

SYSTEM CAPABILITY

DMC has designed several instruments which, when coupled together, form a highly proficient system for alignment and calibration of instrumentation magnetic tape recorders. Because these instruments are of a special design, not general purpose, they drastically reduce the recorder's check-out time by simplifying normal test procedures without sacrificing reliability or accuracy of measurements. The Models 6100, 6200, 6300, and 8300-W have the capability to test all major recorder operating parameters for both direct and FM recording models, as well as to assess completely the transport's flutter characteristics in accordance with the IRIG document's recommendations. This complete, solid-state system minimizes panel space requirements, and meets economic considerations. DMC can also provide a pushbutton switch panel to facilitate testing procedures for magnetic tape recorder / reproducer systems. Other system modifications can be accommodated for performing special tests or using semi-automatic testing procedures. If you wish to reduce recorder alignment or checkout time for production or field use, let DMC analyze your requirements and suggest an economical system that can justify its use through labor-saving techniques. DMC is the only manufacturer of instruments with these unique capabilities, and we have the technical depth necessary to competently evaluate your needs.

MODEL 8100-W FLUTTER METER

FEATURES

Full Scale Flutter Ranges: 0.01% to 10%
Full Scale Drift Ranges: ±0.03% to ±10%
Demodulator Output Accuracy: ±2% on all ranges
Frequency Range: DC to 200 Hz
Input Sensitivity: 5mV to 5V
Separate metering for flutter and drift
RMS and Peak measurements, weighted or unweighted
Advanced solid state construction
Automatic input level indication
Simultaneous indication of drift and flutter

APPLICATIONS

Tape transports
Phonograph turntables
Motion picture equipment
Industrial rotational apparatus

SPECIFICATIONS

TEST SIGNAL INPUT

Frequency: 3kHz ±10%

Input level ranges: 5mV to 200mV (HEAD sensitivity) and 100mV to 5V (LINE sensitivity)—AGC fully effective at 0.5mV input

Input Impedance: >300 kilohms, unbalanced, at 3kHz

Maximum acceptable frequency deviation: ±10%. (Range over which zero set may be adjusted to center drift meter)

SIGNAL FAILURE CLAMP

Restores meters to zero when signal is below range of proper operation.

High Level Indicator: actuated by input signals exceeding allowable level.

DRIFT MEASUREMENTS

Frequency Range: DC to .7Hz ±20% (fast); DC to .2Hz ±20% (slow) at —3dB

Indication Mode: + or —% frequency deviation with "0" center meter

Test Ranges: ±.03, .1, .3, 1, 3, and 10% full scale

Meter Accuracy: ±5% full scale at DC

FLUTTER MEASUREMENTS

Frequency ranges:
.2 to 200Hz weighted to DIN Standard (± peak indication)
.5 to 200Hz weighted to NAB Standard (rms indication)
.3 to 200Hz at —3dB DIN unweighted (±peak indication)
.5 to 200Hz at —3dB NAB unweighted (rms indication)

Test Ranges: .01, .03, .1, .3, 1, 3, and 10% full scale

Meter Accuracy: ±5% full scale at 40Hz unweighted, +½dB, —1dB from 1.5Hz to 150Hz
±5% full scale at 4Hz weighted

INTERNAL TEST OSCILLATOR

Test Frequencies: f_o = 3kHz ±.1%
+.3% = f_o +9 ±.2Hz
—.3% = f_o —9 ±.2Hz

Output Voltage: 1.23Vrms ±10%

Source Impedance: <100 ohms, unbalanced

DEMODULATOR OUTPUTS FOR ANALYSIS
DRIFT DEMODULATOR OUTPUT

Frequency Range: DC to 30Hz ±20% —3dB, falling at 18dB/octave above 60Hz. —3dB at .7Hz ±20% in slow and fast positions

Output Voltage: + or —.1V for full scale meter indication

Source Impedance: 1 kilohm unbalanced

Accuracy: ±2% full scale at DC; +0, <−1dB from DC to 10Hz

FLUTTER DEMODULATOR OUTPUT

Frequency Range: .3Hz ±20% to 210Hz ±5% at —3dB, falling >6dB/octave below .3Hz and >20dB/octave above 220Hz

Output Voltage: .1V rms or ±.1V peak for full scale meter indication

Source Impedance: 1 kilohm unbalanced

Accuracy: ±2% full scale at 40Hz; <.2dB −.8db from 1.5Hz to 150Hz

EQUIVALENT INTERNAL INSTRUMENT NOISE

<0.001% (with pure 3kHz sinewave input)

METER AMPLIFIER INPUT

Input Level: ±.1V peak or .1V rms for full scale meter indication

Input Impedance: 30 kilohm unbalanced

WAVE ANALYZER

Frequency Range: .5 to 600Hz continuously tunable in 3 decade bands

Accuracy of frequency calibration: ±5%

Frequency Response: Max. response ±1dB over entire tuning range

Bandwidth: 3dB down at ±5% of selected frequency, >20dB down at ½ and 2 times selected frequency

Indication: % rms or ± % peak on unwt. flutter indicator

GENERAL

Power: 115 or 230V, ±10%; 50/60Hz; 25 watts
Front Panel dimensions: 5.25" x 19" wide
Cabinet dimensions: 6.25" x 19" x 13" overall
Ambient temperature range: 0-60°C
Bench or Rack mount
Net Weight: 18 lbs.
Shipping Weight: 23 lbs.

Specifications subject to change without notice.

855 COMMERCIAL STREET • PALO ALTO, CALIF. 94303 • PHONE (415) 328-2961 • TWX 910 373 1179 DATA MEASUREMENTS CORPORATION

MODEL 8155 AUDIO FLUTTER METER

The Model 8155 Flutter Meter is a solid-state instrument designed primarily for use in radio and television stations and in critical high-fidelity applications, where professional quality and accuracy are mandatory, yet economy is an important consideration. The standard unit is designed for precise flutter measurement to NAB standards, and Option 01 provides measurement to DIN standards. A precision 3kHz test frequency is provided in the Model 8155, which may be used for recording and reproducing in the absence of a standard tape; Option 02 provides a 1kHz reference carrier for use with low-frequency recorders. The Model 8155 has a self-checking calibration feature and will maintain calibration with measurement consistency between an unlimited number of units. The instrument operates from reproduce electronics. It also has easily understood front panel controls, an asset for production line or field service operations.

The compact size and construction of the Model 8155 makes it an ideal service tool when portability becomes an important consideration in equipment use.

APPLICATIONS

Audio and video tape transports
Field service operations
Phonograph turntables
Motion picture equipment
Dictating equipment

SPECIFICATIONS

TEST SIGNAL INPUT
Frequency: 3kHz
Input Level Range: 100mV to 5V
Input Impedance: >300 kilohms, unbalanced, at 3kHz

SIGNAL FAILURE CLAMP
Restores meter to zero when signal is below range of proper operation.
Normal Level Indicator: Actuated by input signals to indicate proper range of operation.

FLUTTER MEASUREMENTS
Frequency Ranges:
0.5 to 200Hz weighted to NAB Standard (rms indication).
0.5 to 200Hz at —3dB NAB unweighted (rms indication).
Test Ranges: 0.03%, 0.1%, 0.3%, 1%, 3% and 10% full scale.
Meter Accuracy: ±5% full scale at 40Hz unweighted, +½dB, —1dB from 1.5Hz to 150Hz ;±5% full scale at 4Hz weighted with 3.00kHz test input signal.
Meter Damping: Either true VU meter characteristics for making standard NAB measurements; or slow, highly damped meter characteristics to increase ease of reading.

INTERNAL TEST OSCILLATOR
Test Frequency: f_o = 3kHz ±0.25%.
Output Voltage: 1.23V rms ±10% into 600 ohms; 2.46V rms open circuit.
Source Impedance: 600 ohms, unbalanced.

8155 SPECIFICATIONS CONTINUED

FLUTTER DEMODULATOR OUTPUT
Frequency Range: 0.3Hz ±20% to 210Hz ±5% at —3dB, falling >6dB/octave below 0.3Hz and >20dB/octave above 220Hz.
Output Voltage: 0.1V rms for full-scale meter indication.
Source Impedance: 1 kilohm unbalanced.
Accuracy: ±3% true value at 40Hz; <+0.2dB, —0.8dB from 1.5Hz to 150Hz.

EQUIVALENT INTERNAL INSTRUMENT NOISE
<0.001% (with pure 3kHz sinewave input)

FLUTTER TEST
Self-check feature causes meter to indicate 1% rms flutter in unweighted mode.

GENERAL
Connectors, BNC type.
Power: 115V, ±10%; 50/60Hz; 25 watts.
Power Cable: Three-wire, grounded.
Mounting: Bench mount only.
Cabinet Dimensions: 8.25" x 10" x 5" overall.
Ambient Temperature Range: +10°C to +50°C.
Net Weight: 10 lbs. Shipping Weight: 13 lbs.

OPTIONS
OPTION -01: DIN Standard Weighting
OPTION -02: 1kHz Carrier Frequency
OPTION -03: Input Power: 115/230V, 50/60 Hz
Specifications subject to change without notice.

MODEL 9100 FM MODULATOR

The Model 9100 FM MODULATOR provides exceptionally low noise, linear modulation over a wide bandwidth.

Although originally developed by DMC as a means of testing its wideband flutter meters, the Model 9100 FM modulator has a much wider application wherever a precision FM modulator is needed.

SPECIFICATIONS

CENTER FREQUENCIES:
216, 108, 54, 27, 13.5, 6.75, 3.375 and 1.688 kHz.
200, 100, 50, 25, 12.5, 6.25, 3.125 and 1.562 kHz.

DEVIATION: ±40% maximum with <.5% static linearity
±10% with <.2% static linearity

BANDWIDTH: Not restricted; less than .05 dB down to 20 kHz.

CENTER FREQUENCY DRIFT: <±.1% 20°C to 40°C after 10 minute warmup

FM NOISE WITH ZERO MODULATION: <5 ppm rms

OUTPUT: Adjustable to 2V rms square wave from behind 600 ohms, single ended

MODULATION VOLTAGE: 4V for 10% deviation

INPUT IMPEDANCE: 1 kilohm ±2%, single ended

PRECISION ATTENUATOR: provides 10%, 3%, 1%, 0.3%, 0.1%, .03% and .01% deviation ±1% with 4V external modulation input.

GENERAL
Power: 115 or 230V, ±10%; 50/60 Hz; 25 watts
Front Panel Dimensions: 5.25" x 19" wide
Bench or Rack mount
Specification subject to change without notice

MODEL 8300-W IRIG FLUTTER METER

The DMC Model 8300-W instrumentation flutter meter is the only instrument available which provides National Bureau of Standards traceable calibration for measurement of flutter and drift to IRIG recommended standards. This solid-state instrument is specifically designed to make precision flutter measurements using a direct meter readout. The accurate meter reading eliminates **subjective interpretation** of complex oscilloscope traces. This simple, direct flutter meter reading allows less skilled operators, as well as experts, to thoroughly investigate and locate flutter causes, with equal proficiency. The Model 8300-W measures flutter using eight reference carriers and in seven standard bandwidths. An associated wave analyzer provides a simple and convenient method of precise analysis, within specified flutter bandwidths, facilitating determination of flutter causes. A strobe light modification is available for assistance in locating defective rotating mechanical components.

APPLICATIONS

The Model 8300-W provides consistent accuracy over exceptional bandwidths in the measurement of both flutter and drift. The instrument was specifically designed to make simple, direct measurements of:

—flutter in tape transports
—low speed variations in tape transports
—speed disturbances in precision rotation apparatus
—accurate low index wideband FM demodulation
—pulse jitter in low pulse rate PCM transmission systems
—applications requiring a low deviation, low noise demodulator
—determining mechanical rotational rates for elements of a mechanical device

SPECIFICATIONS

TEST SIGNAL INPUT
Frequencies: 1.69kHz, 3.38kHz, 6.75kHz, 13.5kHz, 27kHz, 54kHz, 108kHz and 216kHz
The above test frequencies can be shifted by 8% upon request to accommodate prerecorded timing frequencies of 200kHz, 100kHz, etc.
Input Level: 10mV to 2V rms
Input Impedance: 100 kilohms shunted by approximately 50pF unbalanced
Maximum Acceptance Frequency Deviation: ±10% (range over which ZERO SET may be adjusted to center drift meter)

SIGNAL LEVEL MONITOR
Restores meters to no-signal indication when signal is above or below proper range of operation. Lamp indicates signal level.
Drift output available from front panel BNC.

DRIFT MEASUREMENTS (METER)
Frequency Range: DC to 0.7Hz ±20% FAST; DC to 0.2Hz ±20% SLOW
Indication Mode: + or — % frequency deviation with "0" center meter
Test Ranges: ±.03, 0.1, 0.3, 1, 3, and 10% full scale
Meter Accuracy: ±5% full scale at DC

FLUTTER MEASUREMENTS (METER)
Frequency Ranges:
0.5Hz to 313Hz with 1.69kHz or higher test frequency
0.5Hz to 625Hz with 3.38kHz or higher test frequency

SPECIFICATIONS CONTINUED
0.5Hz to 1.25kHz with 6.75kHz or higher test frequency
0.5Hz to 2.50kHz with 13.5kHz or higher test frequency
0.5Hz to 5.00kHz with 27.0kHz or higher test frequency
0.5Hz to 10.0kHz with 54.0kHz or higher test frequency
0.5Hz to 20.0kHz with 108kHz or higher test frequency
External filter can be used.
Indication Modes:
Peak-to-peak to 1σ limit (random peaks occurring less than 32% of the time excluded). Two times rms value for white noise.
Peak-to-peak to 2σ limit (random peaks occurring less than 5% of time excluded). IRIG Standard measurement.
Peak-to-peak to 3σ limit (random peaks occurring less than 0.3% of the time excluded). Practical peak-to-peak measurement.
Test Ranges: .01, .03, 0.1, 0.3, 1, 3, and 10% full scale
Meter Accuracy: ±5% full scale at 100Hz
Flutter demodulator output available from front panel BNC.

INTERNAL TEST OSCILLATOR
Test Frequencies: 1.69kHz, 3.38kHz, 6.75kHz, 13.5kHz, 27kHz, 54kHz, 108kHz, and 216kHz ±.01%
(Other frequencies available on special order)
Output Voltage: 1V rms ±1dB
Source Impedance: 50 ohms, unbalanced

DEMODULATOR OUTPUTS FOR ANALYSIS

EQUIVALENT INTERNAL INSTRUMENT NOISE
Less than 0.005% peak-to-peak (50ppm in the 2σ indication mode at 108 or 216kHz, with the internal test oscillator used as the signal input).

WAVE ANALYZER
Frequency Range: 0.5Hz to 20kHz continuously tunable in 5 decade bands
Accuracy of Frequency Calibration: ±10% from 0.5Hz to 50Hz; ±5% from 50Hz to 20kHz
Frequency Response: ±1.5dB over entire tuning range
Bandwidth: 3dB down at + and —5% of selected frequency; greater than 20dB down at 0.5 and 2 times selected frequency
Indication: % peak-to-peak on Flutter Indicator
Wave Analyzer can be used with external meter input

GENERAL
Power: 115 or 230V, ±10%; 50/60Hz; 25 watts
Front Panel Dimensions: 5.25" x 19" wide
Cabinet Dimensions: 6" x 19" x 13" overall
Ambient Operating Temperature Range 0 to 55°C
Instruction Manuals: Two with each instrument
Power Cable: Eight-foot, three-pin cord with ground
Extender Card: One with each instrument for servicing
Bench or Rack Mount
Net Weight: 20 lbs; Shipping Weight: 26 lbs.
Specifications subject to change without notice.

FLUTTER METER STROBE-LIGHT OPTION

To further simplify and reduce the problem of locating deceptive troubles in mechanical parts, DMC can provide (Option 01) a triggered circuit which is driven by the Model 8300-W wave analyzer's tuned frequency. The triggered circuit output is a positive 5.0 volt (minimum) peak pulse which is sufficient for driving most strobe-lights. By marking suspicious rotating mechanical parts, the strobe-light makes those parts rotating at the analyzer's tuned frequency appear stationary by its synchronizing action with the strobe-light. This procedure saves maintenance time and eliminates trial and error troubleshooting practices. (Strobe light not provided.)

355 COMMERCIAL STREET • PALO ALTO, CALIF. 94303 • PHONE (415) 328-2961 • TWX 910 373 1179

DATA MEASUREMENTS CORPORATION

MODEL 6100 TEST SET

FEATURES

- **Fast and Easy to Operate: Five controls simplify function selection without complicated cable interconnections.**
- **Automatic Wave Analysis: Analyzer tuning tracks selected harmonic of oscillator frequency.**
- **Normalized Readout: Internal AGC eliminates tedious reference checks and adjustments for distortion measurements.**
- **Instruments may be used separately as general purpose oscillator, ac voltmeter, or harmonic analyzer.**

APPLICATIONS

I. Tape Recorder Adjustment and Testing

A. Bias Setting: Signal generator and ac voltmeter permit quick bias setting at all recommended frequencies for low, medium, and high bands at speeds from 15/16 ips to 120 ips.

B. Record Level Adjustment: Tedious procedures required with general purpose analyzers are replaced by (a) selecting the recommended frequency, and (b) adjusting input level until analyzer indicates 1% third harmonic.

C. Complete frequency response measurements may be made from 10Hz to 10MHz with self-contained signal generator and voltmeter. Meter can be switched from recorder input to recorder output.

II. General System Testing

A. Rapid frequency response measurements.

B. Easy second and third harmonic distortion measurements.

C. Signal-to-noise measurements facilitated by zero output position of oscillator level control.

SPECIFICATIONS

OSCILLATOR
Frequency: 10Hz to 10MHz in 6 decade ranges
Output: 4V rms behind 50 ohms. Adjustable to 40dB below full output
Total Harmonic Distortion: Less than 0.2% from 100Hz to 500kHz; less than 2% from 10Hz to 5MHz; less than 4% at 10MHz

VOLTMETER
Input Impedance: 1 megohm shunted by less than 50pF
Input Range: 1mV to 30V rms in ten 10dB steps
Accuracy: ±3% of full scale at 1kHz
Frequency Response: +0.5dB, —1dB from 10Hz to 10MHz on 3mV to 3V ranges. +0.5dB, —1dB from 10Hz to 6MHz on 1mV, 10V, and 30V ranges
Amplifier Output: 1V rms for full-scale meter reading.
Scale Calibration: 50 divisions, 0-1 scale; 32 divisions, 0-3.2 scale; +2dB to —15dB
Meter Characteristics: Average responding, calibrated in rms for sinewaves.

WAVE ANALYZER
Frequency Ranges: Measures second and third harmonic distortion of signals with fundamental components from 100Hz to 1MHz
Range: 3% full scale
Accuracy: ±1dB

6100 SPECIFICATIONS CONTINUED
AGC Range of Input: 20dB with high and low-level warning lamps

GENERAL
Power: 115V or 230V, ±10%; 48-64Hz. Approximately 40W required.
Ambient Operating Range: 0°C to 50°C
Front Panel Dimensions: 5.25" x 19" wide
Cabinet Dimensions: 6.25" x 19" x 13" overall
Mounting: Bench mount, convertible or rack mount
Net Weight: 17 lbs. Shipping Weight: 25 lbs.
Specifications subject to change without notice.

MODEL 6275 TEST UNIT

The DMC Model 6275 FM Test Unit is a solid-state instrument that meets the instrumentation magnetic tape recording needs for a portable, professionally built FM calibrator.

Independent three-point calibration of modulators and demodulators can be performed as well as overall FM channel calibration. This is a distinct advantage. Most inexpensive FM calibrators align the demodulator first and then use the demodulator as a reference for modulator calibration.

SPECIFICATIONS

DC TO MOD:
Nominal +1.414V to 0V to —1.414V, ±0.3%. May be changed by customer to any voltage up to +5V to 0V to —5V. Maximum output current: 50mA.

CARRIER FROM MOD:
Impedance: 10 kilohms, shunted by less than 50pF; limits of 30mV to 5V peak-to-peak. ±3% full-scale comparator.

CARRIER TO DEMOD:
0.845kHz to 432kHz, ±0.02%. 1.5V peak-to-peak behind 50-ohm squarewave.

DC FROM DEMOD:
Impedance: greater than 10 kilohms. ±3% full-scale indication. Null accuracy ±0.2%. Can be self-checked against internal dc supply.

TESTS:
FM Record Electronics: DC IN vs FREQUENCY OUT
FM Demodulator: FREQUENCY IN vs DC OUT
Overall System: DC IN vs DC OUT
Self-Check

GENERAL:
Power Requirements: 105 to 130V, 48 to 440Hz; also 210 to 260V ac; approx. 10 watts.
Power Cable: Three-wire, grounded
Temperature Range: 0°C to 55°C
Dimensions: 12" long x 10" high x 5" wide
Weight: Approx. 11 lbs.

OPTION -01: Wideband Group II, 900kHz test frequencies
OPTION -02: Adjustable 0 to ±5V dc input, front panel lockable precision attenuator
OPTION -03: 845Hz carrier frequency added
OPTION -04: Carrier level equalization (6dB per octave)
OPTION -05: High input impedance (greater than 1 megohm)

Specifications subject to change without notice.

DATA MEASUREMENTS CORPORATION 855 COMMERCIAL STREET • PALO ALTO, CALIF. 94303 • PHONE (415) 328-2961 • TWX 910 373 117

MODEL 6200 FM CALIBRATOR

FEATURES AND APPLICATIONS

The Model 6200 can be used for rapidly testing and aligning instrumentation tape recorder FM record and reproduce channels, or for calibrating other FM modulators and demodulators that operate at the standard IRIG tape recorder frequencies up to 900kHz.

I. RECORD MODE

A precise dc voltage is fed to the tape recorder record modulation, and the resulting output frequency is compared to the internal standard frequency. The error is shown directly in percentage on the zero-center meter, whose maximum sensitivity is ±1% full scale.

II. REPRODUCE MODE

A standard frequency is fed to the recorder's reproduce demodulator. The resulting dc voltage, across the standard termination, is compared to the internal standard dc voltage. The error is similarly shown directly in percentage.

III. RECORD-REPRODUCE MODE

This combination can be checked by feeding precise dc into the recorder's modulator and comparing the dc output from the recorder's demodulator. The error is again shown directly in percentage.

IV. INTERNAL SQUARE WAVE MODULATION*

The modulator output that is fed into the reproduce channel is alternated between plus and minus full-scale deviation, at a 100Hz rate.

EXTERNAL MODULATION*

Full-scale dc voltage input causes full-scale deviation.

*Option 01—See "Specifications"

SPECIFICATIONS

CENTER FREQUENCIES

432kHz, 216kHz, 108kHz, 54kHz, 27kHz, 13.5kHz, 6.75kHz, 3.375kHz, and 1.6875kHz with ±40% full-scale deviation; and 900kHz, 450kHz, 225kHz, 112.5kHz, 56.25kHz, 28.125kHz, 14.062kHz, 7.031kHz, and 3.516kHz with ±30% full-scale deviation.

CRYSTAL OSCILLATOR

The center frequency and all static deviation frequencies are derived from a crystal oscillator with a ±0.01% accuracy from 0°C to +55°C. A counter chain counts down to the desired frequency. Static deviation frequencies are ±100%, ±75%, ±50%, and ±25% of full-scale deviation.

CARRIER OUTPUT (TO DEMODULATOR)

Square wave adjustable up to 6 volts peak-to-peak, open circuit. Output impedance selected by internal jumper, 75 or 50 ohms. Less than 5% dissymmetry above 600kHz, less than 3% between 600 and 250kHz, and less than 1% below 250kHz.

FULL-SCALE DC VOLTAGE (TO MODULATOR)

Front panel selected; ±1.0V, ±1.414V, ±2.0V, ±5.0V. Accuracy ±0.1% of peak-to-peak output.

DC OUTPUT (TO MODULATOR)

Output impedance less than 10 milliohms. Will drive 50 ohms at ±2.0V. The deviation control selects the appropriate output voltage for each static deviation.

TERMINATION (FROM DEMODULATOR)

Front panel selected; 50 ohms, 75 ohms, 600 ohms, 1000 ohms, 10K, or 10 megohms.

VOLTAGE AND FREQUENCY COMPARISON

The zero-center meter indicates the difference between the measured frequency or voltage and the desired one. Full-scale sensitivities of ±1%, ±3%, ±10%, and ±30% of full deviation are provided. In addition, the dc voltage from the reproduce channel can be displayed on a ±100% scale.

AUDIBLE NULL INDICATOR

A small loudspeaker is provided, which will give an audible indication of either voltage or frequency error. The click rate is an analog of the meter deflection. The volume may be regulated or turned off. A front panel earphone jack is also provided.

OPTION 01 (INCLUDES INTERNAL MODULATOR FOR DYNAMIC TESTING OF DEMODULATORS)

Modulator: The modulator provides signals for dynamic signal testing. The modulating signal is either an internal square wave or an external voltage. The modulator may be checked or zero beat by switching to MOD CHECK mode.

Internal Wave Modulation: Approximately ± full-scale deviation at 100Hz.

External Modulation: Separate input, 10K resistance. Sensitivity as selected by DC V FULL SCALE control.

GENERAL

Mounting: Bench, convertible to rack mount
Ambient Temperature: 0 to 55°C
Power Requirements: 115V ±10%, 48-64Hz. Approximately 30W required.
Front Panel Dimensions: 5.25" x 19" wide
Cabinet Dimensions: 6.25" x 19" x 13" overall
Net Weight: 22 lbs.
Shipping Weight: 26 lbs.

Specifications subject to change without notice.

DATA MEASUREMENTS CORPORATION

MODEL 6300 SELECTABLE STEPPING OSCILLATOR

The DMC Model 6300 Selectable Stepping Oscillator is a unique, solid-state instrument that generates from one to 13 selectable frequency bursts sequentially in each of three ranges from 50Hz to 5MHz. It is the first instrument to provide quick assessment of amplitude-vs.-frequency characteristics in any communications network or system. Frequency stepping—as opposed to sweeping—is accomplished by switching the oscillator to successive frequencies selected for a given time period so that a constant frequency sinewave output is obtained for each selected frequency burst. The Model 6300 produces a serial train of discrete frequencies free of spikes or irregularities. The unit offers transient-free stepping or CW operation, with constant output level vs. frequency. Frequencies are tunable for setting adjacent frequencies close together or even overlapping them. The Model 6300 combines the operational advantages of manually tunable and sweep oscillators to provide the user with a virtually simultaneous frequency response display over a wide frequency range. This makes the unit highly versatile and economical; therefore, it can be used in research and development, production, and calibration. The instrument saves time and effort and eliminates the need for highly skilled personnel in single and wideband automatic frequency testing.

APPLICATIONS

The Model 6300 is designed for use in single and wideband frequency testing that requires a simultaneous display of a wide range of frequency and corresponding response for quick testing, alignment, and measurement, especially where adjustments interact on devices under test. Typical uses:

- magnetic tape recorder equalization and response alignment
- testing or alignment of filters
- telephone or telemetry multiplex systems testing
- measurement of amplifier frequency response
- testing of video amplifier characteristics
- tone burst generation
- alignment of IF in receivers
- loudspeaker testing
- equalization of computer transmission lines
- production line testing

SPECIAL APPLICATIONS

Frequently, special requirements are imposed on standard hardware to meet the demands of unusual operating characteristics affiliated with special applications. The following are modifications to the standard Model 6300 for use in these special applications:

1. A one-shot or cycling through all SELECTED STEPS can be accommodated through pushbutton control (Option 02)
2. Special internal filters for fixed weighting or frequency response characteristics can be easily accommodated.
3. Remote step selection (1 through 13) is available for requirements where the Model 6300 is not in close proximity.
4. Step identification pulses can be made available for each of the steps (1 through 13) as required where frequency response evaluation must be accomplished on a remote basis.

SPECIFICATIONS

FREQUENCY

Ranges: Low: 50Hz through 500kHz
Mid: 200Hz through 2MHz
High: 500Hz through 5MHz

Steps: 1 through 13, selectable
Sequence Ratio: 1, 2, 5, 10 nominal
Adjustment Range: ±3.2 to 1 (one decade), within above ranges, by use of front-panel adjustable multiturn pots.
(Bottom step, up only; top step, down only.)
Period: Approximately 1 ms min. or a time duration to include 5 cycles of the selected step frequency, whichever time is greater.
Period Multiplier: 1 ms to 20 ms minimum

Mode: (1) All steps
(2) Selected Steps
(3) CW (single frequency)

Identification: Attenuates any selected step output level by approximately 20 dB

Time Separation: continuous stepping; no transients

DISPLAY TIME AND SYNC

Operation Cycle Time:
Low Band: 200 ms nominal for 13 steps to 1 ms minimum for 1 step
Mid Band: 56 ms nominal for 13 steps to 1 ms minimum for 1 step
High Band: 25 ms nominal for 13 steps to 1 ms minimum for 1 step

Recycle (Hold-Off) Time:
Internal: Approximately 1 ms to greater than 0.6 sec, adjustable
External: Rear panel BNC connector provided. —5V peak pulse required to start operation cycle.

Sync Time Position: Adjustable to trigger external scope at any time during operation cycle.

Sync Output: +5V peak behind 600 ohms

OUTPUT

Level: 2V rms, open circuit, behind 50 ohms

Attenuation: 0 to 40dB

Frequency Response: Within ±0.50dB at 1 V rms output into 50-ohm load

Load: 50 ohms

GENERAL

Mounting: Bench, convertible to rack mount

Ambient Temperature: 0 to 55°C

Power Requirements: 115-230V ±10%, 48-400Hz. Approximately 40 VA required

Front Panel Dimensions: 5.25" x 19" wide

Cabinet Dimensions: 6.25" x 19" x 13" overall

Power Cable: Eight-foot, three-pin cord with ground.

Instruction Manuals: Two with each instrument

Net Weight: 22 lbs.

Shipping Weight: 26 lbs.

Specifications subject to change without notice.

DATA MEASUREMENTS CORPORATION 855 COMMERCIAL STREET • PALO ALTO, CALIF. 94303 • PHONE (415) 328-2961 • TWX 910 373 1179

MODEL 3100 STATISTICAL VOLTMETER

The DMC Model 3100 Statistical Voltmeter is a solid-state voltmeter that can analyze random or noise-like waveforms on a statistical basis. It ignores the peak input signal excursions. The unit tracks a changing input signal and conveniently reads the peak-to-peak signal voltage directly for the preset percentage of time or statistical limit. It replaces the "eyeball" subjective scope measurement with direct, accurate measurement. Statistical measurement methods are recognized by many engineering and research departments as a more efficient and precise technique of evaluating data having noise-like or complex waveforms. This is because signal characteristics can be ignored or accepted at the operator's option. This capability cannot be provided by any other commercially available instrument.

APPLICATIONS

Typical applications are:

—measuring power supply PARD (ripple and noise)

—vibration and acoustical noise generated by various type engines, turbulent air motion or environmental conditions.

—medical evaluation of EEG, EKG and other physiological waveforms.

—obtaining separate measurements of repetitious spikes and average noise, such as in slip rings, bearings, and static interferences from atmosphere disturbances.

—measuring seismic or biological waveforms.

—analyzing communication system noise problems in the presence of transients.

SPECIFICATIONS

VOLTAGE RANGE
1mV to 100V full-scale in eleven 10dB steps. Peak input must not exceed ±250V.

% OF TIME ACCURACY (measured at 1kHz)

99.7,% 99%	95%, 90%	80%, 68%, 50% 33%	20%, 10%
±.2%	±1%	±2%	±3%

AMPLITUDE ACCURACY
±3% of full scale at 1kHz.

METER FREQUENCY RESPONSE
For sine waves at % OF TIME settings;
Above 80%: ±1dB from 5Hz to 100kHz, 3dB at less than 2Hz.
33% through 68%: ±1dB from 2Hz to 100kHz, 3dB at less than 1Hz.

METER SLEWING RATE
(Response time to square waves or voltage step):
Up-Scale:

99.7% of Time	160 times full scale per second (6.25 millisec)
95% of Time	10 times full scale per second (100 millisec)
68% of Time	1 times full scale per second (1 sec)
Down-Scale:	0.5 times full scale per second (2 sec)

For sinewaves, the tracking ratio is reduced approximately 50%.

DC OUTPUT
0-1V dc with respect to chassis ground, proportional to meter deflection.
Output impedance is 1K; BNC connector.

AC OUTPUT
Same waveform as input signal, with gain of 1,000 on 1mV range and unity gain on 1V range. BNC connector.

GENERAL
Power: 115 or 230V; 50/60Hz; 10 watts
Overall Dimensions: 7 25/32" x 6 3/32" H x 11 5/8" D.
Ambient Temperature Range: 10°C to 40°C.
Degrade specifications 2 x for 0°C to 55°C operation
Mounting: Bench mount, half rack size; rack adaptor, DMC 14:61:0001
Net Weight: 8 lbs.
Shipping Weight: 12 lbs.

PULSE GENERATORS

MODEL 5101 $525.00

50 MHz general purpose Pulse Generator with separate current sinking IC output. Selectable source termination of 50 Ω, 100 Ω, and current output. Lowest price 50 MHz Pulse Generator made today.

MODEL 5103 $600.00

Economical 200 MHz Pulse Generator with output of 5 volts into 50Ω and a rise time of less than 2 ns.

MODEL 5102 $475.00

50 MHz Pulse Generator designed with a unique current sinking output specifically intended for use with TTL, RTL or DTL Integrated Circuits. Variable baseline offset and pulse amplitude can be remotely programmed.

MODEL 5109 $390.00

Low cost 10 MHz Pulse Generator with high priced features: Pulse Width and Delay times adjustable from 10 ns to 100 ms; IC output; Square Wave output; Current, 100 Ω, 50 Ω outputs.

MODEL	PULSE REP. RATE	PULSE WIDTH	PULSE DELAY	OUTPUT IMPEDANCE	PULSE AMPLITUDE	RISE & FALL TIME	ADDITIONAL* FEATURES
5101	1 Hz to 50 MHz	10 ns to 1 sec.	10 ns to 1 sec.	50 ohms, 100 ohms, current	0 to +10 V and 0 to −10 V	< 4 ns	1 2 3 5 6
5102	1 Hz to 50 MHz	10 ns to 1 sec.	——	low impedance: "1" = line driving "0" = current sinking	0 to +6 V normal & complement	< 5 ns	2 3 4
5103	10 Hz to 200 MHz	< 4 ns to 10 ms	——	current	+0.1 V to +5 V −0.1 V to −5 V	< 2 ns	2 6
5109	10 Hz to 10 MHz	10 ns to 100 ms	10 ns to 100 ms	50 ohms, 100 ohms, current	0 to +10 V 0 to −10 V	< 4 ns	1 2 3 5 6

***FEATURES** **1.** Double pulse. **2.** Square wave output **3.** IC outout **4.** Base line offset **5.** Delayed trigger output **6.** Separate positive & negative outputs.

All pulse generators have the following common specifications: Manual, single pulse (pushbutton) operation. Gated operation. External triggering with trigger threshold adjustable between −1 volt and +1 volt. Trigger input is AC or DC coupled with choice of triggering on either the + or − slope of the input trigger signal. Reference trigger output.

Call or write DATA DYNAMICS, or your nearest sales representative for detailed literature. A demonstration and/or loan can be arranged at your convenience.

New Digital Panel Meters

• Low Price • High Performance • New Styling

This new line of DPM's offers features found only in the more expensive models. New integrated circuit techniques are used to give you outstanding performance and reliability while reducing costs.

Write for information of Datascan's full line of Digital Panel Meters — and DVM's for OEM.

Model 510 — unipolar
Model 525 — unipolar with underrange zeroing capability — ±10% accuracy with negative inputs, .1% with positive inputs
Model 520 — auto-polarity
Model 720 — auto-polarity

Input Power	115V, 50-60Hz, 5W, (210-250V add E to P/N)	115V, 50-60Hz, 7W, (210-250V add E to P/N)

* Standard on 500 Series, optional on 700 Series ** Not available on 500 Series, optional on 700 Series.
*** Accuracy for negative inputs for Model 525 is ±10%, positive inputs ±.1%.

SPECIALS

a. Special ranges are available — consult Datascan.
b. Case colors, other than black are available in special quantities — call Datascan.
c. Custom Digital Voltmeters tailored electrically and mechanically to your needs for OEM applications (over 100) are available.
d. All units are available without bezel and/or power supply at reduced prices — consult Datascan.
e. Other encode rates are available as an option — consult Datascan.
f. Models V2 and V3 input impedance is 100 KΩ/v

Programmable
DC Voltage & DC Current Sources

Employing TTL Logic, these precision sources meet all critical requirements for stable Voltage and Current Sources.

BCD programming and BCD output options permit logic-level programmable voltage or current selection and readout.

Easily programmable, these accurate sources are the ideal references for calibration laboratories, component test and OEM applications.

Features

- Remote Programming Capability
- .003% Accuracy
- 100 ms Response Time
- 1 ppm Resolution on Each Range
- 5 minute Warm Up
- Nixie® Readout
- Programming/Output Isolation
- Highly Stable Reference
- Portable or Rack Mounted
- BCD Output

Digital Programmable Voltage Source
model M106

The Model M106 is a digitally programmable (BCD), all solid state, stable DC voltage source. This programmable unit covers 0 to 1000 VDC in four ranges; 1, 10, 100 and 1000 volts, each with a full six digit readout. Manual mode voltage and polarity changes can be obtained by selection on the front panel keyboard. The calibration accuracy is .003% of indication on all ranges.

0-1000VDC /4 Ranges / $1745.00

Digital Programmable Current Source
model M206

The Model M206 is a unique solid state DC Current Source. Digitally programmable, this precision source covers 0 to 10 amperes in five ranges; 1, 10, and 100 milliamperes, 1 ampere, and 10 amperes each with a six digit Nixie readout. Current output and polarity changes are obtained by manual selection on the front panel keyboard. Accuracy is .003% to .01% of reading depending on range.

0-10 Amps / 5 Ranges / $2985.00

SERIES 100
COMPLEX IMPEDANCE, ADMITTANCE AND TRANSFER FUNCTION METERS

MODEL 100B

MODEL 100C

PLUG-IN 100-PA-1013

PLUG-IN 100-PA-1009

ADAPTER 100-PA-1011B

FEATURES:

- Direct Reading of Impedance, Admittance and Transfer Function
- Wide range of input levels
- Differential measurements for high accuracy
- Wide frequency range
- DC outputs for continuous plotting
- Plug-in versatility

APPLICATIONS:

- Electrical Components Testing
  Rapid testing of resistors, inductors, capacitors, crystals and transformers
  Non-linear analysis
- Materials Research
  Dielectric and magnetic properties
- Electro-acoustical Transducers
  Resonance frequencies and mechanical Q
  Coupling coefficient
- Active and Passive Networks
  Impedance and transfer function
- Mechanical and Acoustical Systems
- Impedance studies in Physiology

Complex Impedance plane plot of piezo-electric ceramic disk. (Plotted on X-Y recorder in 20 seconds.)

Series 100 Complex Impedance, Admittance and Transfer Function Instruments is comprised of a family of highly accurate main frames and plug-ins for the direct measurement of vector components of impedance, admittance, transfer function, power, vector magnitude and phase angle. Elimination of bridge balance enables measurements to be made rapidly and simply.

Main Frames: Three basic main frames are offered, each capable of analyzing a sinusoidal a-c voltage, producing readings and d-c outputs proportional to in-phase and quadrature components as well as magnitude and phase. Primarily designed for CW applications, the Series 100 can be used for limited gated-CW measurements where long duty cycles are present.

Model 100B Main Frame — measures in-phase and quadrature components, of Z, Y and transfer function.

Model 100B - Mod 4 Main Frame — is similar to the 100B but includes internal emitter-follower of higher power capability.

Model 100C Main Frame measures in-phase and quadrature components, as well as magnitude and angle of Z, Y and transfer function.

Plug-In and Adapters: Eight separate units control or measure the alternating current or voltage applied to the unknown, scale the signals and apply them to the main frame for direct reading of the selected function.

PLUG-INS AND ADAPTERS

Model 100-PA-	Measures	Freq. Range	Linear Ranges, Full Scale 1, 2.5, 5, etc. sequence	Voltage Across or Current Through Unknown (RMS)
1001A	Z & Y	100 Hz to 200 Khz	10Ω to 50 KΩ 10μ℧ to 50 Kμ℧	0-45 mv in Z mode; 3 v in Y mode
1004	Z	100 Hz to 200 Khz	1Ω to 5KΩ	0-45 mv
1008	Y or △Y	100 Hz to 100 Khz	100μ℧ to 500m℧	3 v
1009	Y or △Y	100 Hz to 10 Khz	0.025μ℧ to 10K μ℧	3 v
1010A	Z	100 Hz to 75 Khz	1Ω to 10KΩ	31.6A, 3.16KV max
1011B	Y or △Y*	100 Hz to 75 Khz	10 to 10^6μ℧ or pfd	31.6A, 6KV max
1012A	Y	100 Khz to 300 Khz	25μ℧, 2.5m℧, 250m℧	3 v
1013	V_0/V_1	100 Hz to 200 Khz	Gains of 0.01 to 10K	Input: 0.3 to 300 mv Output: 3 mv to 30 v

For further details on Series 100 write for bulletin 100
* Also used for dielectric measurements — measures capacitance and dissipation factor

SERIES 320
VECTOR IMPEDANCE AMPLITUDE METER

FEATURES:

- Direct reading of amplitude of impedance or transfer function
- Wide frequency range of 5 Hz to 500 Khz
- Wide impedance range of 1 to 10^7 ohms
- Impedance angle measurements (when Series 301 Phasemeter is used)
- Self contained oscillator

Series 320 Vector Amplitude Impedance Meters provide rapid, accurate direct measurements of impedance or transfer function. At premarked frequencies, inductance and capacitance are read from panel meter and a db scale facilitates Q measurements. Coupled with Series 301 phase meter, direct reading of impedance angle can be made easily.

SPECIFICATIONS

Frequency Range: 5 Hz to 500 Khz
Impedance Range: 1Ω to 10 MΩ, in 7 ranges
Inductance Range: 1 μh to 100,000 h, in 11 ranges
Capacitance Range: 0.1 pf to 10,000 mfd, in 11 ranges
Amplitude Accuracy: 20 Hz to 100 Khz, better than 5% of reading; for frequency extremes, better than 7% at 5 Hz and 10% at 500 Khz.
Phase Accuracy: 20 Hz to 100 Khz, better than 2½°. Low frequency: 5 Hz, better than 4°. High frequency: 500 Khz, better than 5° at 10 to 10^6 ohms; for other values of Z, better than 10°.
Oscillator: 5 Hz to 500 Khz, 5 ranges, 3 v rms approx., ±3% frequency accuracy.
Signal across unknown: Below 1K Ω, < 35 mv rms. Above 1K Ω, approx. 3 v rms.
AC Outputs: Two, for connection to Series 301 Phase meter.
AC Power Input: 115 v, 50-400 Hz; other voltages available.
Size: Portable (320, 320A) 7" x 16½" x 11½". For 19" rack mount specify 320R or 320AR.
Weight: 18 pounds; shipping, 27 pounds.

APPLICATIONS:

- Rapid production and incoming inspection of resistors, capacitors and inductors
- Filter and network design and testing
- Amplifier impedance measurements
- General purpose signal generator

OPTIONAL FEATURES
(Specify Model 320A or 320AR)

(1) DC output 0 to +1 v proportional to |Z| below 1K ohms, proportional to 1/|Z| above 1K ohms.
(2) DC output 0 to +1 v proportional to freq. dial position.
(3) AC output for use by counter for accurate freq. measurement.
(4) External oscillator input for use with special signal sources.

See Section 4900 for our pages on Synchro Converters.

SERIES 206
DIGITAL GATING/TIMING GENERATOR

Series 206 GATING/TIMING GENERATORS gate the output of an a-c signal generator and provides a single signal burst or repetitive signal bursts, with turn-on and turn-off times coincident with zero crossings of the input signal to minimize switching transients.

Internal or external triggering initiates an accurate sequence of pulses for: (1) turning on the signal at its first positive going zero crossing; (2) turning off the signal at the first positive going zero crossing following a precise time interval; (3) delayed triggering of oscilloscopes or other devices; (4) gating detectors or receivers after a precise time interval; (5) delayed triggering of Dranetz Series 215 AC Sampling Voltmeters or Series 202 CW/Pulse Vector Component Computer systems.

APPLICATIONS:

- Automatic a-c testing of components and circuits.
- Testing of data communications systems, modems, multiplexers and switching circuits.
- Calibration of underwater transducers under tone burst conditions.
- Measurement of propagation and reflections in acoustical fields.

FEATURES:

- Wide frequency range of 50 Hz to 3 Mhz.
- Provides zero-crossing turn-on and turn-off of a-c signals, single or repetitive gating.
- Provides three additional independently selectable timing pulses for controlling gated detectors and receivers.
- Digitally-controlled timing from front panel controls.
- Remote programming option.

SPECIFICATIONS

MODES OF OPERATION:

CW

Gated: (for CW, FM or Phase-shifted signals).
Single shot or repetitive gating of AC signals.
Repetitive gating using internal timing oscillator (with or without sync. to 60 Hz power line).

SIGNAL CHANNEL:

Frequency range: 50 Hz to 3 Mhz.
Input: Level — Sinusoidal signal, 1 v rms ±10%.
Impedance—10 kΩ shunted by 100 pf.
Output: Level — Adjustable from 0.1 to 1 v rms into 75Ω load over full frequency range; adjustable from 0.5 to 5 v rms into 10kΩ up to 2 MHz.
Distortion — Less than ½% from 50 Hz to 0.5 Mhz; < 1% to 3 Mhz.
Input to output isolation: > 60 db to 0.5 Mhz; noise typically 60 db down.
Types of gating: Zero crossing turn on and zero crossing turn off; less than 1.5° or 25 nsec coincidence error. Non-synchronous turn-on and turn-off.

EXTERNAL TRIGGER:

Pulse or square wave input, ±5 v into 3 kΩ load, transformer input, rise time 50 μsec max, duration 50 μsec. min.

GROUNDING:

Separate chassis, circuit and power line grounds.

CONNECTIONS:

Connections on rear; monitor outputs on front.

CONTROLLED TIMING:

Repetition Period: 100 μsec to 99.99 sec.
Signal On-Time: 10 μsec to 9.999 sec.
Transient Delay Pulse: 10 μsec to 9.999 sec.
Receiver Delay: 10 μsec to 9.999 sec.
Receiver On-Time: 10 μsec to 9.999 sec.

OUTPUT CONTROL PULSES:

Sync. Output: +5 pulse at signal turn-on followed by −5 v pulse at delayed receiver turn-on.
Signal gate output (for use with commercial E-I Normalizers): +10 v rectangular wave, having leading edge coincident with signal turn-on and lagging edge coincident with signal turn-off.
Signal transient delay output: +10 v rectangular wave having lagging edge coincident with setting of Transient Delay Control.
